Welcome

We have automated the Network Access Permit (NAP) process and there are 5 key items to note:

1. NAP applications are now made through the Developer Portal.
2. NAP fees are required to be paid prior to assessment of the NAP application.
3. Shut plan and/or flow control fees (if applicable) will be advised depending on the complexity of the plan/s.
4. Meter information (Water only) must be provided with the Network access permit application.
5. Network access permit and/or a shut plan will not be issued unless Infrastructure Charges are paid in full.

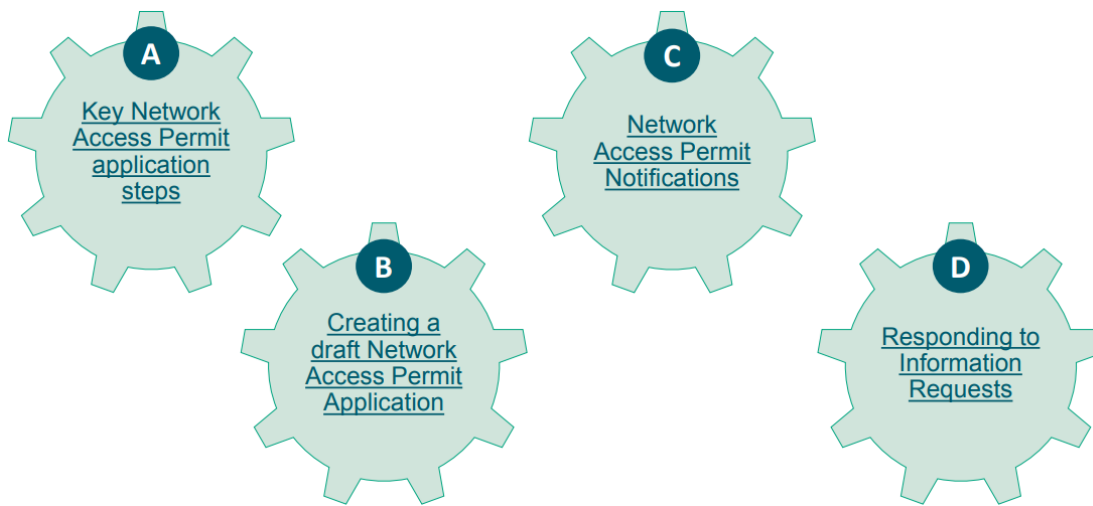

Note 1: you cannot edit a NAP application once you have submitted it.

Note 2: Email development.permit@urbanutilities.com.au if you need to make any changes or have any questions

Note 3: You will be notified via an Information Requests if Urban Utilities needs further information during assessing your NAP application

QUICK REFERENCE GUIDE TOPICS

Note: Click on the gear to take you directly to relevant section.

Note: Click on the process steps to take you directly to relevant section.

HOW TO CREATE A NAP APPLICATION

- To submit a NAP application, you must be the Endorsed Consultant or the Consulting Engineer for the related Water Approval.
- The NAP application button will appear in the Construction stage of a Non-Standard Application.
- If a Complex is required, then the NAP application button will also appear from the Design Assessment Stage and will be a requirement of the overall Design Approval process (Major works).
- A NAP must be completed before live works is executed.
- Not having the appropriate NAP and or associated Shut Plan for construction works could cause delays to process or penalties.
- If you have more than one NAP application per NonStandard application, they can be found under the NAP tab of your application.

Application 23-PNT-56302

Record Type: Non Standard Connection - Minor Works

Stage: Construction

Initial Submission Date: 8/9/2023

Last Customer Response Date: 0

Information Request External Action Flag: 0

Buttons: Network Access Permit Application, Construction Steps Complete, Request Extension of Currency, Request an Amendment to Decision Notice, Request Design Variation

Progress Bar: Construct, Ascon Sa..., Comple..., Complian..., Issuing C..., Maintena..., End of Ma..., Complete, Refused, Cancelled

To progress your application to the next stage, please follow the below steps:

- Apply for your Network Access Permit (NAP) by pressing the Network Access Permit Application button above
- You must register your works by emailing development.audit@urbanutilities.com.au your Construction and Live Works dates as per the template requirements in the [Minor Works Guidelines](#)
- You must register your works for both Water and Sewer if applicable to your Water Approval. You will not be able to officially submit an As-constructed certification package unless all works are registered
- When you have completed all construction, restoration and Quality Assurance documentation and are ready to submit your As-Constructed Certification package, click the 'Construction Steps Completed' button above to progress to the next stage.

