Victor Electronic Mouse Trap User Manual

Instructions

The Victor Electronic Mouse Trap is a cutting-edge solution designed to effectively and humanely eliminate the problem of mice infestations. This innovative device represents a significant advancement in pest control technology, offering a more efficient and less cruel alternative to traditional snap traps or poison baits. Utilizing state-of-the-art electronic circuitry, the Victor Electronic Mouse Trap lures mice inside with enticing bait, and upon entry, delivers a quick and humane electric shock, ensuring a swift and painless demise.

With its ease of use, reusable design, and reliable performance, this electronic mouse trap has become a popular choice for those seeking a clean, safe, and efficient way to manage mouse infestations in homes and businesses. Say goodbye to the hassle of disposing of trapped mice and the mess associated with traditional methods, and welcome a more effective and humane solution with the Victor Electronic Mouse Trap.

Product Specifications

- **Dimensions:**

The Victor Electronic Mouse Trap is compact and designed to fit in tight spaces. It typically measures approximately 8.5 inches in length, 3 inches in width, and 4.5 inches in height.

- **Power Source:**

It is powered by batteries. Commonly, it uses 4 AA batteries, which are not always included with the product.

- **Bait Compartment:**

The trap features a bait compartment where you can place bait to attract mice. Peanut butter or dry pet food often work well as bait options.

- **Sensor Technology:**

The trap is equipped with an electronic sensor that detects when a mouse enters the trap. Once triggered, it delivers a high-voltage electric shock to quickly and humanely dispatch the mouse.

- **Kills per Set of Batteries:**

The number of mice that can be killed per set of batteries may vary, but it can typically handle multiple mouse captures before needing battery replacement.

- **Indicator Lights:**

Some models have indicator lights to signal when a mouse has been caught. The lights may flash to let you know when it's time to empty the trap.

- **Safety Mechanism:**

The trap is designed with safety in mind, and it's unlikely to cause harm to humans or pets. It has a safety switch that deactivates the trap when it's opened for disposal.

- **Reusable:**

The Victor Electronic Mouse Trap is usually reusable, allowing you to empty it, reset it, and continue using it.

- **Easy Disposal:**

It's designed for easy mouse disposal without having to touch or handle the captured mouse directly.

- **Material:**

The trap is typically made of durable plastic materials.

Installation

1. To Set & Place the Mouse Traps:1. Be sure the trap is in the "OFF" position

2. Insert a small amount of peanut butter in the back of the kill chamber against the access holes
3. Open the battery compartment and properly insert batteries 4 “AA”.

4. Identify location with mouse activity. Place trap where activity has been seen.
5. Turn the switch to “On.” The green light will flash once. The trap is working.

6. Once caught, dispose of the rodent in a trash receptacle.

CAUTION: Inappropriate use of this product may cause electrical shock or serious injury. See the product warning for additional details.

FAQs

How does the Victor Electronic Mouse Trap work?

The trap uses electronic sensors to detect when a mouse enters. When triggered, it delivers a high-voltage electric shock, quickly and humanely killing the mouse.

Is the Victor Electronic Mouse Trap safe to use around pets and children?

Yes, it is designed with safety in mind and has a safety switch to deactivate it when opened. It's safe when used according to the instructions.

What type of bait should I use with the trap?

Peanut butter and dry pet food are commonly used and effective bait choices.

How do I clean the trap between uses?

You can clean the trap with a damp cloth and mild detergent, making sure it's completely dry before reusing it.

How many mice can the trap catch before needing to be emptied?

It can typically capture multiple mice before needing to be emptied.

Do I need to purchase batteries separately?

Yes, batteries are usually not included with the trap. It commonly requires 4 AA batteries.

Can I use the trap outdoors?

It's designed for indoor use, as exposure to moisture or extreme weather conditions can damage the electronics.

How do I know if a mouse has been caught?

Some models have indicator lights that flash to signal a successful capture.

Can the trap be used for rats or larger rodents?

No, the Victor Electronic Mouse Trap is specifically designed for mice and may not be effective for larger rodents.

Is the trap reusable?

Yes, the trap is typically reusable. After catching a mouse, you can empty it and reset it for future use.
