#### R21-2 Aurora PHF2.0.0 Release Notes

## **Contents**

- 1 R21-2 Aurora PHF2.0.0 Release Notes
- 2 End of Support and Deprecated

#### **Features**

- 3 SecureTrack Release Notes
- 4 SecureChange Release Notes
- **5 Patents and Trademarks**
- 6 Documents / Resources
  - **6.1 References**

#### R21-2 Aurora PHF2.0.0 Release Notes

## **Resolved Issues from Previous Releases**

Tufin Orchestration Suite (TOS) R21-2 Aurora PHF 2.0.0 includes all resolved issues listed for this release, as well as all resolved issues from the previous releases listed below.

All Resolved Issues		
This release		
R21-1 PHF1.1.0 Aurora	0	

## Installing/Upgrading TOS Aurora

If you have FortiManager devices in SecureTrack, after upgrading you are going to need to add a <a href="SAN">SAN</a> signed certificate to each device

TOS Aurora is the next generation platform of Tufin Orchestration Suite, with newly enhanced versions of features you rely on.

There are three options for installing or upgrading TOS Aurora:

- **New installation:** Installing TOS Aurora on a new environment.
  - For more information, see **Clean Install procedures**
- Aurora to Aurora upgrade: Upgrading an older version of TOS Aurora to a newer version of TOS Aurora.
   For more information, see <u>Upgrade From TOS Aurora</u>
- Classic to Aurora upgrade: Upgrading TOS Classic to TOS Aurora.
   To help you perform the Classic to Aurora upgrade, Tufin developed the Upgrade Planner. The Upgrade Planner collects TOS environment and setup information to determine whether your current environment is compatible with TOS Aurora.

For more information, see:

- <u>Upgrade Planner TOS Classic to TOS Aurora</u>
- Before You Upgrade from TOS Classic to TOS Aurora

To upgrade from Classic to Aurora upgrade, contact Tufin Support.

To obtain the TOS Aurora installation files, see the **Download Center** in the Customer Portal.

#### **Upgrade Paths and Compatibility**

To view the supported upgrade paths for TOS Aurora, see the <u>TOS Aurora Lifecycle and Build History</u> page. Always review the <u>Compatibility Notes</u> prior to installing an upgrade. Make sure to read the additional notes in the Release Notes for each version in your upgrade path.

## **TufinOS Compatibility**

Tufin Orchestration Suite Aurora R21-2 Aurora requires TufinOS 3.50 and above. We recommend that you install the latest version of TufinOS available.

The latest version of TufinOS available can be downloaded from the Customer portal:

- In the **Download Center** in the Customer Portal
- In the New Version Support page, as part of the installation/upgrade files.

Feature	Removed from New Installations	Removed from All Installations
Policy Analysis Report	R21-3 Aurora	R22-2 Aurora
Risk Charts	R21-3 Aurora	R22-2 Aurora
Compliance Policies	R21-3 Aurora	R22-2 Aurora
Regulations Audit Browser	R21-3 Aurora	R22-2 Aurora
Rule Documentation Report	R21-3 Aurora	R22-2 Aurora
Security Risk Report	R22-1 Aurora	R22-2 Aurora
Expired Rules Report	R22-1 Aurora	R22-2 Aurora

#### Additional Stuff to Know

- Starting from R21-2 Classic, all devices need TLS 1.2. SecureTrack will not retrieve revisions from devices with TLS 1.0 or 1.1.
- Starting R20-2, the Web Server certificate validity will be decreased to 395 days for clean installations.
- Tufin Orchestration Suite validates user information for many fields in SecureTrack and SecureChange such as user names and email address. If a field contains invalid information, you will not be able to create or modify the field until the invalid information has been corrected. See <a href="Input Validation">Input Validation</a> for details.
- Starting with Tufin Orchestration Suite R19-2, SecureChange will verify that devices are suitably licensed for both SecureChange and Provisioning during ticket handling.
  - Unlicensed devices may cause unplanned interruptions when performing SecureChange operations.
  - We strongly recommend checking that all devices used in the system are fully licensed prior to upgrading, as unlicensed devices may cause unplanned interruptions when performing SecureChange operations.

To review the status of all your licenses, see **Viewing License Status**.

