Please read the instructions carefully and completely prior to use

CAUTION

1. **Do not** attempt to inflate during unusually strong wind. If it becomes too windy for safe operation, simply allow the unit to deflate, secure it, and await better weather conditions.
2. Always protect the electric fan and power cord from exposure to water.
3. If the external flexible cable or cord is damaged, please do not use. Any repair to the main connection cable must be done by a qualified technician.
4. **Do not** connect the chain to the supply while unit is in the packaging.
5. To reduce the risk of fire or shock, do not expose the unit to rain, moisture or dust. In addition, do not touch the unit if your hand is wet.
6. Place the unit on ground free from snow, dirt, wetness, leaves etc.
7. For safe positioning of the unit, it is necessary to use all included fixtures.

Trouble Shooting

If the motor is not working:

1. The power source is interrupted or the cord may be unplugged.
2. Debris may be lodged in the motor.
3. Ensure zipper is securely closed so air stays inside figure.

Cleaning, Storage And Maintenance Instructions

1. Only use mild detergent with cold water to wipe clean the figure.
2. Leave figure inflated until completely dry.
3. Unplug, roll up and store unit in original package or similar size box.
4. **Do not** clean the motor. not intended for use by children
5. If not happy or have any problem with this purchase, please contact with us Our Email: (**appletreefish@outlook.com**),
