Ubiquiti UniFi Access Hub IP Networked Door Controller

Product Usage Instructions

Unboxing and Inspection

- When you receive the Access Door Hub, carefully unbox it and inspect it for visible damage.
- If any damage is found, contact customer support immediately.

Mounting the Hub

- Choose a suitable location near your access door to mount the hub securely.
- Use the provided screws and mounting hardware to attach the hub to the wall or door frame.
- Plug the power adapter into a suitable power outlet and connect it to the Access Door Hub.
- Ensure a stable power supply for proper functioning.

Network Connection

- Connect the Access Door Hub to your Wi-Fi network following the instructions provided in the manual.
- A stable internet connection is required for remote access and monitoring.

Access Control Setup

- Follow the on-screen instructions on the hub's interface to set up access control features such as user permissions, entry codes, and schedules.
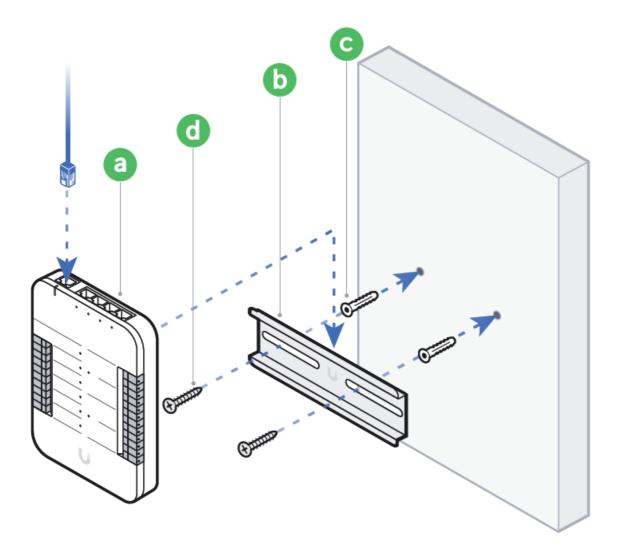

FAQ

- **Q: Can I install the Access Door Hub outdoors?**
  - **A:** The Access Door Hub is designed for indoor use only. It should not be exposed to outdoor elements to
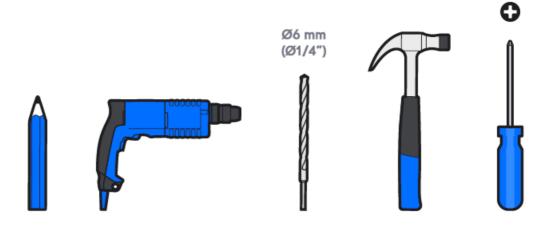

ensure proper functionality and longevity.

- **Q: How many users can be configured on the Access Door Hub?**
  - **A:** The number of users that can be configured may vary based on the model. Refer to the user manual for specific details on user limitations.
