Conceptual Design of a Wristband

Initial Use of the Wristband :

1. Please connect the charging cable to the wristband to initiate charging; the wristband will power on automatically.
2. For optimal wear, position the wristband behind the ulnar styloid process. Adjust the fit to your wrist size using the adjustment holes and secure it with the clasp.

Device Connection

1. APP Download: Scan the QR code or visit the APP Store, Google Play, or Tencent MyApp to search for "FitPro," download, and install the APP.

Android/IOS

https://fitpro.jusonsmart.com/public/fitpro_download.html
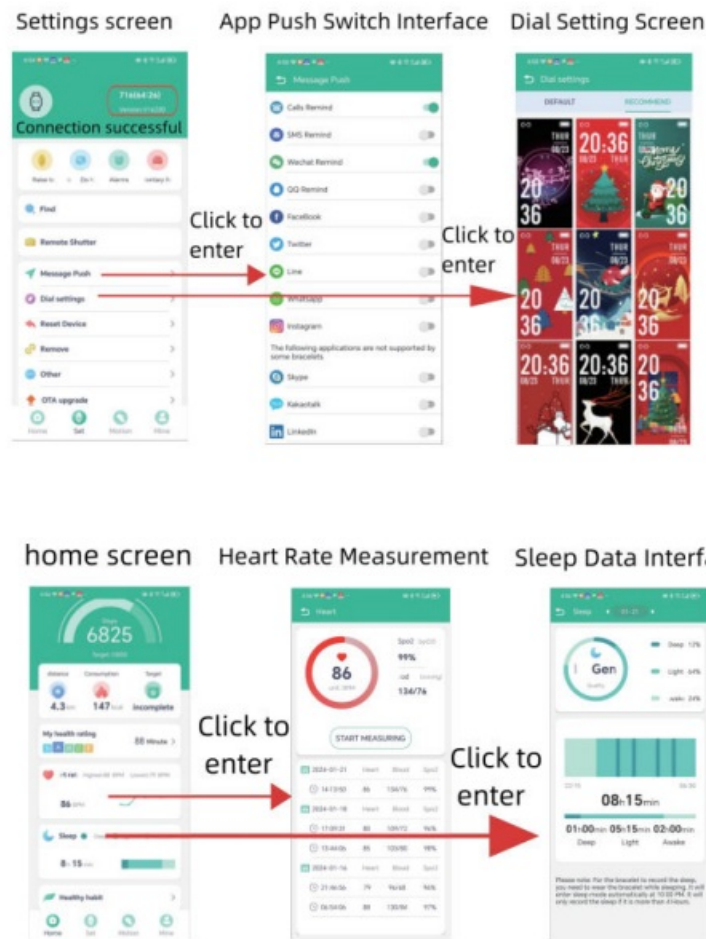

2.1. Device Connection

a. For initial use, it's necessary to connect to the APP for calibration. Upon successful connection, the wristband will automatically synchronize the time.

b. Binding Device Instructions: Turn on the smartphone's Bluetooth, navigate to the APP's "Settings" option → click on "Bind Device to Experience More Features"→ proceed to search for nearby wristband Bluetooth devices, find and select the M8mini to connect to the wristband. Once paired successfully, the APP will automatically save the wristband's Bluetooth address. Whether the APP is open or runnin? in the background, it will automatically search for and connect to the wristband.

Wristband Feature Description

1. When the device is powered off, pressing and holding the touch function button for more than 3 seconds will power on the device.

2. Introduction to the Wristband Interface Features

Main Features of the APP

Settings screen   App Push Switch Interface   Dial Setting Screen

Click to enter

Click to enter

home screen   Heart Rate Measurement   Sleep Data Interface

Click to enter

Click to enter

Note:

1. For Android users, to utilize the reminder feature, it's necessary to allow the "FitPro" app to run in the background. It's recommended to add "FitPro" to the trusted adpps list in the permission management and enable all permissions.

2. Regarding sleep data: Sleep data will only be recorded if you wear the wristband to sleep, with monitoring starting from 10 PM. Sleep data can be synchronized to the APP while sleeping, typically after 3-4 hours of sleep.

3. About the weather feature: Once the APP is successfully connected, the wristband can access current weather data. Please ensure the smartphone's location services are enabled while connected to the APP.

4. Call reminder feature: When connected, the APP's call reminder feature is activated, displaying the caller's name or number (requires granting the APP access to the contacts).

Disclaimer

Warning: This product is not a medical device. The wristband and its application should not be used for diagnosis, treatment, or revention of any diseases or conditions.