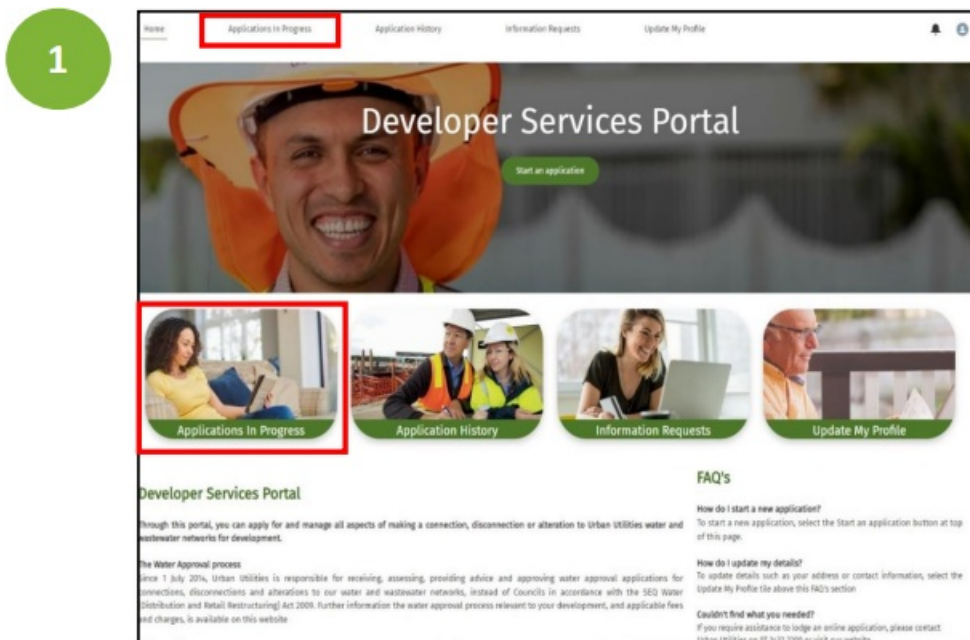

Outstanding Fees

Home Applications in Progress Application History Information Requests Update My Profile

Apply here for access to Urban Utilities' networks, including live works connections and preparation and approval of shut and flow control plans. Activities which may interfere with Urban Utilities' water and wastewater infrastructure are regulated by the Water Supply (Safety and Reliability) Act 2008.

Once the application is properly made your request will be acknowledged and the Network Access Permit will be issued within 10 business days. Note: where a flow control plan is required for access to wastewater infrastructure, it is recommended that the plan be submitted at least 20 business days before the planned commencement of live works.

To submit this application, you must be the Licensed Consultant (LC) or the Consulting Engineer (CE) for the related Water Approval. If you are not either of these roles, please request the LC or CE to log into the portal and submit this Network Access Permit.

The Network Access Permit Guidelines are available here: [Guidelines](#)

You may submit a Network Access Permit Application for either Water OR Wastewater. They must be applied for in separate applications.

Please contact development.permit@brisbaneidfiles.com.au if you have any questions throughout this process.

NOTES:

- A requirement of the Network Access Permit process is that any applicable Infrastructure Charges must be paid before the NAP is issued. You can still apply and we will process the application while ICH's outstanding - though we will not issue the NAP until the ICH is paid.
- A requirement of the Network Access Permit process is that new Meter Information must be provided. The meters will be associated to the existing lots at the time of the NAP application.
- Network Access Permit and associated isolation/shutdown creation (if applicable) processing fees will be levied upon submittal of application. Please refer to the Developer Services Price List on the website for pricing information.

