Introduction

The Comprehensive VHUB-MST2HDA is a USB™ 3.0 to Dual HDMI™ Multi-Display Universal Adapter that offers a convenient solution for expanding your display capabilities on MacBook® or Windows® computers. Acting as an external video card, this adapter enables you to connect two additional displays to your computer via the USB™ 3.0 port, providing you with increased screen real estate and boosting your productivity. With one of the HDMI™ ports supporting resolutions up to 4K 30Hz, you can enjoy stunning visual clarity and detail on one of your connected monitors. The other HDMI™ port can output resolutions up to 1080p 60Hz, providing crisp and clear images for your secondary display.

Features

- Dual display output, supporting 1x 4K@30Hz display and 1x 1080p@60Hz display simultaneously.
- Easily adds two extra displays to any supported computer.
- Supports MST functions allowing for extended, mirrored or duplicated screens.
- Compatible with USB-C, USB-A, Thunderbolt 3/4, and USB 4 standard ports.
- Multiple Monitors supported, MacOS up to 6x Displays and Windows up to 8x displays (Additional VHUB-MST2HDA required)
- Fast & simple driver installation
- USB Bus powered, no need for additional external power supply.
- Allows MacOS to support extended mode or MST. (Independent Screens)
- Compatible with MacOS® & Windows® laptops and Android OS.
- 3 Years Worry-Free Warranty.

Panel Description

1. USB-C Male Adapter: Connect to the USB-C Enable Laptop/Notebook with USB3.0 Data Output
2. USB3.0 Port: Connect to the USB 3.0 Data Port of the PC/ Laptop/Notebook/USB 3.0 Hub
3. 4K30Hz HDMI: Connect the Original Port to Output Resolution up to 4K@30Hz Max
4. 1080p HDMI: Connect the Port to Output Resolution up to 1080p@60Hz Max

System Requirements

To ensure proper installation and operation of this product, please ensure that your system meets the following requirements:

- Windows 7/8/8.1/10 and above or Mac OS 10.10.x and above.
- CPU Processor: Core i5 and above.
- RAM: 4GB and above.
- Monitor: Supports 4K resolution.

Resolutions

OS/Ports		2K Port	4K Port
Windows	Mirror mode	1920×1080@60Hz	1920×1080@60Hz
	Extend mode	1920×1080@60Hz	3840×2160@30Hz
Mac OS	Mirror mode	1920×1080@60Hz	3840×2160@30Hz
	Extend mode	1920×1080@60Hz	3840×2160@30Hz

Driver Installation

1. Enter the website: <https://www.siliconmotion.com/downloads/> in your browser.
2. Download the correct driver zip file that supports your operating system as follow:
 - 1.

SM76x Driver Download

Windows

OS Description	Version	Release Date	Release Notes	Download
Windows 11, Windows 10 Driver	V2.17 R02	Sep 26, 2023	Release Notes	Download
Windows 11, Windows 10 Driver MSI	V2.17 R02	Sep 26, 2023	Release Notes	Download
Windows 11, Windows 10, Windows 7, Windows 8.1 Driver	V2.15 R03	May 9, 2023	Release Notes	Download