For a summary of how to work with SecureChange licenses, see <u>Installing SecureChange Licenses</u> and <u>Licensing SecureChange</u>.

For more information about licensing, contact your Tufin partner or email us at <a href="mailto:salesops@tufin.com">salesops@tufin.com</a>.

- Tufin Orchestration Suite enforces maximum session duration settings for SecureTrack and SecureChange, including for the REST APIs.
- To ensure that SecureChange and SecureApp have full functionality, the dedicated account used to define integration with SecureTrack (SecureChange/SecureApp > Settings > General > SecureTrack) should have Super Admin permissions configured in SecureTrack.
- For Check Point R80 devices, when you upgrade from R18-3 and below to R19-1 and above, a new revision is automatically retrieved.
  - After upgrading, Compare Revisions may show changes for all the existing network objects.
  - Before you upgrade, make sure you have a recent (from ≤ 3 months) Check Point Jumbo Hotfix version installed on your device. See the <u>relevant Check Point Support Center article</u> for more information on how to verify which Jumbo Hotfix version is installed.
- Microsoft Internet Explorer (IE): Release R20-1 is the last release that supports IE. From release R20-2, Tufin support for IE will reach its "end of life" (EOL). Tufin will support Microsoft Edge version 80.0.x (and above) and will continue to support Chrome version 80.0.x (and above) and Firefox version 73.0.1 (and above).
- SAML Login Authentication and Google Chrome browsers: Google recently introduced a change to their

SameSite cookie policy that enhances browser security. As a result of this change, users will be unable to log in to SecureTrack using SAML authentication on old browsers. SAML authentication is supported only for browser versions starting from:

• Chrome: versions 79 and 80.

Firefox: version 72

We strongly recommend upgrading the browsers to these versions. For more information on the SameSite cookie policy change, see the following posts:

- <u>Ultimate Security Professional Blog: SameSite cookies Everything You Need to Know</u>
- Medium: Why you need to care about Google's change to the SameSite cookie attribute

## **End of Support and Deprecated Features**

## **TOS Classic End of General Support**

General support for TOS Classic ends December 31, 2022. End of Support Schedule

- R21-3: Last release of TOS Classic, only hot fixes with bug fixes will be available after this releases; no new features will be added.
- December 2022: End of General (Hot Fix) support. No new general hot fixes will be available after this date.
   Support patches will still be available for customers with Extended Support on a case-by-case basis.

## **TOS Aurora Deprecated Features**

The following features will no longer be available in future releases of TOS Aurora:

Feature	Removed from New Install ations	Removed from All Installa tions	Announcement Date	
Policy Analysis Report	R21-3 Aurora	R22-2 Aurora	Jun-21	
Risk Charts	R21-3 Aurora	R22-2 Aurora	Jun-21	
Compliance Policies	R21-3 Aurora	R22-2 Aurora	Jun-21	
Regulations Audit Browser	R21-3 Aurora	R22-2 Aurora	Jun-21	
Rule Documentation Report	R21-3 Aurora	R22-1 Aurora	Jun-21	
Security Risk Report	R22-1 Aurora	R22-2 Aurora	Jun-21	
Expired Rules Report	R22-1 Aurora	R22-2 Aurora	Jun-21	
Integration with Puppet LabsPu ppetLab	Not available in any TOS Auro	Aug-21		
Integration with Cisco ACI Application	Not available in any TOS Aurora releases.  Aug-21			

#### **Policy Analysis Report**

In TOS Aurora version R21-3, the Policy Analysis Report will not be available. We recommend you consider using the following feature instead:

Rule Viewer

#### **End of Life Schedule**

- 21-3: Unavailable in new installations and removed from installations not currently using the feature
- 22-1: Removed from all installations

#### **Risk Charts**

In TOS Aurora version 21-3, the new USP Compliance widget will replace the Risk Chart in the Dashboard. The Compliance widget can be configured to calculate risk by USP and can be accessed from the <u>USP Viewer</u>.

#### **End of Life Schedule**

- R21-3: Unavailable in new installations
- R22-1: Removed from installations not currently using the feature
- R22-2: Removed from all installations

If you will still require access to the old Risk Dashboard, contact Tufin support.

