SD Reader Troubleshooting

1. **Can't Read My Cards:**

   a. Check if the otg setting is enabled.

   b. Check if the sd card is healthy, or try a different SD card.

   c. Check if the card file format is FAT32/EXFAT instead of NTFS.

   d. Try another phone or laptop.

   e. If you're using an iPad Pro 2018, check if the pic is camera RAW format (e.g. *.CR2 for Canon / *. NEF for Nikon) and saved in a folder exact same as the original camera folder.

TF/Mciro:			SD:			
MicroSD	MicroSDHC	MicroSDXC	SD Card	SDHC	SDXC	RS-MMC

2. **Failed to Transfer Large Files:**

   a. Try to format the SD/Micro SD cards to the right format for your devices. (*Back up your files first)

   b. Recommend using MS-DOS(FAT) for 32GB or smaller cards, and exFAT for 64GB cards.

3. **My Card Got Stuck/ Slot is Too Tight:**

   a. Please make sure to insert the card correctly.

   b. Use a tweezer to remove it first, then try to insert this card to another standard card slot, see if it gets stuck.

   c. If not suck, the spring-loaded mechanism must be fails, please contact us via

   support@uniaccessories.com for a free replacement.