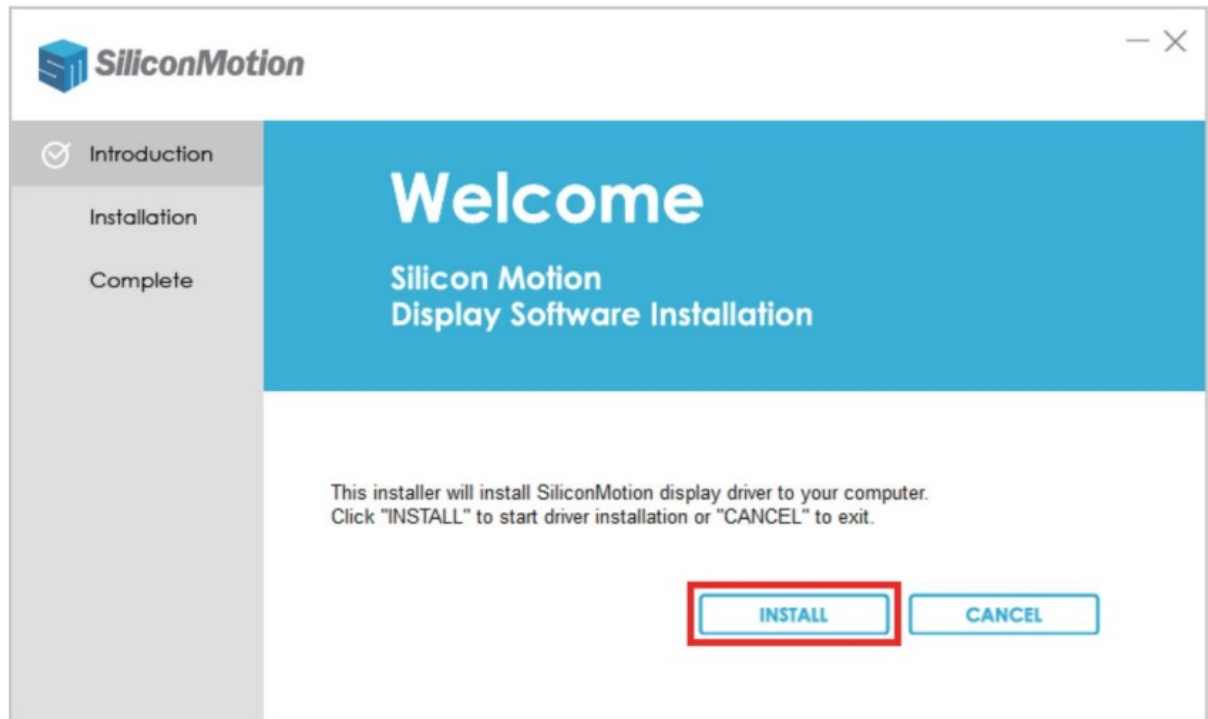

macOS

OS Description	Version	Release Notes	Release Date	Download
Recommended: InstantView display application with UI. Support macOS 14 Sonoma, 13 Ventura, 12 Monterey, 11 Big Sur and 10.15 Catalina including MacBook Air/Pro (M1/M2 & Intel powered)	V3.17 R04	Sep 26, 2023	Release Notes	Download
Legacy Display Driver for macOS 10.15 Catalina, 10.14 Mojave and 10.13 High Sierra	V2.2.16.0	Jun 3, 2021	Release Notes	Download
Legacy Display Driver for macOS 10.10, 10.11 and 10.12	V2.1.4.0201	Dec 12, 2019	Release Notes	Download

