SETTING UP

Connect to a Power Outlet

Plug the AC adapter to the AC charging port on the VAIO computer and connect the AC adapter and a power outlet with the supplied power cord.

- Even when you do not intend to use your VAIO computer for an extended period of time, connect it to a power outlet at least every three months and charge the battery to around 50% of capacity. If the computer is kept unplugged from a power outlet for an extended period of time, the battery voltage will drop due to self-discharge to trigger the safety function and the battery may become unavailable for use. The time period before the safety function is triggered varies depending on the ambient temperature.

Turn On Your VAIO Computer

Lift the LCD screen lid and press the  power button on the computer.

Notes

- When lifting the LCD screen lid, do not grasp the area around the camera as it will cause malfunctions.
- Do not turn off your VAIO computer before the Windows Setup window appears.

Set Up Windows (Initial Setup)

Follow the instructions displayed on the Windows Setup window to make initial settings.

Note Please refer to Windows Help or Microsoft's website for more details.

Tips

Connect to the Internet

With your VAIO computer, you can connect to the Internet either via a Wi-Fi (wireless LAN) or wired LAN network. Before connecting to the Internet, you need to select a connection service, make a contract with an Internet service provider accordingly, and make the Internet connection settings on the computer. For detailed information on the Internet connection settings and required network devices, refer to the manual from your service provider and the manual that came with your device. Establishing a successful connection to the Internet completes Windows license authentication.

Connecting via a Wi-Fi network

1. Select  (start).. (Settings). Network & Internet, and Wi-Fi. and then set Wi-Fi to On.
2. Select Show available networks.

3. Select the desired Wi-Fi access point, and then select Connect.

Connecting via a Wired LAN network

Plug one end of a LAN cable (not supplied) to the Ethernet port on your VAIO computer and the other to your modem/router.

Running Windows Update

Select **Start** > **Settings** > **Windows Update**, and then follow the on-screen instructions to update the Windows.

Updating VAIO original software

To update VAIO original software, visit our VAIO support website at the following URL, download update programs, and then install them on your VAIO computer. <https://www.usa.vaio.com/>

Creating your own recovery media

Your VAIO computer does not come with any recovery media. Be sure to create your own recovery media with a USB flash drive before you first use the computer following your purchase. For more information, refer to the Safety Guide/ Recovery and Troubleshooting Guide.

Always be sure to use the AC adapter to connect your VAIO computer to a power outlet before doing a recovery.

Turning off or placing your VAIO computer into Steep mode

Upon completion of the Windows setup, select **Start** > **Power**, and then **Shut down** or **Steep**.

USING THE FINGERPRINT SENSOR

Notes

- The fingerprint authentication technology does not assure complete verification of personal identity, nor do they guarantee absolute protection of your data and hardware. VPU Company assumes no liabilities arising out of your use of or inability to use the fingerprint sensor.
- The fingerprint recognition rate varies depending on your use of the fingerprint Sensor. They are not consistent among individuals as well.
- Keep the fingerprint sensor clean to prevent failures or malfunctions.
- Please be aware that your enrolled data for fingerprint authentication and face recognition may be erased in the course of repair work to your VAIO computer.
- When you enroll fingerprints, be sure to enroll more than one finger, in case of injuries.
- Depending on the state of your fingerprint or your use of the fingerprint sensor, enrollment or authentication of the fingerprint may fail. When fingerprint authentication fails, try the following: – Use another finger. – Clean the finger. – Delete the fingerprint already enrolled, and then enroll it once again.
- During a dry season, such as winter, be sure to touch a metal object to discharge static electricity from your body before scanning your fingerprint. Static electricity may cause malfunctions of the fingerprint sensor.