#### **Compliance Policies**

In TOS Aurora version R21-3, the Compliance Policies feature will not be available. If you currently use the Compliance Policies, the feature will still be available until version R22-2, but will no longer be available after that release.

We recommend you consider using the following feature instead:

- Unified Security Policy
- USP Alerts Manager
- USP Exceptions

These features give you greater flexibility in the number of zones that you can configure and allow you to define the requirements that you need.

#### **End of Life Schedule**

- R21-3: Unavailable in new installations
- R22-1: Removed from installations not currently using the feature
- R22-2: Removed from all installations

#### **Regulations Audit Browser**

In TOS Aurora version R21-3, the Regulations Audit Browser will not be available. If you currently use the Regulations Audit Browser, the feature will still be available until version R22-2, but will no longer be available after that release.

We recommend you consider using the following features instead:

- Unified Security Policy
- SecureTrack Reporting Essentials

- R21-3: Unavailable in new installations
- R22-2: Removed from all installations

#### **Rule Documentation Report**

In TOS Aurora version R22-1, the Rule Documentation Report will not be available. We recommend you consider using the following feature instead:

End of Life Schedule

- 21-3: Unavailable in new installations
- 22-1: Removed from all installations

#### **Security Risk Report**

In TOS Aurora version R22-1, the Security Risk Report feature will not be available. If you currently use the Security Risk Report, the feature will still be available until version R22-2, but will no longer be available after that release.

We recommend you consider using the following features instead:

- Unified Security Policy
- SecureTrack Reporting Essentials

The Unified Security Policy feature give you greater flexibility in the number of zones that you can configure and allow you to define the requirements that you need.

End of Life Schedule

- R21-1: Unavailable in new installations
- R22-2: Removed from all installations

#### **Expired Rules Report**

In TOS Aurora version R22-2, the Expired Rules Report will not be available.

We recommend you consider using the following feature instead:

• Rule Viewer

End of Life Schedule

- 22-1: Unavailable in new installations
- 22-2: Removed from all installations

## **Integration with Puppet Labs**

SecureApp integrated with TOS Aurora will not support integration with Puppet from Puppet Labs®.

End of Life Schedule

Not available in any TOS Aurora releases.

#### **Integration with Cisco ACI Application**

SecureApp integrated with TOS Aurora will not support integration with Cisco ACI Applications.

#### End of Life Schedule

• Not available in any TOS Aurora releases.

#### **Deprecated Devices**

The following devices will not be fully supported in future versions of TOS:

#### Fortinet FortiManager - Basic Mode

As of R19-3, creating new Fortinet FortiManager – Basic Mode devices is not supported. As of R22-1, retrieving new revisions is not supported.

For other limitations of FortiManager Basic, see Notes for FortiManager Basic.

If you use FortiManager devices, we recommend using Advanced mode, which is still supported by Tufin.

## End of Life Schedule

- R19-3: Installing new devices not supported
- R22-1: Retrieving new revisions not supported

#### Palo Alto Networks Panorama – Basic Mode

As of R19-3, creating new Palo Alto Networks Panorama – Basic Mode devices is not supported. As of R22-1, retrieving new revisions is not supported.

For other limitations of Panorama Basic, see **Notes for Panorama Basic**.

If you use Panorama devices, we recommend using Advanced mode, which is still supported by Tufin.

#### End of Life Schedule

- R19-3: Installing new devices not supported
- R22-1: Retrieving new revisions not supported

#### Panorama Version 8 and earlier

No longer supported

End of Life Schedule

• 22-1: Unavailable in new installations and not supported

#### SecureTrack Release Notes

Issues Resolved in SecureTrack R21-2 (Aurora)

#### R21-2 PHF2.0.0

SecureTrack version R21-2 PHF2.0.0 includes these resolved or updated issues, and all resolved or updated issues from earlier versions.

