## UReach Intelligent 9 U3 Series USB Duplicator

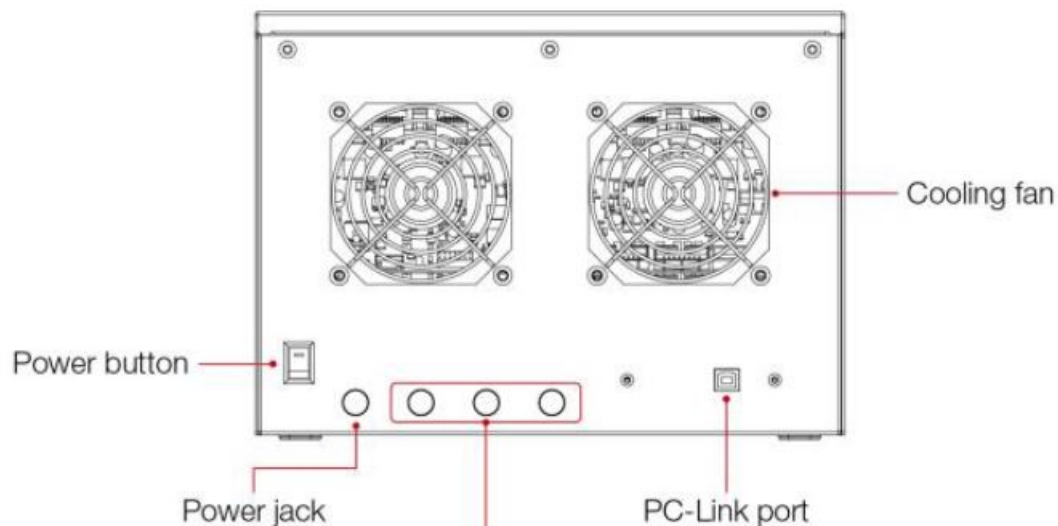

## PRODUCT DIAGRAM

- Verity the Source device as qualified and functional
- Use of source and target devices with the same capacity is recommended.
- Use of the Copy+Compare function is recommended for verifying data correctness.
- **DO NOT** power off the machine during the firmware upgrade process.

## FRONT

## BACK

Additional Power jacks for use with USB-HDDs on duplicators with 16 or more ports.

## HOW TO START DUPLICATION?

You need to prepare the following items

1. Clean working environment with good ventilation

2. A quality source drive

SOURCE

3. A few quality target drives

TARGET

1

Connect the Power Cable and Switch on.

2

Check Copy Settings before Copying.

3

Insert the Source Drive in the First Port

4

Insert the Target Drives to other Available Ports

\* Use of source and targets with the same capacity is strongly suggested \*

5

Press "OK" to Start Copying

6

Task results are displayed. Copy Completed!
