Trust GXT 867 Acira Keyboard Software

Product Usage Instructions

Setting up the Software:

1. Download the software from <https://www.trust.com/24882/downloads>
2. Unpack the .zip file and double-click on the 'Acira Setup' file.
 - During installation, choose the appropriate layout: US for small Enter key (US, NL, PL) or ISO for big Enter key (DE, UK, BE, FR, ES, IT, Nordics etc).
3. Follow the software installation setup until completion.

Updating the Keyboard:

1. Locate the FW update folders in the 24882 download folder.
2. Select the correct folder based on your keyboard layout: ANSI FW update for a small Enter key or ISO FW update for a big Enter key.
3. Open the .exe file.
4. While plugging in your keyboard, press the Windows key and the ESC key simultaneously. If done correctly, no LEDs should turn on.
5. Click on Start. The update is complete when the progress bar turns completely green.
6. Close the update program and restart the Acira software app. Your keyboard should now be recognized.

FAQs

- **Q: What should I do if the software fails to recognize my keyboard during the update?**
 - A: In such cases, follow the steps provided under 'Updating the Keyboard' to manually update your keyboard firmware.

- **Q: Can I change the keyboard layout after the initial setup?**

- A: Yes, you can change the keyboard layout by re-installing the software and selecting the desired layout during installation.

Setting up the software

Follow these steps to download the software and connect your keyboard.