Category	Reference I D	Also in	Description
Device Monitoring	TOS-39166	R21-2 HF3 R21-3 HF1 R22-1 PRC1. 0.0	For Cisco FMC devices, resolved an issue causing the dat e in device syslogs with a priority code to be parsed incorre ctly. (SR86135, SR83985)
Device Monitoring	TOS-39288	R22-1 PRC1. 0.0	For Juniper SRX devices, resolved an issue preventing sys logs from being retrieved because certain calculations wer e impacted by a deleted device that had not been removed from the database. (SR86831)
Notifications	TOS-37576	R21-3 PGA.0. 0 R22-1 PRC1. 0.0	Resolved an issue of false admin alerts about neo4j. (SR8 4494)
Notification	TOS-38979	R21-3 PGA.0. 0 R22-1 PRC1. 0.0	Resolved an issue of node status messages being sent wit hout justification. Examples: Probe Failed, Node degraded, Node healthy (SR85055)
Topology	TOS-37984 R21-2 HF1 R21-3 RC1		For Azure Virtual Networks, resolved an issue preventing SecureTrack from retrieving dynamic topology data when t here is a user-defined route with a service tag in the address prefix. (SR72996)
Upgrade/Installatio	TOS-40501	R21-3 PGA.0. 0 R22-1 PRC1. 0.0	Resolved an issue preventing upgrade to TOS Aurora due to bridge service error E11000. (SR85953)

## R21-2 PHF1.1.0

SecureTrack version R21-2 PHF1.1.0 includes these resolved or updated issues, and all resolved or updated issues from earlier versions.

Category	Reference ID	Also in	Description
Security	TOS-39138		Mitigated the CVE-2021-44228 (Apache Log4Shell) and CVE-202 1-45046 vulnerability

## R21-2 PHF1.0.0

SecureTrack R21-2 PHF1.0.0 for TOS Aurora includes these resolved or updated issues, and all resolved or updated issues from earlier versions.

Category	Reference I D	Also in	Description
Device Monitoring	TOS-34684		Resolved an issue causing the output files from a certain scrip t to be stored in the/tmp folder. (SR78053)
Device Monitoring	TOS-34910	R21-3 PR C1	For Check Point CMA devices, resolved an issue preventing SecureTrack from stopping/starting the devices from the Status page. (SR81269)
Rule Viewer	TOS-34260	R21-3 PR C1	Resolved an issue preventing revisions from being retrieved fr om rules with very long comments (Over 32,000 characters). Long comments are now retrieved, but only the first 32,000 ch aracters will be indexed and searchable. (SR82846)
Topology	TOS-36162	R21-1 HF 4 R21-2 HF 2 R21-2 PH F2 R21-3 RC 1 R21-3 PR C1 R21-3 GA R21-3 PG A	For Amazon AWS accounts, resolved an issue preventing Se cureTrack from retrieving dynamic topology as a result of inco rrect authorization credentials sent to AWS when running a to pology sync. (SR71499, SR79558)
Upgrade/ Installation	TOS-34653	R21-3 PR C1	For Fortimanager devices with large amounts of global rules, resolved an issue preventing the global rules from appearing in the Rule Viewer, which caused delays in the migration from Classic to Aurora. (SR82151)
Violations	TOS-33122	R21-3 PR C1	For Check Point CMA devices, resolved an issue preventing r ules belonging to a group with an Any exclusion from triggerin g violations. (SR81025)

## R21-2 PGA.2.0

SecureTrack R21-2 PGA.2 for TOS Aurora includes these resolved or updated issues, and all resolved or updated issues from earlier versions.

Category	Reference I D	Also in	Description
Install/ Upgrade	TOS-33527		Resolved an issue preventing TOS Aurora from being installe d on new Gen 4 appliances, or servers with a clean install of TufinOS, and no TOS classic.
Device Monitoring	TOS-34319	R21-2 PH F1	For cloud environments (which have an external load balancer), resolved an issue preventing TOS from processing incoming syslog data. (SR81532)

## R21-2 PGA.1.0

SecureTrack R21-2 PGA.1 for TOS Aurora includes these resolved or updated issues, and all resolved or updated issues from earlier versions.

Category	Reference ID	Also in	Description
Install/Upgrade	TOS-33157	R21-2 HF 1.1 R21-2 HF 2 R21-3 RC 1	For upgrades to R21-2 GA, resolved an issue preventing subscription only license SKUs from manually being reattached t o devices for machines configured with specific timezones. (SR 79657, SR79000, SR81009)

## R21-2 PGA.0.0

SecureTrack R21-2 PGA for TOS Aurora includes these resolved or updated issues, and all resolved or updated issues from earlier versions.

