PACKING LIST

C751 Headset

Carrying Bag

3.5mm Audio Cable

Type-C Cable

User Manual

Airline Adapter for
C751 Headset

PRODUCT OVERVIEW

|	
1. Type-C Connector	6. Volume -(long press)/
2. Charging Indicator	7. Next(short press)
3. Power On/Off	8. Pairing Indicator
4. ANC On/Off	9. Multi-function Button
5. Volume +(long press)/ Previous(short press)	10. 3.5mm Audio Jack ED Microphone

CHARGE

Please charge the headset at your first use.
Step 1: Connect one end of the Type-C Cable to the Type-C Connector on the headset.
Step 2: Connect the other end of the Type-C Cable to a compatible adapter, then plug the adapter into a socket.
Charging Indicator
Charging: Solid White
Fully Charged: Off Low
Battery: Flash Red

**Tips:**

1. It takes about 3 hours to reach a full charge.

2. It's recommended to charge the headset in the power-off state.

3. When the battery of the headset gets low, the Charging Indicator will flash red and you will hear "Low Battery" from it.

POWER ON/OFF
Power On
Push the Power On/Off button upward to power on the headset, and you will hear "Power On. Pairing" from it.

Power Off

To power the headset off, push the Power On/Off button downward; or it will automatically power off when it's not connected with any Bluetooth device within 5 minutes.

CONNECT WITH A MOBILE DEVICE

Wireless Connection
Connect

Step 1: After you power on the headset, the Pairing Indicator will quickly flash red and blue alternately, which means the headset is ready to be paired with your mobile device.

Step 2: Turn on the Bluetooth of your mobile device, then connect to Vankyo C751 from the searching list.

Step 3: After connection, you will hear "Connected" from the headset and the Pairing Indicator will always flash blue.

💡**Tips:**

1. Please connect the headset with your mobile device within 5 minutes.

2. If you power off the headset, it will automatically connect with the last mobile device when you power on again.

Disconnect
Go to the Bluetooth interface of your mobile device, select Vankyo C751, and Disconnect/Unpair to disconnect the headset. You will hear a voice prompt of "Disconnected. Pairing".
Simultaneously connect to two mobile devices
This headset is able to connect to two mobile devices with Bluetooth. With this function, you will not miss the call on one mobile device when you are listening to music on another mobile device with the headset.
Step 1: Connect the headset with the first mobile device via Bluetooth.
Step 2: Disconnect the headset with the first mobile device.
Step 3: Connect the headset with the second mobile device via Bluetooth.
Step 4: Disconnect the headset with the second mobile device.
Step 5: Go to the Bluetooth list of both mobile devices to search Vankyo C751, then connect it on both mobile devices.

When you are using the headset to listen to the music from the first mobile device, if there is a call from the second mobile device, you can hear the ringtone from the headset and answer that call.
💡**Tip:**

If both devices are connected to this headset before, you can directly go to the Bluetooth list of both mobile devices to connect with it.

Wired Connection
Step 1: Plug one end of the 3.5mm Audio Cable into the headset.
Step 2: Plug the other end of the 3.5mm Audio Cable into the Audio Jack of your mobile device.

Tip:
The Airline Adapter for Headset will be needed when you are in an airplane.

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help. This equipment complies with FCC radiation

exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. ISEDC Warning This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS =
--- The symbol indicates DC voltage