Android

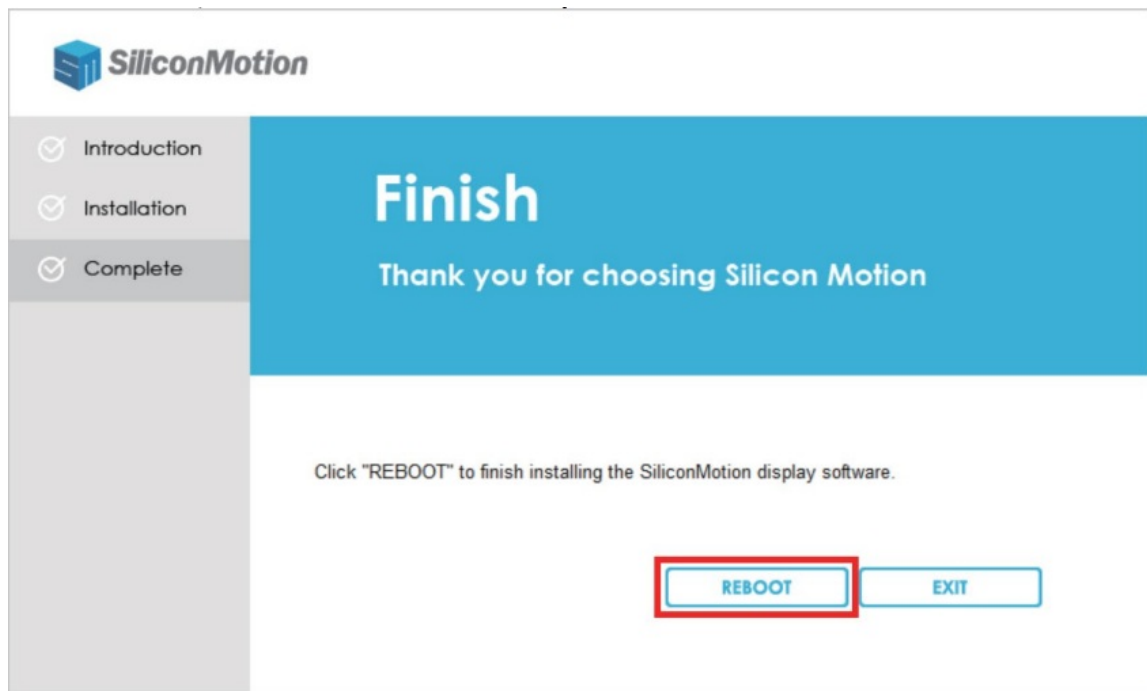

OS Description	Version	Release Date	Release Notes	Download
Android 7.1 and above	V2.17.0.0	Sep 26, 2023	Release Notes	  Download

Unzip the driver file, and double click to open the “.exe” file, and then click the “I NSTALL”

Note: If a security prompt pop-up appears, click “I NSTALL”