Category	Reference I D	Also in	Description
Compare	TOS-26650	R21-1 HF 3 R21-2 HF 1 R21-3 RC 1	For Juniper SRX devices, resolved an issue preventing rules wi th revisions containing IPv6 objects with a certain address from being displayed in the Compare tab, in the View Policy dialog b ox. (SR72212)
Configuration	TOS-27733	R21-2 PH F1	Resolved an issue causing all timestamps in specific pods to be in the UTC timezone, instead of the configured time zone. (SR7 1500)
Database	TOS-24600		Resolved a memory issue preventing SecureTrack from calcula ting violations for devices with interfaces mapped to a large number of zones. (SR70765)
Device Monitoring	TOS-26841	R21-3 PR C1	Resolved an issue preventing SecureTrack from processing ne w revisions. (SR73704)
Device Monitoring	TOS-28643	R21-1 HF 2.1 R21-1 HF 3 R21-2 HF 1 R21-3 RC	For Check Point R81 devices, resolved an issue preventing Se cureTrack from receiving revisions that include rules with an "int eroperable device" network object in the source or destination. (SR74993)
Device Monitoring	TOS-30021	R21-2 PH F1 R21-3 PR C1	For Fortimanager 6.4.6 devices, resolved an issue preventing SecureTrack from pulling revisions. (SR77532)
Installation/ Upg rade	TOS-29964	R21-2 PH F1 R21-3 PR C1	Resolved an issue preventing TOS classic from being upgraded to TOS Aurora when SecureTrack is monitoring devices with no rules.
REST API	TOS-28641	R21-2 HF 1 R21-3 RC 1	For managing devices (Fortimanager, Panorama, Cisco ASA), r esolved an issue causing the Shadowing Rules API function to return incorrect results. (SR77429)
Rule Viewer	TOS-26841	R21-3 PR C1	Resolved an issue preventing SecureTrack from processing ne w revisions. (SR73704)

## R21-2 PRC1.0.0

SecureTrack R21-2 PRC1 for TOS Aurora includes these resolved or updated issues, and all resolved or updated issues from earlier versions.

Category	Reference ID	Also in	Description
Installation/Upgra de	TOS-21696		For Classic to Aurora upgrades from R18-2 and below, resolved a cluster management mismatch issue which resulted in spam messages.(SR71028)

SecureTrack version R21-2 for TOS Aurora has these known issues:

Interactive sessions in multiple tabs of the same browser, the Back button in the web browser, and Internet Explorer prior to version 11 are not supported.

## SecureChange Release Notes

# Issues Resolved in SecureChange R21-2 (Aurora) R21-2 PHF1

SecureChange version R21-2 PHF1 for TOS Aurora includes these resolved or updated issues, and all resolved or updated issues from earlier versions.

Category	Reference ID	Also in	Description
General	TOS-29209	R21-2 HF1 R21-3 RC1 R21-3 PRC 1	Resolved an issue causing SecureChange to try and connect to the internet when users log in. (SR76998)
Licensing	TOS-35690	R22-1 PRC 1	For cloud deployments, resolved an issue preventing SecureChang e licenses from being auto-attached to devices. (SR80904)

#### **R21-2 PGA.1**

SecureChange version R21-2 PGA.1 for TOS Classic includes no new resolved or updated issues, and all resolved or updated issues from earlier versions.

#### R21-2 PRC1 and PGA

SecureChange version R21-2 PRC1 and PGA for TOS Aurora includes no new resolved or updated issues, and all resolved or updated issues from earlier versions.

## **Known Issues in SecureChange R21-2 (Aurora)**

SecureChange version R21-2 for TOS Aurora has these known issues:

Interactive sessions in multiple tabs of the same browser, the Back button in the web browser, and Internet Explorer prior to version 11 are not supported.

#### **Patents and Trademarks**

See www.tufin.com/patents for patent details.

#### Trademarks

Tufin, SecureChange, SecureTrack, Automatic Policy Generator, and the Tufin logo are trademarks of Tufin Software Technologies Ltd. All other product names mentioned herein are trademarks or registered trademarks of their respective owners.

Some TOP plugins include software developed by Terrapin Communications, Inc. and its contributors for RANCID.

## **Document Version Information**

This document is relevant for all R21-2P releases up to PHF2.0.0.
