TsingLan TK2 AI Care Sensor

Product Parameter

Model	TK2
Operation Frequency	60.5 ~ 62.5GHz
Transmitting Power	11dBm
Power Consumption	≤3W
Power Supply	AC100-240V
Antenna Number	4T4R
Fall Detection Range	4×6m
Operating Temperature	-10°C ~ 45°C
Communication Mode	WiFi
Installation environment	Indoor Fixed
Installation Mode/Height	Ceiling-Mounted 2-3m

FCC Warning

"This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
 - (2) this device must accept any interference received, including interference that may cause undesired operation."
- "Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment".

RF exposure

"In order to comply with FCC RF Exposure requirements, this device must be installed to provide at least 20cm separation from the human body at all times.

Radiation Exposure Statement

1. This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance 20cm between the radiator & your body.
2. The device has been evaluated to meet the general RF exposure requirement

For all Class B Digital Devices, a statement like the following is needed:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