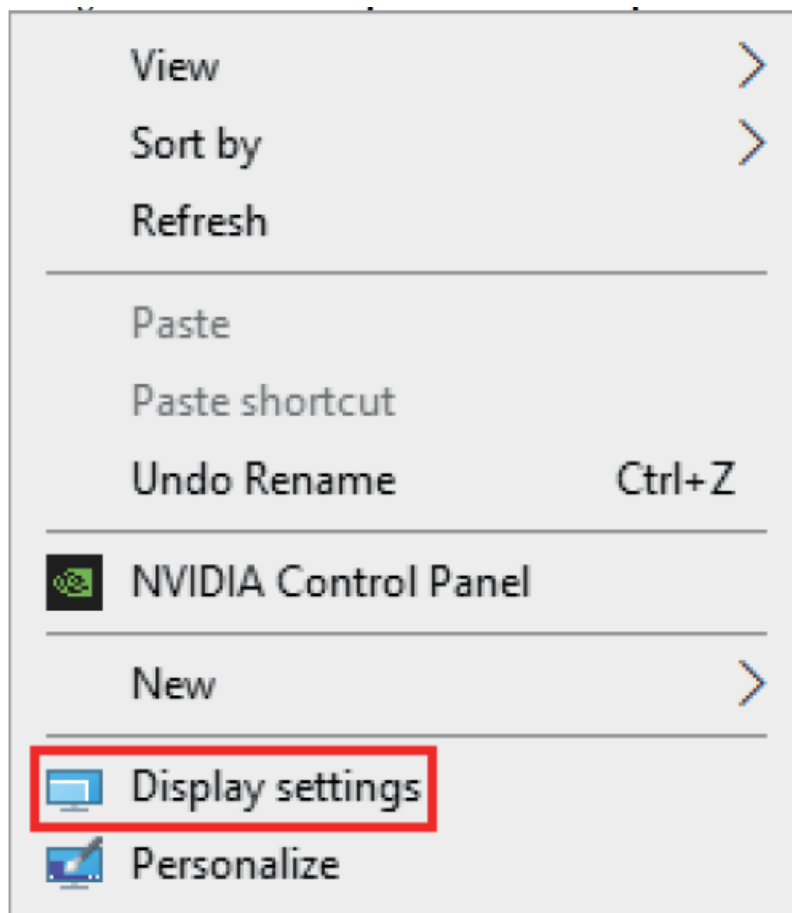

- After installation, click “REBOOT” to restart the computer

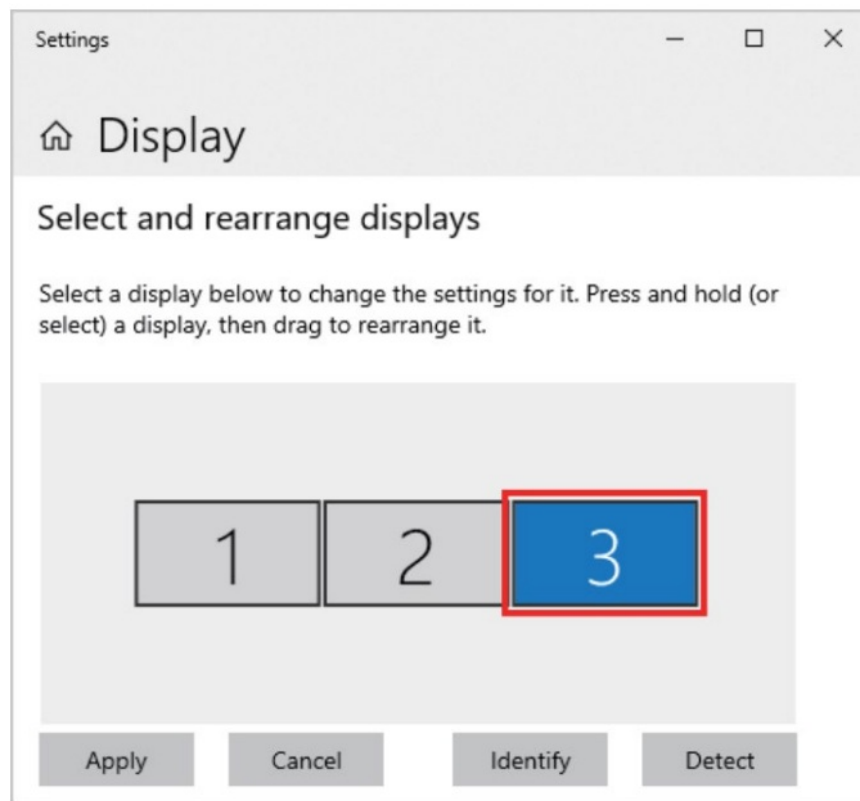

Display Mode Setting

For Windows

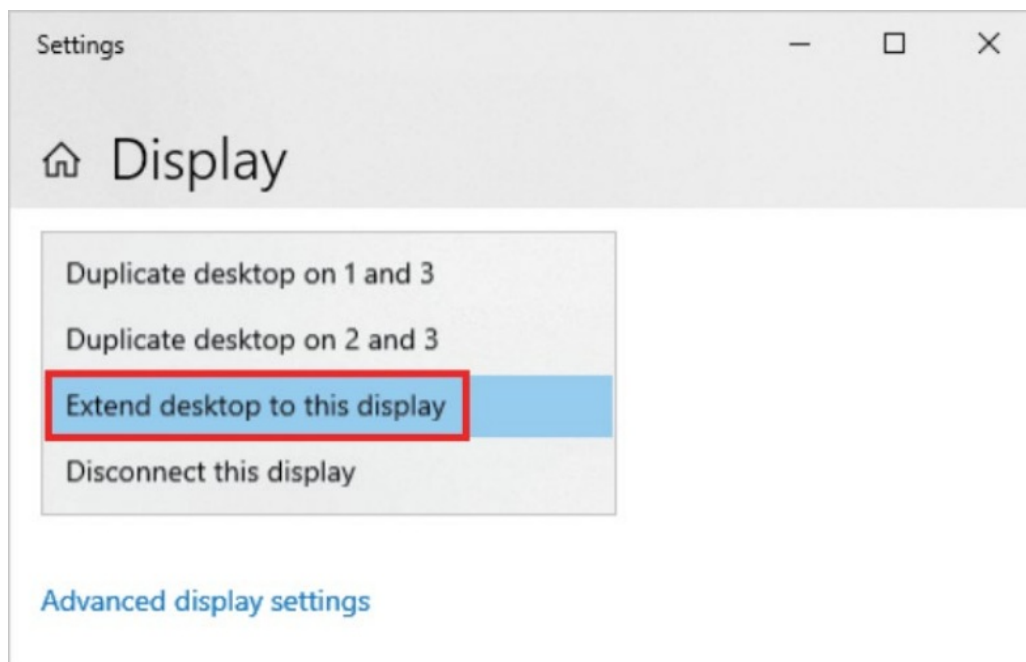

1. Right click the blank space on the desktop and select "Display settings"

2. At the "Display" area, click each of the display icons to set the needed resolution or other setting

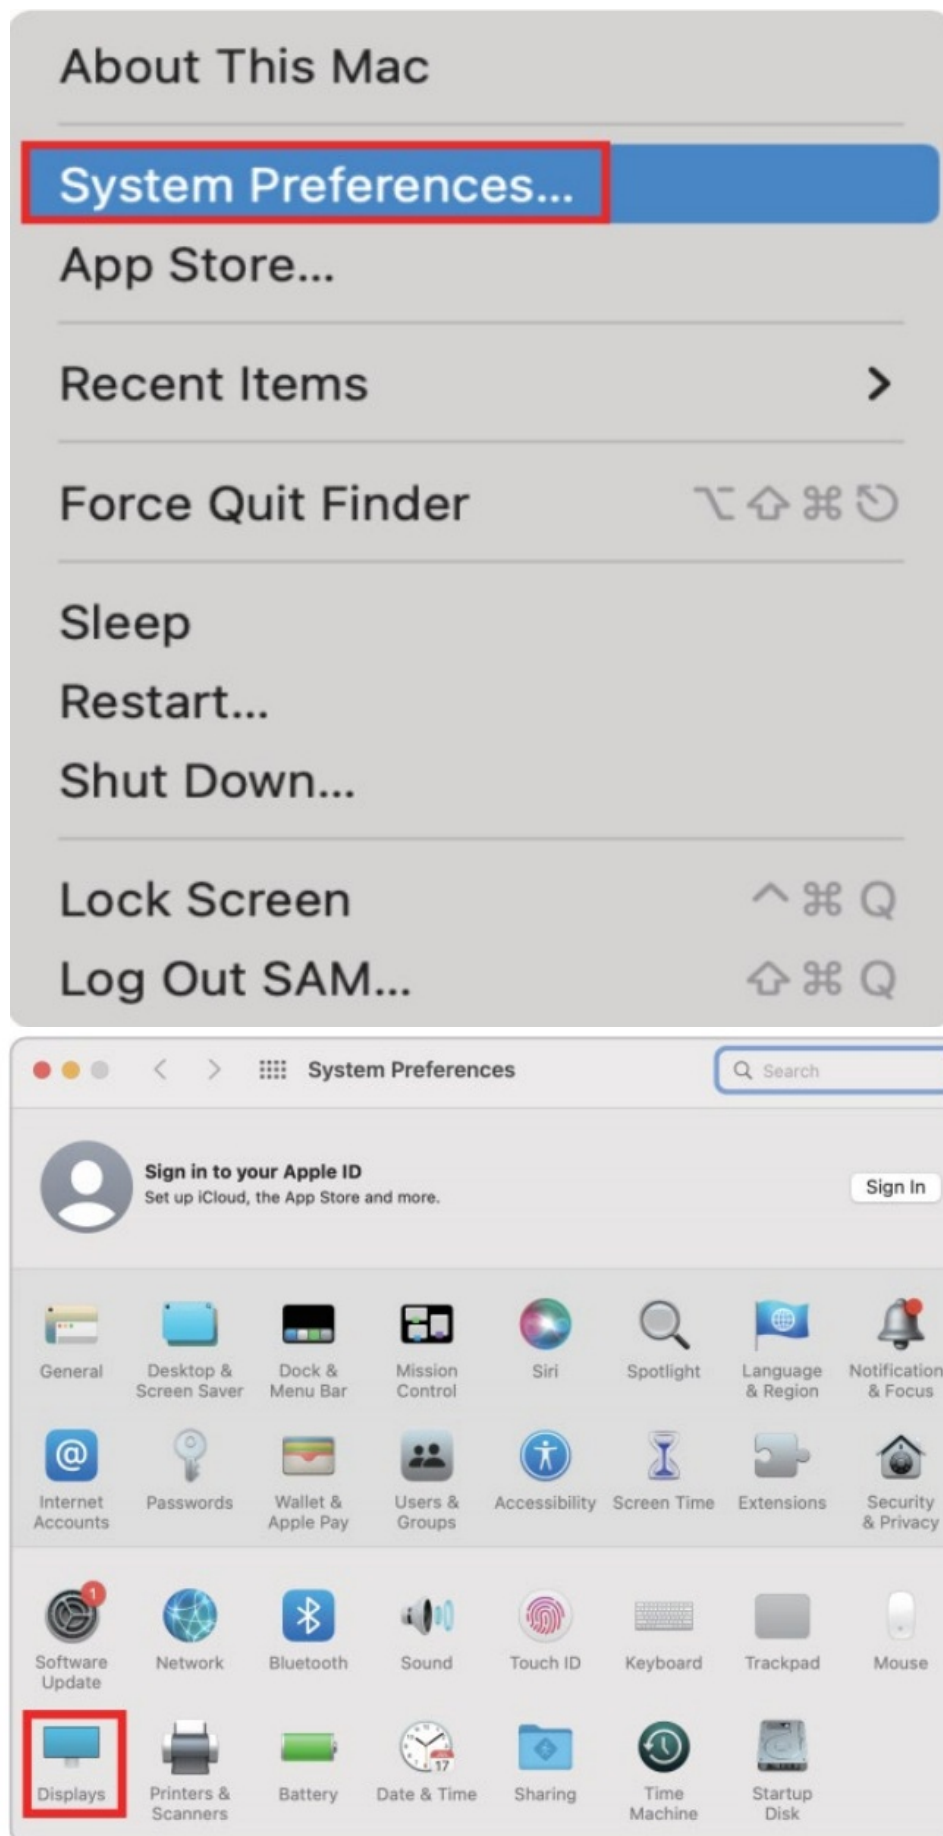

3. Scroll down to “multi display settings” and select the desired mode in the drop-down list

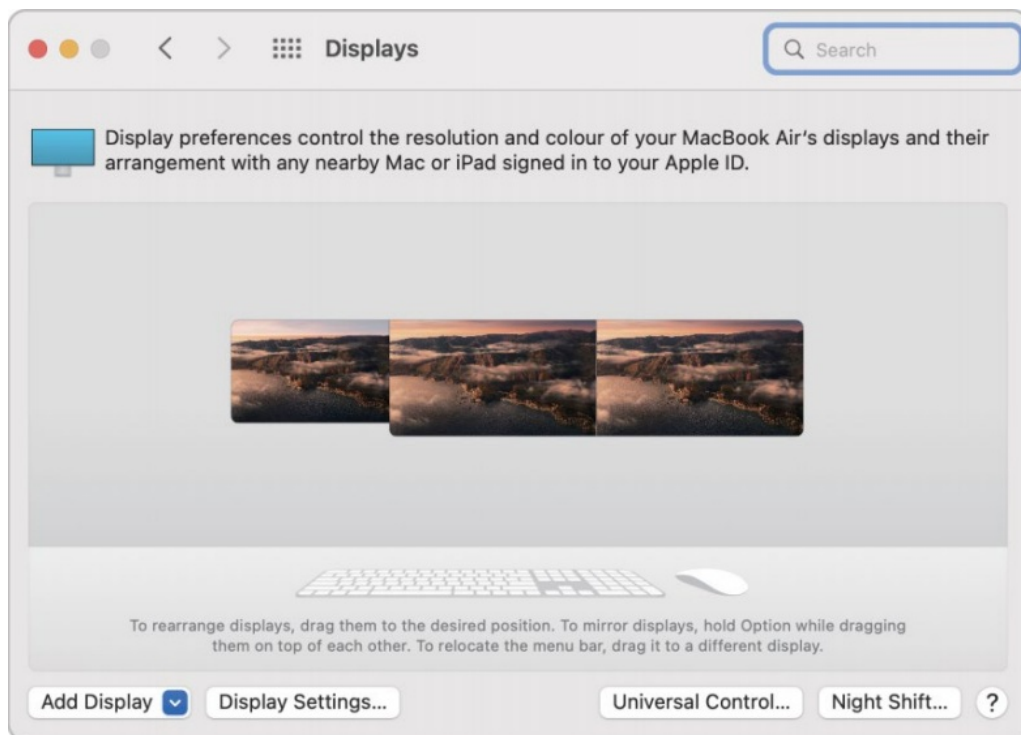

For Mac OS

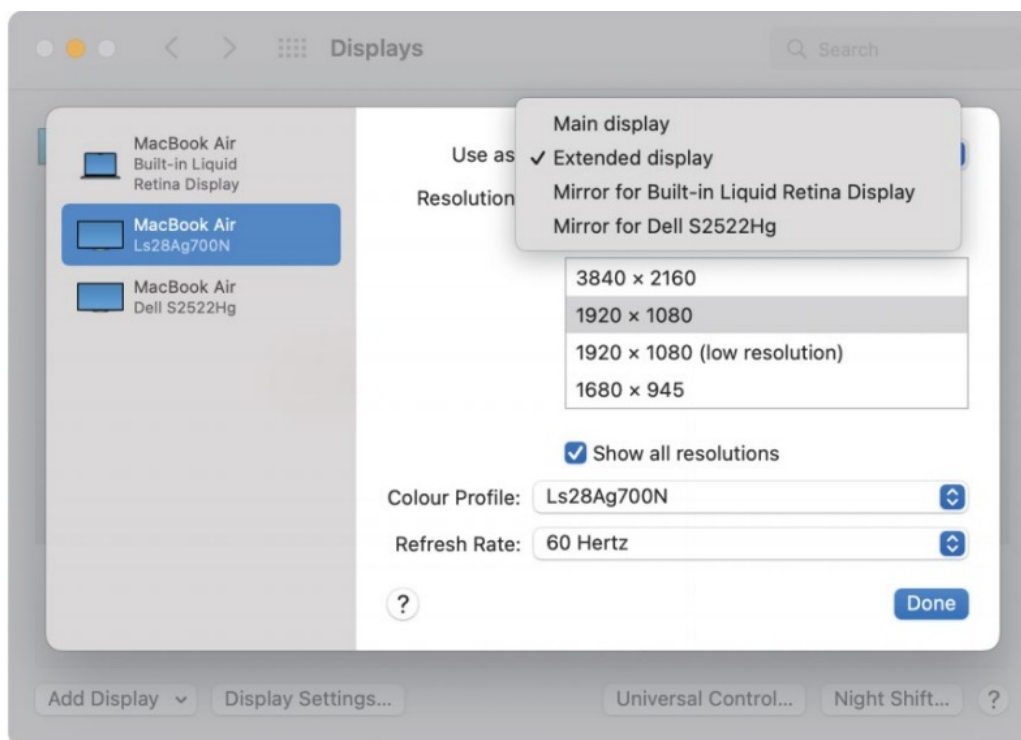

1. Left click the apple icon and select “System Preferences”, and click the “Displays”

