## Contents of Package

1. Mouse
2. 4K Wireless Dongle
3. Charging and Data Cable

## Setup

## Wired Mode

Connect the minuse to any USB porten your PC using the chararng cable

## Wireless Mode

Connect the 4k dongle (VXD02) through the cable to the computer.

## Mouse Features

1. Left Button
2. Right Button
3. Middle Button
4. Back Button
5. Forward Button
6. Bottom Button
7. Power Switch

## Specifications

DPA Settings: 400/800 1600/3200 dpi  
 Adjustable USE Report Rate: 1800 / 2000 / 4000 Hz  
 Adjustable Click Latency: 0.10 / 2.00 / 4.00 ms  
 Adjustable Competitive Mode: On / Off  
 Adjustable Motion Sync: On / Off  
 Battery Life: Up to 110 hours / Competitive Mode 38 hours (9K 34 hours / 4K 30 hours)  
 Charging Speed: From 0.00 in roughly 1.5 hours.  
 Weight: 65g  
 Sensor: PAW3950  
 Connector: USB-C  
 Buttons: 7 buttons  
 Cable Length: 2.2m (6.9ft)

## Recommended Usage Environment

For optimal wireless performance, use mouse within 20cm of Wireless Dongle and further than 2m from sources of 2.4GHz interference (such as Wi-Fi routers)

## Charging and Power LED Lights

Connect the USB cable to use it in wired mode  
Charging: Blue light blink in a cycle

Fully Charged:  
Blue light goes off

### LED Lights during Charging

Hold the Right Button (2)+ Nide Button (3) to splay e currnt charge v oftho mouss.

### Report Rate Adjustment

Hold the bottom button for 2 seconds, and the indicator will flash in cycles between DPYReport RataXcick Latency modes.

(Cycles through DPYReport Rate/Click Lavery)

Afver selecting ReportRate made (retease the bottorn button when switch to ReportRate mode}, the indicator light changes frarn flashing to steady Pressing the futon again at this point will cycle through the settings in the order of "4000Hz -> 2000Hz -> 1000Hz -> SOOH2".

## DPI Adjustment

Hold the bottom button for 2 seconds, and the indicator will flash in cycles between DPI/Report Rate/Click Latency modes.

(Cycles through DPV/Report Rata/Click Latency)

After selecting DPI mode {release the bottom button when switch to OPI mode}, the indicator light changes from flashing to steady. Pressing the button again at this point will cycle through the settings in the order of "Red -> Purple -> Blue => Green".

## Click Latency Adjustment

Hold the bottom button for 2 seconds, and the indicator will flash in cycles between DPI/Report Rate/Click Latency modes.

(Cycles through DPI/Report Rate/Click Latency)

After selecting Click Latency mode (release the bottom button when switch to Click Latency mode), the indicator light changes from flashing to steady.

Pressing the button again at this point will cycle through the settings in the order of "4ms (H) -> 2ms (M) -> 1ms (L)".

## Competitive Mode Adjustment

## Lift-off distance Adjustment

## Motion Sync Adjustment

## Displaying Mouse Status

## Regulatory

FCC Approved 

This device has been tested in accordance with the procedures and in compliance with Part 16 Subpart 6 of the FCC Rules, and it complies with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

FCC 15.21:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

15.19

This device complies with part 16 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

