tuya IoT Development Platform

FAQ

1. What pairing modes does the aroma diffuser support?

Bluetooth mode, Wi-Fi Easy Connect (EZ mode), and access point (AP) mode are enabled by default.

2. Can I use passive buzzers?

   Both active and passive buzzers are supported. If you use the passive buzzer, the frequency must be configured.

3. Can I delete a data point (DP) if I do not want it?

   Currently, deleting DPS is not allowed.

4. How to choose the duty cycle for the mist level?

   It is recommended to set the duty cycle to 100, 80, and 60 for high, medium, and low levels respectively. You can choose the correct duty cycle according to the spray volume and the heating effect of the atomizer disc.

5. Can I add more features for buttons or lights?

   Currently, only configurable items can be added. More features might be available in the future according to the market requirements.
