INSTALLATION

- Never install this product while driving.
- Install this product near the rear-view mirror to obtain the best open-field view. Do not install in a location that will obstruct your required driving view.
- Make sure that the lens is within the wiping range of the windscreen wiper to ensure a clear view even when it rains.
- Do not touch the lens with your fingers. Finger grease may be left on the lens and will result in.

Install vehicle video recorder

- Use dry fabric to wipe out the spot where the product will be attached on the windscreen. Make sure to install the product on where sight is not disturbed.
- Install the suction mount and firmly affix the mount onto the windshield. Then install product.
- Select way A or B to install charge cable, hide cable into the seams around the edge of the dashboard.
- Insert charger to car cigarette lighter.
- Turn on vehicle camcorder, adjust the lens to focus on the road ahead.
- Make sure that the product is operating normally.

PRODUCT PRECAUTIONS

- **Step 1** : Before installation, please check the accessories carefully to ensure that the products and accessories are correct and complete, and then start the installation.
- **Step 2** : During installation, be sure not to insert the car key into the power supply, and do not insert or pull out any machine accessories in the status of Power-on, including: SD card. These actions should be completed when power is turned off.
- **Step 3** : When the car key is plugged into the vehicle, the dash cam will automatically turn on. Please check whether the function of power on/off, the display are normal.
- **Step 4** : When the machine is in use, it is forbidden and dangerous to pull and insert the SD card, which will cause the recorded video files to be damaged and the machine to be abnormal or damaged.
- **Step 5** : If you need to download the recording videos and images, press SD card directly when the car is turned off. Then insert the SD card into the machine again when the vehicle is turned off.
- **Step 6** : You must use CIO high-speed card (recommended capacity 32G), lower than CIO will cause problems like video stutter, black screen, video can not be recorded or not be played or not automatically be covered.
- **Step 7** : Achieving more functions require mobile phone terminal to connect to dash cam with Dashcam Player APP. The specific application method of the APP will be described in detail later.
