## TSC Alpha-30R Linerless Printing Solution Instructions

### Streamlining Operations and Reducing Waste with Linerless Label Printing

In the retail sector, which includes food packaging, accessories price labeling, as well as specimen and pharmacy labeling in healthcare, and within the warehouse and logistics industry, linerless labeling is increasingly being considered for implementation. It eliminates the need for peeling, streamlines processing, and the absence of liner waste promotes a safer work environment by reducing the risk of slips caused by liners. Labels without liners not only assist in enhancing the operational efficiency of your business and ensures alignment with government environmental and safety regulations, but also reduce costs.

#### **Increased Efficiency**

- Greatly improve operational efficiency by eliminating peeling
- Print labels of different lengths on a single label roll

#### **Enhanced Sustainability and Safety**

- Effortlessly meet global environmental policies, like the EU's EAP
- Alignment with workplace safety standards, such as OHS

#### **Reduced Cost**

- Increase labels per roll by 40% more

- Reduce storage, freight loads, and disposal handling costs