2. At the “Display” area, click each of the display icons to set the location or change to the mirror or extend mode

3. Click the “Display Setting”, and choose each connected display to set correct resolution and mode

Note

- Please note that Mac-based devices do not support rotation mode, but M1/M2 Mac supports clamshell mode while Intel Mac does not.
- To use this adapter, your USB-C™/USB3.0 equipped device must support USB 3.0 data transmission.
- Please be aware that this adapter does not support playback of HDCP-protected content on sites like Netflix and Hulu.

Troubleshooting Common Issues

Q: My USB 3.0 to HDMI Dual Display Adapter is not working. What should I do?

A: First, please check the following items: 1. Ensure that your device's USB port has a current output of 900mA or more. If not, try a different port. 2. Check if the correct drivers have been installed on your device. 3. Make sure that your HDMI cable and adapter are securely connected to your device. 4. Verify that your video source is compatible with the adapter. 5. Restart your device and see if this resolves the issue.

Q: My second display flickers when I use the adapter. What could be causing this?

A: This may be caused by one or more of the following: 1. Make sure the HDMI cable and adapter are securely connected. 2. Try using a different HDMI cable to see if this resolves the issue. 3. Check that your device is providing sufficient power to the adapter (900mA or more). 4. Verify that your video source is compatible with the adapter. 5. Try using a different USB 3.0 port or restarting your device.

A: This may be caused by one or more of the following: 1. Make sure the HDMI cable and adapter are securely connected. 2. Try using a different HDMI cable to see if this resolves the issue. 3. Check that your device is providing sufficient power to the adapter (900mA or more). 4. Verify that your video source is compatible with the adapter. 5. Try using a different USB 3.0 port or restarting your device.
