TTCOMBAT TTSCW-SFU-118 Mod-Co-N Corner Expansion Blocks

Product Information

The TTSCW-SFU-118 Mod.Co.N Corner Expansion Blocks are a set of corner expansion blocks designed to

replace corner struts in other Mod.Co.N kits. These blocks are made from bendy wood, which is specifically designed to curve around a designed frame. The detailing may vary, but the construction remains the same.

Product Usage Instructions

1. Before starting the assembly, familiarize yourself with the series of icons provided in the instructions. These icons will help guide you through the assembly process.
2. Ensure that you do not glue the corner expansion blocks. They should be assembled without any adhesive.
3. Carefully score and fold the parts as indicated in the instructions. Take your time to ensure accurate folding.
4. Note that the placement of the corner expansion blocks is optional. You may choose to use them or not, depending on your preference or specific requirements.
5. Pay close attention to each step in the instructions, as the process order or part used may be specific.
6. If instructed, repeat the process of making a particular part the specified number of times.
7. Be aware that the next instruction step may be the same assembly as before, but from a different angle. Take note of any changes in perspective.
8. Once a sub-assembly is complete, it can be added to the main kit. Ensure that the smaller construction aligns properly with the main structure.
9. Continue following the instructions until the entire assembly is complete. There may be additional optional parts, so check all instructions thoroughly.
10. Handle the corner expansion blocks with care, as they are fragile. Avoid bending them, as they are designed to curve around a specific frame only.

These are a series of icons that may be used throughout the instructions to help your assembly.

Do not glue this part

Carefully score and fold this part

This part - or its placement is completely optional

Look closely at this step -
The process order or part used, may be specific

Repeat making this part the specified number of times

The next instruction step will be the same assembly so far, but from a different angle

Sub-assembly complete.
This smaller construction is ready to add to the main kit

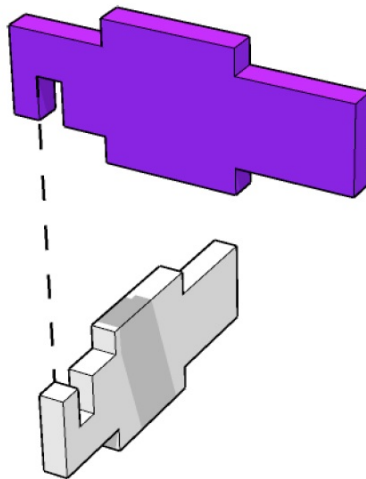

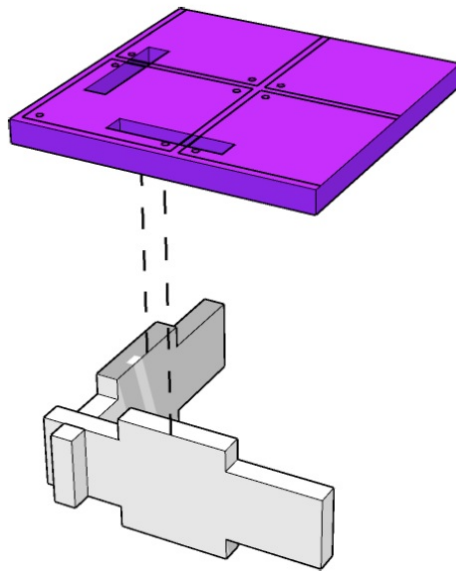

Assembly Complete! There could be more optional parts - check to the very end of instructions

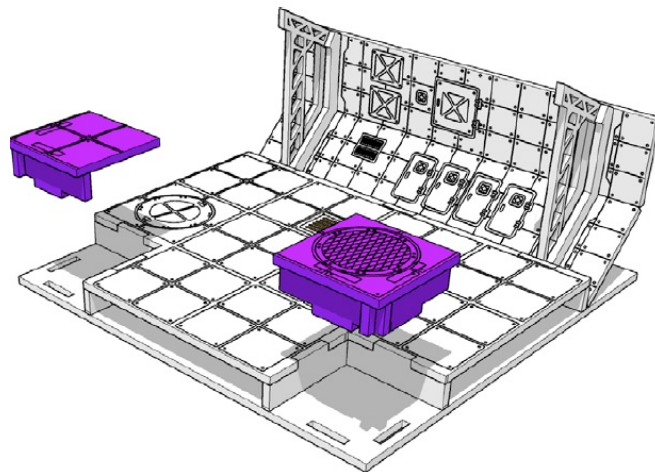

FRAGILE: DO NOT BEND.
"Bendy wood" is designed to curve around a designed frame only.

If in doubt, scroll ahead to confirm.

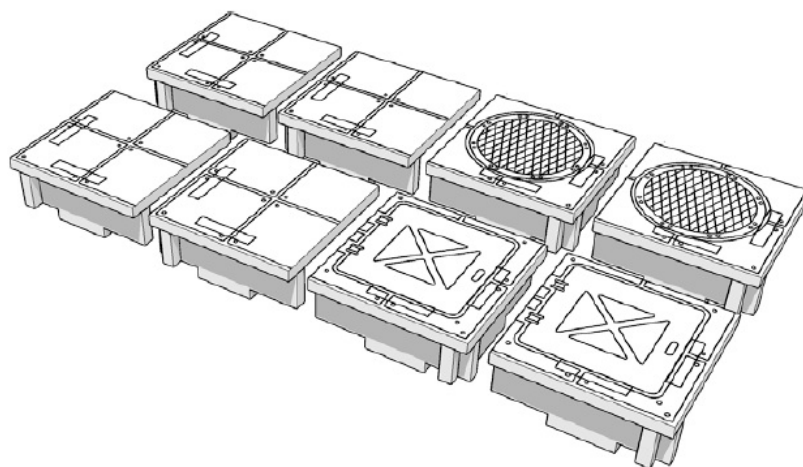

Detailing will vary but the construction remains the same

Corner expansions are made to replace any corner struts in other Mod.Co.N kits.
