### Frequently Asked Questions

Q: Is this hub compatible with charging?

A: Please note this USB hub 3.0's main function is USB Splitter USB Hub for very stable, fast data transfer up to 5Gbps and tested actually. And it is compatible with 4\*1TB hard drives simultaneously. Charging is an additional feature. It only supports 5V@1A charging or less than that. So we don't recommend using it to charge your devices. It does not support fast charging since it's designed as a data hub, not a QC power adapter. We hope this can solve your problem. Please feel free to email us if there are still any questions!

Q: Can I use four ports simultaneously?

A: Certainly, the only thing you have to know is the total current must be less than 900mA.

Q: Why is my mouse unstable and lag when using the product?

A: It is an unusual situation. Please see the following steps. 1. Check the compatibility of your device based on our compatible list. 2. Make sure your USB devices are working normally by connecting other USB devices. 3. The total current of all devices has to be less than 900mA. 4. Please connect it to other USB ports on your devices or restart your device. If your problem remains unsolved, please contact us through [support@uniaccessories.com](mailto:support@uniaccessories.com).

Q: What kind of guarantee is provided for this product?

A: We offer an 18-monthly guarantee for all our products. Please contact us through [support@uniaccessories.com](mailto:support@uniaccessories.com) if you have any problems. Our 7 24 customer service will solve your problem within 24 hours.
