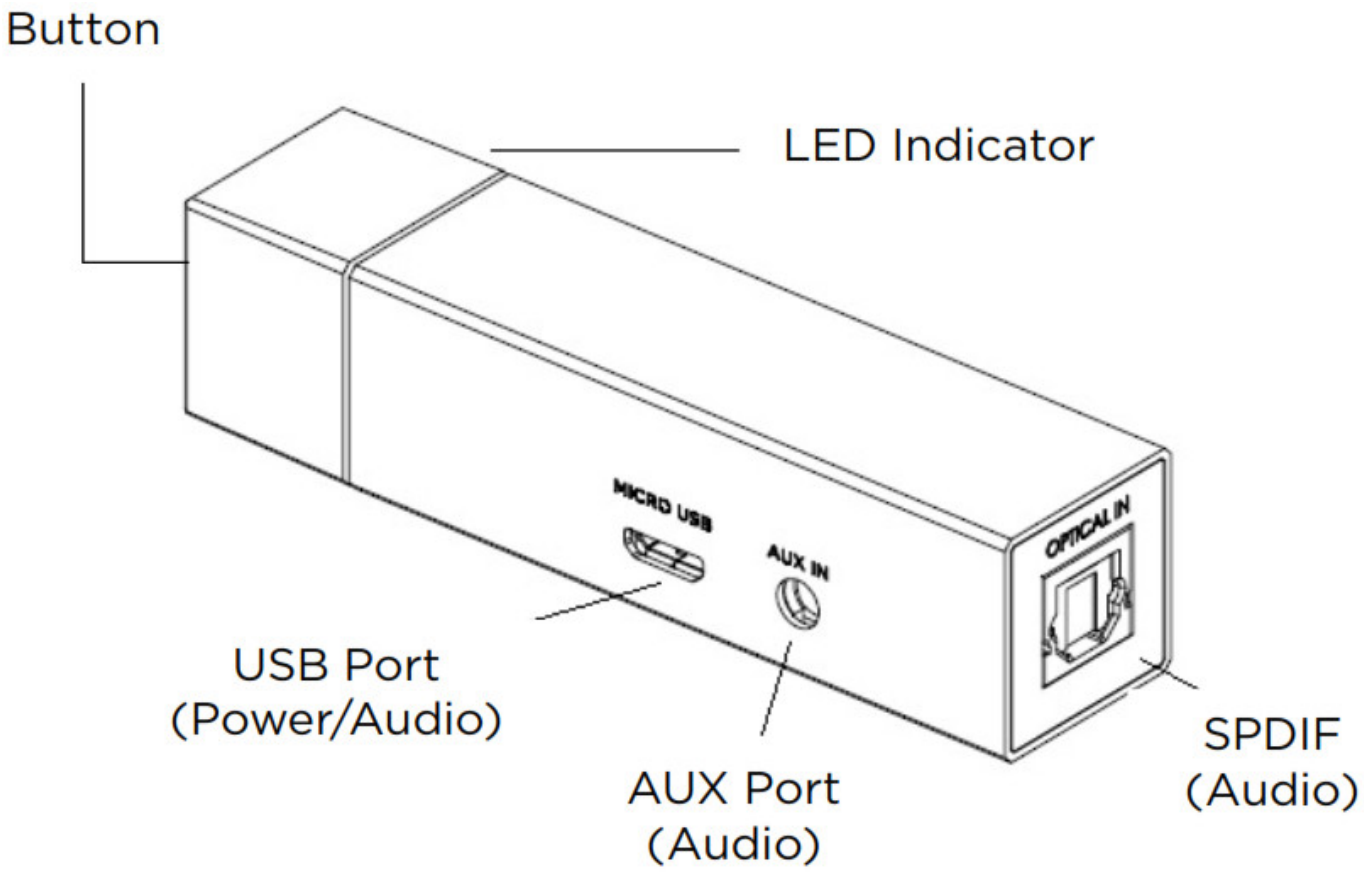
TUNAI WAND OVERVIEW



INPUT PORTS

- USB : Power supply and USB audio input
- AUX : 3.5mm audio input
- SDPIF : Optical audio input

BUTTON

- Short press: Mode change / Wake up
- Long press: Force WAND to enter pairing mode

LED Indicator

LED Color

	White	AUX
	Blue	SPDIF
	Orange	Micro USB

LED Status

Rapid Flash	Pairing Mode
Slow Flash	Available for the previously paired device to connect
LED On	Connected
LED Off	LED goes off automatically after 5 minutes

INSTALLATION

1. Connect WAND and USB power adapter with the included micro USB cable. LED will flash once powered.
2. Connect WAND and the audio source to the input port using the corresponding cable (micro USB and 3.5mm to RCA is included).

PAIRING
ENTER PAIRING MODE

1. WAND will enter pairing mode when powered for the first time.
2. LED will flash rapidly when entering pairing mode.
3. To force re-enter pairing mode, long-press the button for 5 seconds.

PAIRING WITH BLUETOOTH HEADPHONES

1. Force both WAND and Bluetooth headphones to enter pairing mode. WAND will enter pairing mode automatically when powered for the first time.
2. WAND will be connected with Bluetooth headphones automatically once both enter pairing mode.
3. LED indicator stop flashes once paired

AUDIO CODECS

WAND supports aptX for high-quality audio, aptX for low latency, and standard SBC. To connect with aptX or aptX low latency, Bluetooth headphones will need to also support these audio CODECs. Otherwise, standard SBC will be used for the connection.
Connection priority : aptX low latency > aptX > SBC.
