verizon DMS Switch Multi Gigabit Unmanaged Switch

Product Information

Specifications

- · Manufacturer: Verizon New York Inc.
- Address: 140 West Street, New York, NY 10007
- Contact: Harvey Salzberg Global Engineering and Operations
- Implementation Date: On or after January 2, 2025

Product Usage Instructions

Overview of Planned Network Change(s)

The planned network change involves the retirement of the Verizon East 56th Street NY DMS switch and the migration of all traffic to the Verizon Pearl Street NY C20 switch in New York.

Impact of the Planned Change(s)

Carriers such as CLECs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups or adjust existing connections to the Pearl Street NY C20 switch.

Steps for Carriers Affected by the Change(s)

- 1. Identify the trunk groups currently connected to the East 56th Street NY DMS switch.
- 2. Plan for the migration of traffic to the Pearl Street NY C20 switch.
- 3. Contact Harvey Salzberg for assistance in repositioning codes to the new switch.

PUBLIC NOTICE OF NETWORK CHANGE UNDER RULE 51.329(a)

June 21, 2024

Carrier: Verizon New York Inc., 140 West Street, New York, NY 10007

Contact: For additional information on these planned network changes, please contact: Harvey Salzberg

Quadre Washington

Assoc Dir – Global Network Engineering and Operations Verizon Wireline Network Operations West Main St., 2 nd Floor 320 Saint Paul Pl.

Baltimore, MD 21202

Implementation Date: On or after January 2, 2025

Planned Network Change(s) will occur at the following locations in New York:

Verizon Central Office	Address	CLLI
East 56th Street NY DMS Switch	228 East 56th Street New York, NY 1 0022	NYCMNY56DS2
Pearl Street NY C20 Switch	375 Pearl Street New York, NY 10038	NYCMNYPSPS1

This notice may also be viewed at http://www.verizon.com/about/terms-conditions/network-disclosures

PLEASE NOTE

- All references to the East 56th Street NY DMS switch are associated with CLLI code NYCMNY56DS2 and will
 not be repeated throughout this notice.
- All references to the Pearl Street NY C20 switch are associated with CLLI code NYCMNYPSPS1 and will not be repeated throughout this notice.

Description of the Planned Network Change(s):

The Verizon East 56th Street NY DMS switch, located at 228 East 56th Street, New York, NY 10022, will be retired and removed from the network after all traffic served by this switch is migrated to the Verizon Pearl Street NY C20 switch, located at 375 Pearl Street, New York, NY 10038. All traffic to be migrated includes, but is not limited to, Inter-LATA (ACCESS/FG-B- D/CLEC/IXC), wireless, and paging traffic.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s): Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the Pearl Street NY C20 switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the East 56th Street NY DMS switch will be required to reposition the codes to the Pearl Street NY C20 switch.

All ASRs for the Pearl Street NY C20 switch must be received no later than November 1, 2024, to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the East 56th Street NY DMS switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the East 56th Street NY DMS switch (on or after January 2, 2025). This will serve to guide interconnect re-routes of traffic for the twenty- four (24) native codes currently served by the East 56th Street NY DMS switch to reflect the Pearl Street NY C20 switch as the new home switch. All ASRs for the Pearl Street NY C20 switch must carry the project code of NYCMNY56DS2

Frequently Asked Questions (FAQ)

Q: When will the network change take place?

A: The implementation date is on or after January 2, 2025.

Q: What impact will the change have on carriers?

A: Carriers may need to establish new trunk groups or adjust existing connections to accommodate the network change.