Types of Network Access Permits

There are three (3) types of Network Access Permits:

Type	Description
Type 1	Permission to undertake work near, i.e. within 2 metres, of the Urban Utilities network with no disruption to the Urban Utilities infrastructure.
Type 2	Permission to access and/or alter the Urban Utilities network without interruption to water or sewer operation.
Type 3	Permission to access and/or alter the Urban Utilities network with an interruption to water operation.
Type 4	Water Meters will require a Water Shut Plan.
Type 5	Permission to access and/or alter the Urban Utilities network with an interruption to sewer operation.
Type 6	Water Meters will require a Sewer Flow Control Plan.

* Network Access Permit Application Ref:
* Permit Type Requested:
[Cancel](#) [Start](#)

Note: you can only submit one NAP Application for either Water or Wastewater. If you need both services, then you will need to submit one NAP for Water, and another NAP for Wastewater.

- Click the Start button

ADD CONTRACTOR INFORMATION

- NAP Contacts are required for all types of NAP Applications.
 - NAP Contacts are for the purpose for Urban Utilities to contact the responsible entities at the site where the live works is taking place.
 - NAP Contacts will NOT automatically receive any notifications or correspondence via the portal unless they are added as a contact in the Non-Standard application.
 - Adding a Contractor is mandatory for all types of Network Access Permit Application and only a single Contractor record can be added.
 - Adding a Principal Contractor is required only if there is a Principal Contractor on site.
 - What is the difference between a Contractor and a Principal Contractor?
 - Contractor: The person/entity performing the construction works. (Mandatory)
 - Principal Contractor: Work Health and Safety Regulation 2011.
- Note:** if there is a change of Contractor you must notify development.permit@urbanutilities.com.au

1. Contractor Information stage

- Read the help text for guidance on how to provide Contractor Information for your NAP Application.
- Click the Add button.

1

The screenshot shows the 'Contractor Information' tab in the application portal. It includes instructions on adding contractor details and a table for 'NAP Contacts'. The 'Add' button is highlighted with a red box.

2. Select either the Contractor or Principal Contractor option from the NAP Contact Type drop-down field

2

The screenshot shows the 'NAP Contact' pop-up form. The 'NAP Contact Type' dropdown menu is highlighted with a red box, showing 'Contractor' and 'Principal Contractor' options.

3. Adding Contractor

- Fill in the required fields for the Contractor information pop-up screen.

- Click the Save button.

3

The screenshot shows a web application interface with a top navigation bar containing 'Home', 'Applications in Progress', 'Application History', 'Information Requests', and 'Update My Profile'. Below this is a sub-navigation bar with 'Contractor Information', 'Connection Details', 'Meter Information', 'Supporting Documents', and 'Summary'. The main content area displays a 'NAP Contact' form. The form includes fields for 'Organization Name', 'First Name', 'Last Name', 'Phone', and 'Email'. Below these is a section for 'Qualifications - Licensing Information' with checkboxes for 'Plumbing/Drainage License', 'Ductile Iron', 'Rigid Steel', 'PVC', and 'Other License'. At the bottom of the form, there are 'Cancel' and 'Save' buttons. The 'Save' button is highlighted with a red rectangle.

4. Adding Principal Contractor

- Fill in the required fields for the Principal Contractor information pop-up screen.
- Click the Save button.

4

This screenshot is identical to the one above, showing the 'NAP Contact' form with the 'Save' button highlighted by a red rectangle. It displays the same navigation bars and form fields as the previous image.

5. Edit a NAP Contact

1. Click the Edit button next to the Contact record you want to edit.
2. Edit relevant information in the Edit NAP Contact pop-up window and then click the Save button.

Contractor Information Connection Details Water Information Supporting Documents Summary

In this section you must add the contact details of Contractor performing the live works construction. If there is also a Principal Contractor for the site you are also required to add them. Then you can add as many additional contacts as required to be informed of Network Access Permit application.

NOTE: Contacts already in the Water Approval application will also be notified of Network Access Permit process so there is no need to add again.