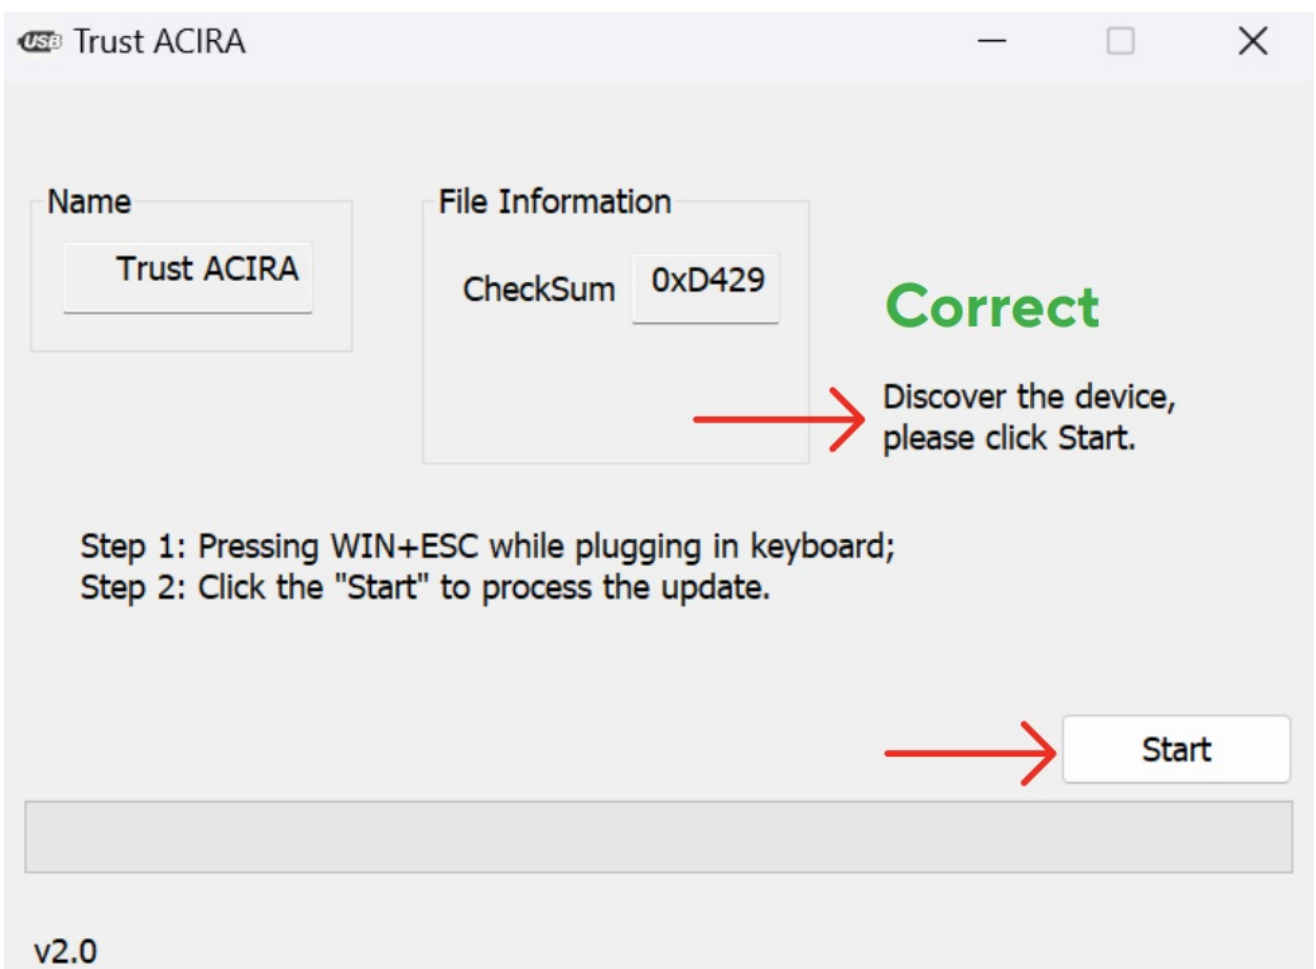

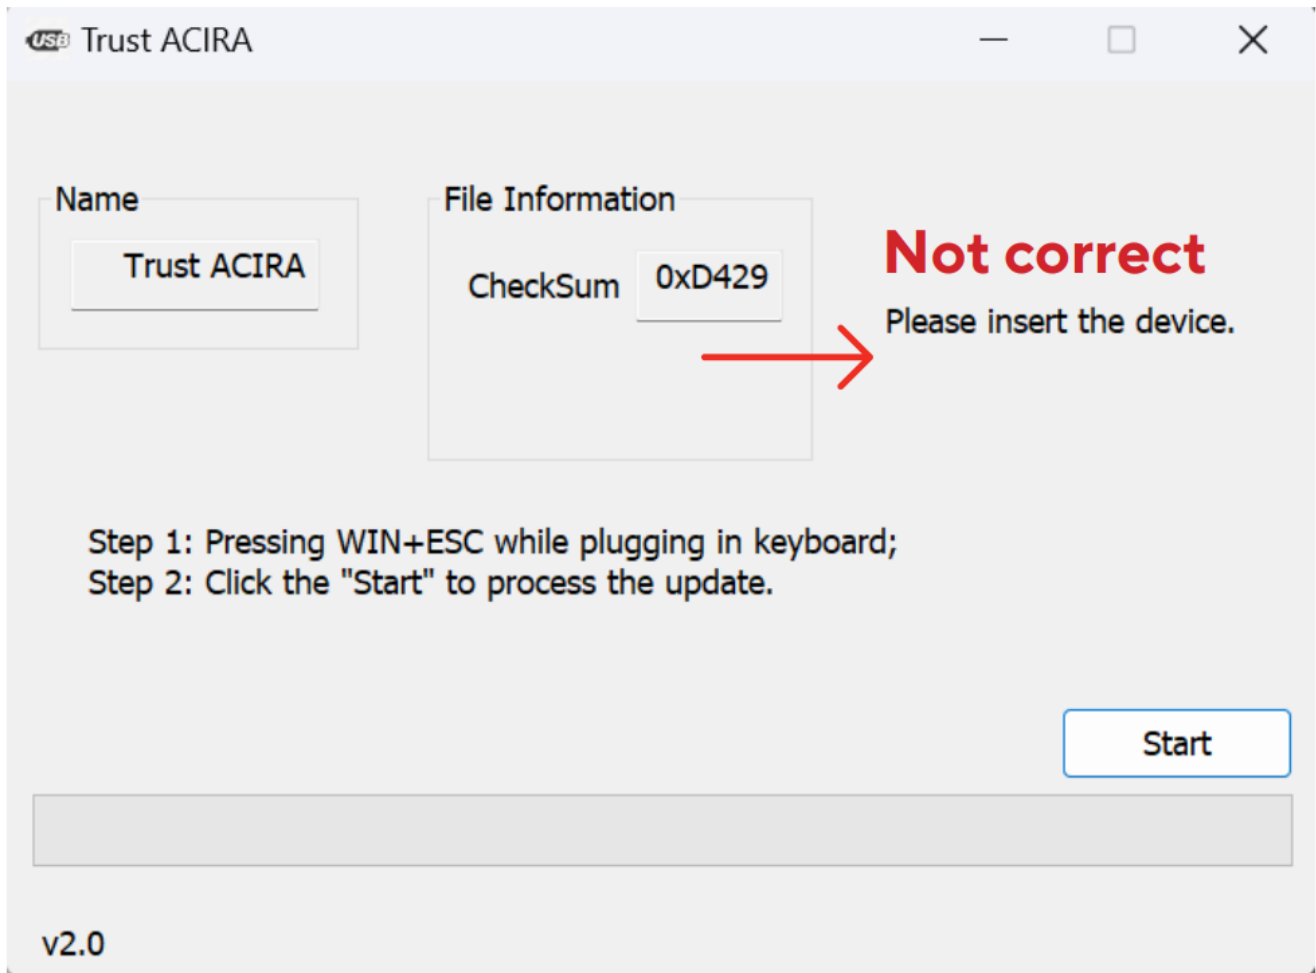

1. Download the software from <https://www.trust.com/24882/downloads>
2. Unpack the .zip and double-click on the 'Acira Setup' file.
 - During installation, you will get the option to select US or ISO: please select the correct layout. US layout if you have a small "Enter key" (US, NL, PL) ISO if you have the big "Enter key". (DE, UK, BE, FR, ES, IT, Nordics etc)
3. Follow the software installation setup until done.

