Technical Support and E-Warranty Certificate www.vevor.com/support

This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

Warning-To reduce the risk of injury, user must read instructions manual carefully.

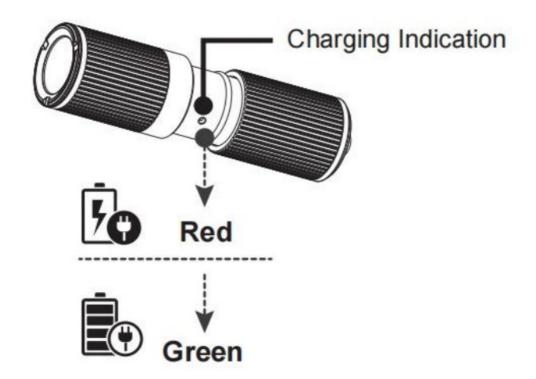

Mode 2:high mode

When the flashlight head is tightened and contacted then the light will be in low mode, and the light will be in high mode after tightening, and it will be turned off if it is loosened without contact.

Charge Instruction

- Loosen the flashlight head and let the Micro USB port insert to the charging port of flashlight
- 2. When the red light is on, it indicates that it is charging, and it turns green when fully charged.

Note

MINI2S has a built-in low battery protection function, when the product is not used for a long time or when the power is too low, it will trigger the low battery protection function of the product, the product will only have a low bright gear or temporary protection to prohibit the battery discharge to protect the battery, at this time the normal charging of the product can be lifted to protect and can be used normally.

Warning

Caution

- 1. When the product is not used for a long time, it is recommended to charge it every three months to avoid battery damage.
- 2. The flashlight head is all in one designed to prevent falling. Please do not pull the head of the product manually when unscrewing the head thread.