- CONTRACTOR (The person/entity performing the construction works) - this is mandatory
- PRINCIPAL CONTRACTOR (Non health and safety Regulation 2011) - Optional

IMPORTANT NOTE: The contacts advised here are for the purpose of the Network Access Permit as Urban Utilities know who to call if there is a question or concern related to the works when live works is occurring. For the purpose of communication to you during the Network Access Permit Application process we will be communicating via information relevant to the Contacts on the Water Approval Application. Please take some time to check the contacts on the Water Approval Application to ensure you are communicating with the right contact. You may elect to add the Contractor or others to the Water Approval if you desire.

ADD CONNECTION DETAILS

- Connection Details are required for all Type 2 and Type 3 Network Access Permit Applications (Water and Wastewater).
- It is important to get accurate information that matches designs. Wrong information will cause delays.
- We will process and charge one Shut Plan per NAP.
- If you have connections in largely different locations requiring different shut plans, then a separate NAP is required.

1. Connection Details stage

- Read the help text for guidance on how to add Connection Details to your NAP Application.
- On the Connection Details screen, click the Add button to proceed.

1

Home Applications In Progress Application History Information Requests Update My Profile

✓ Connection Details Meter Information Supporting Documents Summary

Connections can be "grouped" by general location if it is anticipated that they will be covered by ONE Isolation/Shut Plan. If connections are in different locations/addresses there must be a separate Network Access Permit, NAP applied for.

Examples of how to structure and complete NAP & Connection details in applications

- New DN150 connection to existing UU Network main - ONE x NAP application and ONE connection detail
- New DN150 connection with an additional Fire Hydrant to UU Network Main in same general location - ONE x NAP application with TWO connection details
- New DN150 connection with an additional Fire Hydrant and 32mm connection in same general location - ONE x NAP application with THREE connection details
- Multiple same size (ie DN150) live tapped property connections to an existing UU Network Main - ONE x NAP application and ONE connection - with notes in WORKSCOPE to detail quantity.
- Development with one connection on X Street and another connection on Y Street - TWO x NAP applications with ONE connection detail per application.
- Multi Stage development with multiple connections in different locations/addresses - Multiple NAP applications with ONE connection per application AND Include reference to the Stage Water Approval reference being connected to.

The address selected in Connection Details should be the actual location of the connection and may differ from the address on the Water Approval Decision Notice. If there is no documented address then please upload a document to this portal with 'mudmap' location details.

Please add details in the WORKSCOPE field of the Connection Details to provide clarifying information. The more information we receive to clarify your objectives the more efficient and timely the processing timeframe.

NOTE: If you are requesting connection to Trunk Infrastructure (>DN 300) - There may be a requirement for Network Investigations, logging, data review, customer and environmental impact assessments to collate the required information to create an isolation plan. This will necessitate greater assessment and review timeframes (possibly 1-3 months) and additional cost - Please detail your connection request and we will be in contact to progress the application and investigation process.

ADD METER INFORMATION

- Prior to July 2023, Meter information was normally provided at the Compliance Stage via the Meter PDF form. Now you will need to provide Meter information at the NAP stage with the NAP application. It will need to be re-validated at the Compliance stage to record any changes that has taken place.
- Meter Information is only required for Water NAP applications.
- All Meter information can be found under the Meter Tab in the Application tab menu.
- Include the current address and future lot number.

1. Meter Information stage

- Read the help text for guidance on how to add Metering Information to your NAP Application.
- Click the Add button to add Metering Information for your application.

Please detail all new meters being installed or re-used as part of this connection.

If you are detailing multiple meters you can use the CLONE feature below to replicate entry data. Please make sure Meter Serial Numbers are changed when using CLONE feature.

Meters must be assigned to the applicable address at the time of connection.

Meter	Direct	Meter	Lot No.	Plan No.	Meter	Install	Meter	Meter	Meter	Meter	Sewer
No Records Found

2. Fill the required fields (shown with a red asterisk) in the Add Record pop-up window.

- Click the Save button.