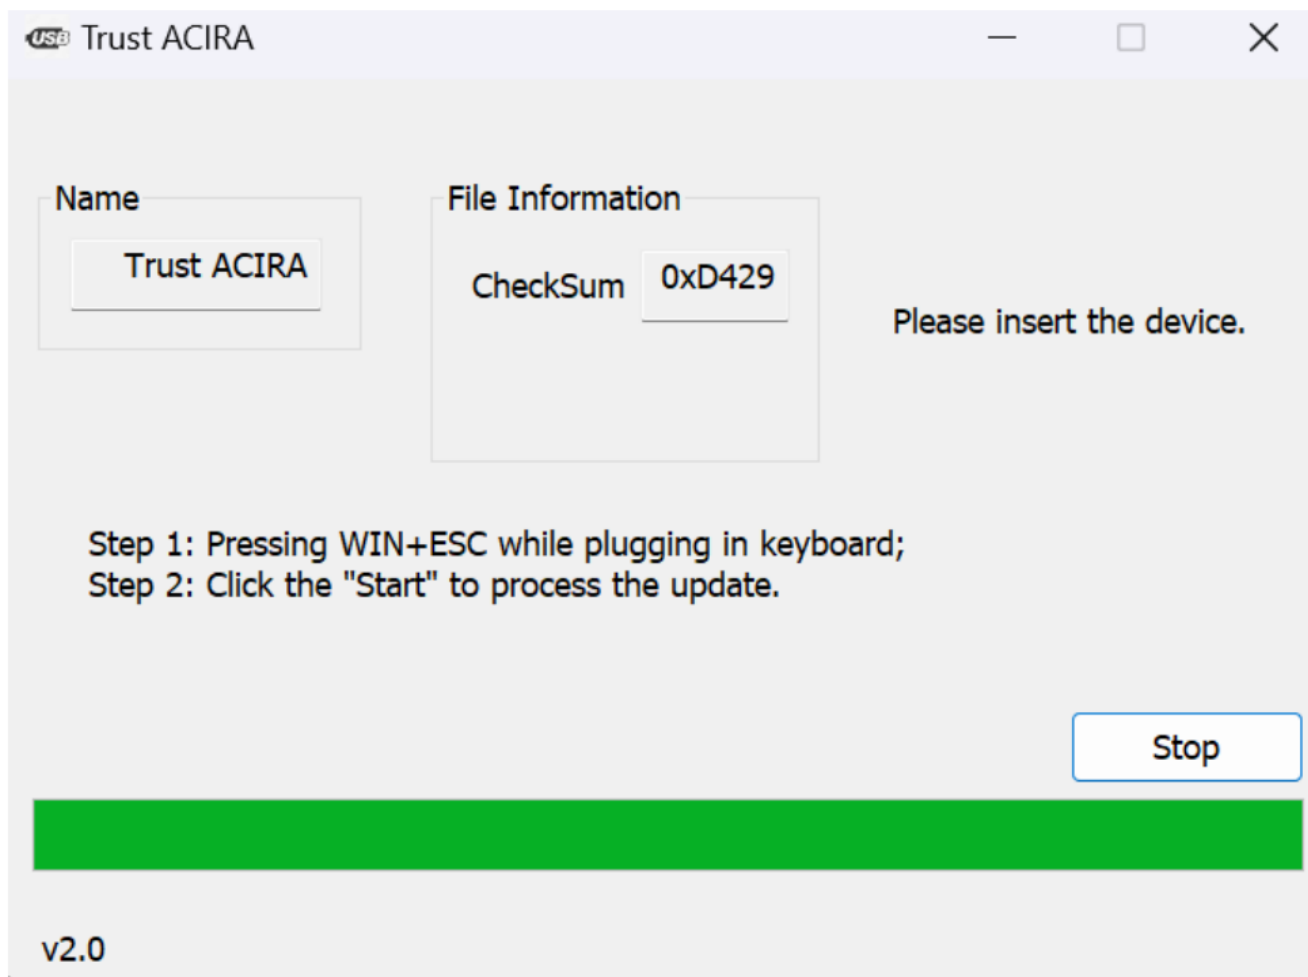

Updating the keyboard

Updating the keyboard (only if the software doesn't recognize the keyboard)

Follow these steps to update your keyboard to the latest firmware.

1. Locate the FW update folders (in the 24882 download folder).
2. Select the correct folder; ANSI FW update for a small "Enter key" and ISO FW update for a big "Enter key".
3. Open the .exe file.
4. While plugging in your keyboard, press the "Windows key" and the "ESC" key at the same time. If done correctly, no LEDs should turn on.
5. Click on Start. The update will be done when the bar turns completely green (see examples below).
6. Close the update program and restart the Acira software app. It should now recognize your keyboard!
