Overview

We pride ourselves in the quality of our products and services we provide. With our resale partners, we help enterprises around the globe keep their people and places safe. Since our Command platform is often part of an enterprise's critical infrastructure, we aim to deliver high-touch, always available technical support to our customers. Our

Technical Support is a team of highly trained professionals with backgrounds in network engineering, cyber security, or physical security infrastructure. They are staffed out of our offices in San Mateo, New York City, Sydney, and London to deliver 24/7/365 support. We aim to deliver near real-time support through our in-app chat and phone support. This document outlines how to best engage our Technical Support team.

How to Engage Technical Support

Preferred Support Channels

- **Live Chat**

- » Access [Live Chat](#) directly within Command.
- » Chat conversations are logged and tracked in the Support Cases page of Command (Admin > Support > Support Cases).

- **Phone Support**

- » Have your [Customer ID](#) ready.
- » North America: +1 [650-514-2500](#)
- » Latin America: +52 (55) 9990 8275
- » France: +33 (0) 1-89-31-05-00
- » Europe: +44 (0) 20 3048 6050
- » Japan: +81 (0) 50-5497-7800
- » South Korea: +82 (0) 30-864-0150
- » Asia / Pacific: +61 (2) 7259 9300

Best Practices for Engaging Support

Leverage our [Knowledge Base](#) and [training videos](#) to get product overviews, their capabilities, and answers to commonly asked questions.

Still need help?

- Have one of your Organization Admin or Site Admin permissioned users raise a case

to Support.

» These high-privileged users can generate and share a [Support Access Token](#) with Verkada. This allows the Support Team to securely access your organization, investigate the issue, and provide tailored recommendations.

- Have the following information on hand

- » The serial number of the device in question.

- » Description of the errant behavior and when you first noticed it.

- » All troubleshooting steps you've taken, so we can move forward without repeating efforts.

- » The device's [LED](#) behavior for offline devices.

- » Ensure devices you wish to troubleshoot are plugged in and powered on. This maximizes the amount of diagnostic data available in the cloud.

- Have someone on location with the device to aid in physical checks.

- After the case is resolved, please provide feedback on the technical support you received through the surveys sent out upon closure of every case.