2

3. Add, Clone, Edit or Delete record

1. You can add multiple Meter Details. Simply click on the Add button and repeat the process in step 2

OR

2. You can clone a record which allows you to replicate an existing Meter Information record and change items such as the Serial Number. Click the Clone button and update the Clone Record pop-up window, then click the Save button.

Note: The Serial Number on each Meter Information record must be unique.

3

3. To edit any of the Meter Information you have added, click the Edit button next to the Meter Information record you want to edit.

4. To delete any of the Meter Information you have added, click the Delete button next to Meter Information record to remove.

4. Ready to progress

1. Click the Previous button to return to the Connection Details screen.
2. Click the Next button to continue with your NAP application.
3. Click the Save and Exit button to save your NAP application as a draft and return to it at a later time.

4

ADD SUPPORTING DOCUMENTS

- Add all supporting documents to the NAP application.

1. Supporting Documents stage

- Read the help text for guidance on relevant documents to upload to support your Network Access Permit Application.

1

Home Applications in Progress Application History Information Requests Update My Profile

Supporting Documents Summary

GENERAL NOTES

The following questions relate to the documents required to process the NAP application. At this stage your certified and/or approved designs should already be uploaded to the Developer Portal.

- Is the latest certified / approved design and issued For Construction drawings uploaded to the Developer Portal
- Are the connection details included on the drawing and numbered to match the Connection Details in this NAP application
- Is the locality plan shown on the drawing

If you answered No to any of the above - please review and amend drawings and/or designs accordingly and upload here. Your NAP application may be delayed or rejected if information is missing.

MAJOR WORKS - MULTI STAGE DEVELOPMENT NOTES

If connecting to prior stages please provide a drawing of stage scheduling and status (live, construction, on maintenance, off maintenance) of prior stage.

If the preceding stage has not had a Connection Certificate issued - this application may be rejected.

If there is an applicable Live works commissioning plan please attach

PAY NAP APPLICATION FEES

- Assessing and Processing NAP applications will only start once application fees are paid.
- Once you submit your NAP application, there will be NAP Fee(s) to pay before Urban Utilities can assess your Application.
- 'We will process NAP applications and if applicable associated shut plans but will not issue them if Infrastructure Charges are not paid.

Automatically applied Network Access Permit Fees – Type 1 and Type 2 NAPs

- Fees are applied automatically on submission of the Network Access Permit based on the details of your NAP. These fee's are for the NAP only as they do not include Shut Plan fees

Automatically applied Network Access Permit Fees – Type 3 NAPs

- Fees are applied automatically on submission of the Network Access Permit based on the details of your Network Access Permit. For a Type 3 NAP the fee will include a NAP Fee and a Simple Shut Plan fee.
- If the Shut Plan is assessed as being Complex or if a Flow Control Plan is required a second fee will be applied for the Complex Shut Plan (less the original Shut Plan Fee paid).
- If multiple Shut Plans are required you may be asked to submit a separate NAP or charged accordingly

for the additional Shut Plan

Manually applied Network Access Permit Fees

- Complex Water Isolation Plan – Fees are applied manually following assessment of the NAP.
- Wastewater Flow Control Plan – Fees are applied manually following assessment of the NAP.
- You can pay the NAP application fees via the portal, or download the charge notice from the documents tab of your Non-Standard application.
- From your Non-Standard Application, there will be an outstanding amount of fees to be paid for your Network Access Permit Application.
- Click the Pay My Application Fees button to pay the fees via the portal.

1a

The screenshot shows a web application interface for a Network Access Permit (NAP) application. At the top, there are tabs for 'Applications in Progress', 'Application History', 'Information Requests', and 'Update My Profile'. The main content area displays application details for '23-PNT-56302', including 'Record Type: Non Standard Connection - Minor Works', 'Stage: Construction', 'Initial Submission Date: 8/6/2023', 'Last Customer Response Date: 0', and 'Information Request External Action Flag: 0'. Below this, there are buttons for 'Network Access Permit Application', 'Construction Steps Complete', 'Request Extension of Currency', 'Request an Amendment to Decision Notice', and 'Request Design Variation'. A progress bar shows the current stage as 'Construct...'. A red box highlights the 'Outstanding Fees' section, which states 'Outstanding amount for this application: \$235.00' and includes a 'Pay My Application Fees' button. The bottom navigation bar includes links for 'Details', 'Application Contacts', 'Addresses', 'Documents', 'Fees', 'Information Requests', 'NAP', 'Meter', 'Audits', and 'More'.