15.105:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

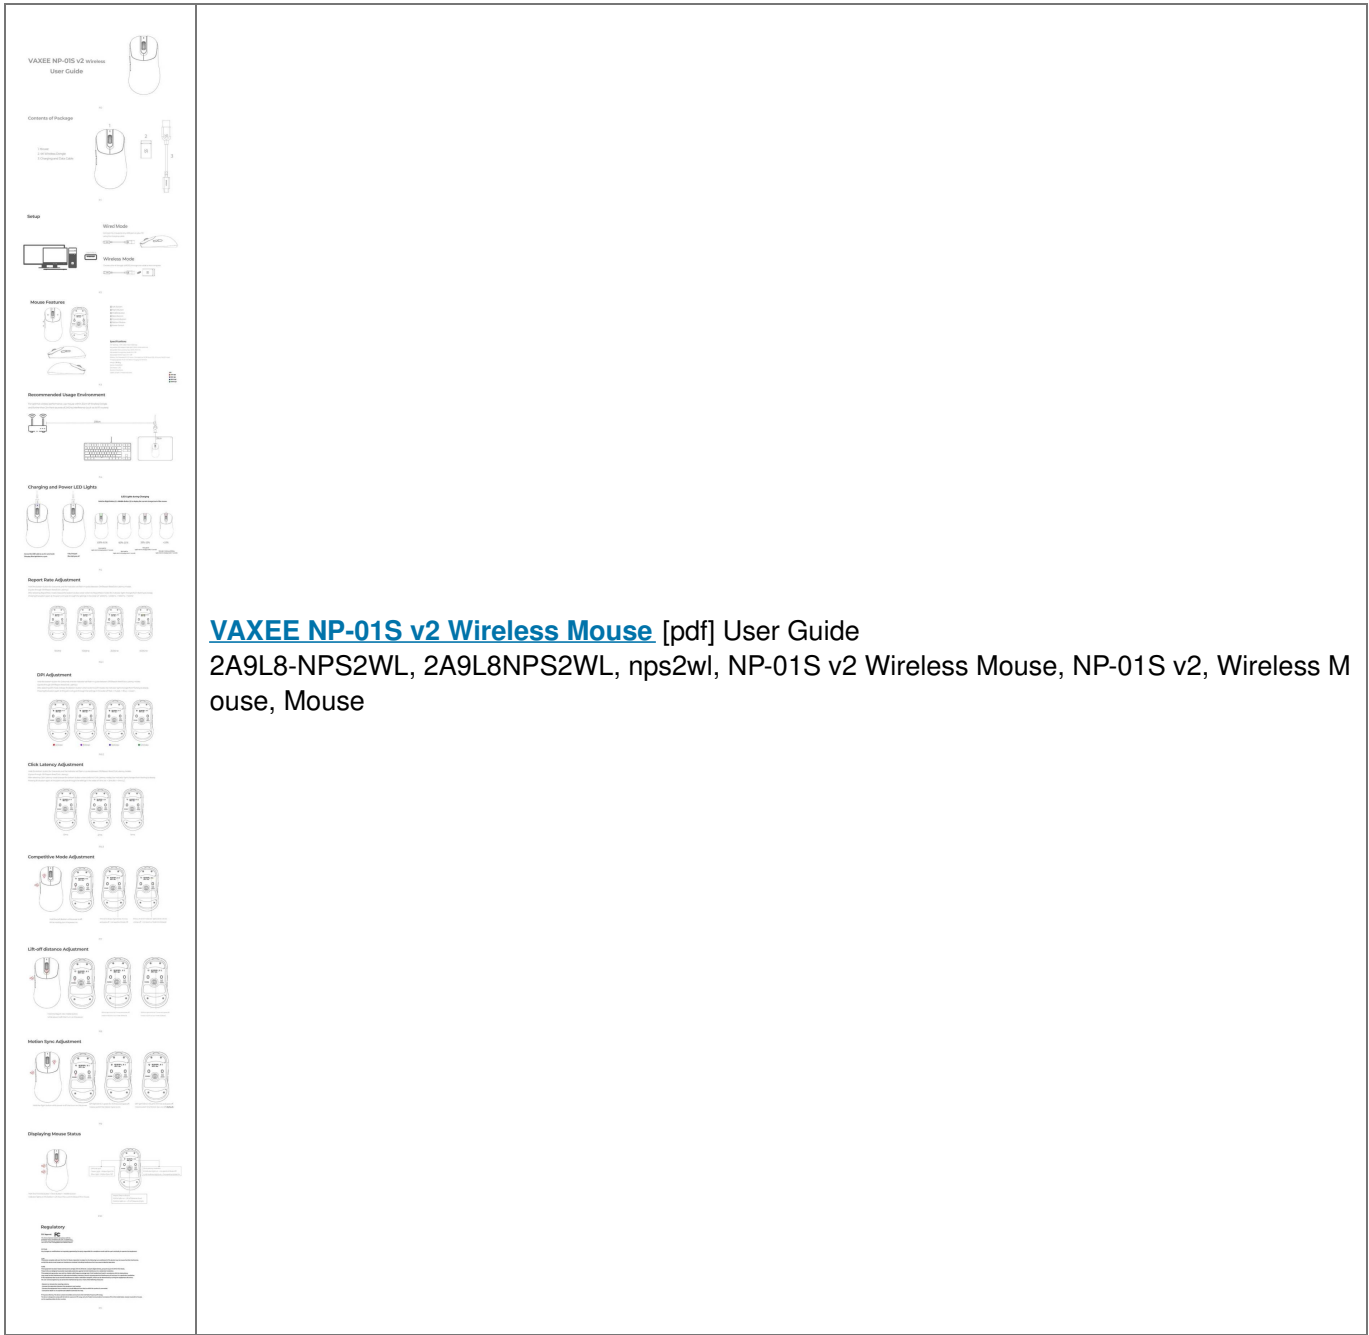

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**RF Exposure Warning:** This device contains transmitters and receivers which emit Radio Frequency (RF) energy. The device is designed to comply with the limits for exposure to RF energy set by the Federal Communications Commission (FCC) of the United States, Industry Canada (IC) of Canada, and the regulatory entities of other countries.
