Venom VS5005 LED Console Stand

IMPORTANT INFORMATION

Care and Maintenance

Your device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you to protect your warranty coverage:

- Keep your device out of the reach of small children.
- Keep the device dry. Precipitation, humidity and all types of liquid or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, allow it to dry completely.
- Do not use or store the device in dusty, dirty areas, as moving parts and electronic components of your device can be damaged.
- Do not use or store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries and warp or melt certain plastics.
- Do not use or store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.
- Do not short circuit the battery.
- Do not drop, knock or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents or strong detergents to clean the device. All of the previous suggestions apply equally to your device, battery, charger or any enhancements.
- The crossed out wheelie bin symbol on the product means that under the WEEE regulations, all consumer and household electrical and electronic products should not be mixed with general household waste as it may contain environmentally hazardous substances. For environmentally responsible recovery, recycling and treatment of the product, contact your local authority for details of your nearest designated collection point where it will be accepted free of charge.