- Check the payment amount on the Pay Application Fees pop-up window and click the Make Payment button.
- Add relevant credit card information and click the NEXT> button.

1b

The screenshot shows two overlapping windows. The top window is a 'Pay Application Fees' pop-up with a title bar and a close button. It contains instructions: 'To make a payment for your application, please enter your payment amount below, then click the Pay Now button at the bottom of this page. Once you click this, you will be routed to our online payment gateway. If you enter an amount greater than your outstanding amount, an error will be displayed. If you make a partial payment, your payment will be deducted from your fees in an order of oldest to newest.' It shows 'Total fee amount: \$235.00' and a 'Payment amount' field with '\$235.00' entered. There are 'Cancel' and 'Make Payment' buttons. The bottom window is a credit card payment form with a 'bSPPOINT' logo. It displays 'Reference Number: 81010000062200', 'Amount: AUD: \$35.68', and 'Accepted Cards: Surcharge may apply'. It includes fields for 'Card number', 'Expiry date', 'CVN', 'Surcharge Amount', and 'Total Amount (inc. surcharge)'. A red box highlights the card details section, and an orange 'NEXT >' button is at the bottom.

- To pay via alternative means, download the Charge Notice via the NonStandard Application.
- Click on the Documents tab.
- Click on the relevant download icon.

NETWORK ACCESS PERMIT NOTIFICATIONS

- There are 3 key email notifications during the NAP application process.
- When your NAP is submitted, the payment of fees is now required
 - This notification is sent when you submit the NAP Application via the portal and is sent to the Application Contacts on the Non-Standard application.

Dear NAP Applicant,

In order to progress your Network Access Permit application, payment of fees is now required.

To pay, log into your [Development Services Portal](#) account and click on 'In Progress Applications' to identify any applications with fees awaiting payment.

A Tax Invoice/Receipt will be issued following payment.

Once paid, your Network Access Permit request will be assessed by our Development Permits Team.

NOTE: If your Network Access Permit request is assessed as requiring complex analysis (Water Shutplan or Wastewater Flow Control Plan) there could be additional fee's applied. Examples of applications requiring additional fee's - Network analysis, data modelling, data field logging, rezoning, trunk connections, no GIS, involving complex assets (reservoirs, sewer pump stations, water boosters, PRV's)) We will advise if required.

Below are our estimated Network Access Permit Type processing times (All processing times are independent of waiting time for fee's to be paid or Information Requests to be resolved):

Type 1 - 10 Business Days

Type 2 - 10 Business Days

Type 3 (Water) - 10 Business Days

Type 3 (Sewer Flow Control Plan) - 15 Business Days

Type 3 (Complex Water) - Up to 3 months

Our Development Permits Team will be in contact should we require more information. We will issue an Information Request in the Developer Portal - We will be communicating with the Contacts on the Water Approval application - Please ensure CONTACTS are up to date.

Please note that your Network Access Permit and/or isolation plan will NOT be issued if your infrastructure charges (if applicable) have not been paid.

For enquiries regarding your ICN's please contact our Development Enquiries team on DevelopmentEnquiries@urbanutilities.com.au or call us on 07 3432 2200

For enquiries regarding your Network Access Permit Application or any part of the process - Please contact our Development Permits Team on DevelopmentPermits@urbanutilities.com.au

Kind regards,

Urban Utilities Developer Services Team

- When NAP fees have been paid
 - This notification is sent when you pay your NAP Application and is sent to the Application Contacts on the Non-Standard application.

Dear Applicant,

Thank you for your payment.

To access your application Non Standard Connection - Major Works and the tax invoice any time, log in to your [Developer Services Portal](#) account.

Kind regards,

Urban Utilities Developer Services Team

3. When a NAP is issued

- This notification is sent when a NAP is issued by a Urban Utilities team member via the portal and is sent to the Application Contacts on the Non-Standard application.

Dear NAP Applicant,

PLEASE NOTE: If your works have been identified as Major Works, as such you should have already had at least one site visit with an Assurance Officer. If you have NOT please contact development_audit@urbanutilities.com.au to arrange for a Pre-start meeting.

Please find via the portal link your approved Network Access Permit (NAP), Installation Method Control Plan (if applicable) and any associated documents.

You are responsible for complying with all conditions associated with this permit and any additional documents. If you have read the guideline documents in the links below and still require clarification, please do not hesitate to contact Development Permits.

IMPORTANT NOTE FOR LIVE TAP (if applicable) – AN URBAN UTILITIES FIELD ASSURANCE OFFICER MUST BE PRESENT WHEN LIVE WORKS OCCUR

WHAT'S NEXT?

For more information on what to do next, please refer to our Network Access Permit Guideline and Minor/Major Works Construction and Compliance Guideline, which can be found [here](#) and [here](#).

For New Control Plans only - If your New Control Plan requires access to or isolation of an Urban Utilities sewerage pumping station, please forward your request to Network Access at networkaccess@urbanutilities.com.au

MINOR WORKS – MANDATORY REGISTRATION OF YOUR SITE WORKS

You must register your site works with Development Audit by email to development_audit@urbanutilities.com.au at least 2 business days prior to any works commencing using the following template:

If this project has been conditioned as Minor Works, attendance at the site will be at the discretion of the assigned Assurance Officer.

You will not be able to upload Associated Certification Package and Compliance information to the Developer Portal if Minor Works are not registered with the Development Audit team.

Audit Type: **Minor Works**

- Expected start and end dates for work:
- Expected **Live Works Date**:
- Description of works:
- Valid Approved Network Access Permit:
- Contractor Name:
- Contractor Phone Number:
- Contractor Email:
- Engineer Name:
- Engineer Phone Number:
- Engineer Email:
- Stage number (if applicable):
- Estate name (if applicable):
- Application Reference Number (Developer Services Application Portal): e.g. 22-PNT-0000X
- Number of customers notified, as well as attaching a copy of the completed outage notification

You must book your live works audit with Development Audit by email to development_audit@urbanutilities.com.au at least 2 business days prior to any live works commencing using the following template:

Audit Type: **Live Works**

- Expected start and end dates for work:
- Expected **Live Works Date**:
- Description of works:
- Valid Approved Network Access Permit:
- Contractor Name:
- Contractor Phone Number:
- Contractor Email:
- Engineer Name:
- Engineer Phone Number:
- Engineer Email:
- Stage number (if applicable):
- Estate name (if applicable):
- Application Reference Number (Developer Services Application Portal): e.g. 22-PNT-0000X
- Number of customers notified, as well as attaching a copy of the completed outage notification

PLEASE NOTE:

If you are to book and have performed the required field audits may mean we are unable to provide a Connection Certificate to finalise these works.

- Take note of the 'Proposed Finish Date' (expiry date) of your Network Access Permit. Permits are normally valid for six months. If you require a permit extension, please email your request to development_permits@urbanutilities.com.au

Kind regards,

Urban Utilities Developer Services Team

HOW DO I RESPOND TO AN INFORMATION REQUEST?

- You will receive an email notification.
- Log into the portal and action the information request.
- You will receive an email notification.
- Log into the portal and click on the Information Requests tab.
- Select the Info Request hyperlin

1

Dear Applicant,

Following review, the Non-standard connection application lodged with Urban Utilities cannot progress past the current stage due to incomplete information.

Please provide one consolidated response by logging into your [Developer Services Portal](#) account, selecting 'Information Requests' and completing the response process. The application will progress once we have received the complete and correct information.

You may attach documents to support your response if required by uploading documents within the Information Request.

If the information requested is not provided via the Developer Services Portal within 20 business days, the application cannot be accepted in accordance with statutory obligations and your application will be cancelled and fees forfeited.

Kind regards,
Urban Utilities Developer Services Team
