VIMAI EP033AH2C Wireless Microphone

Product Information

Specifications

- Compliance: Part 15 of FCC Rules
- Conditions: Must not cause harmful interference, must accept any received interference

Product Usage Instructions

Compliance Information

This device complies with part 15 of the FCC Rules. It is important to ensure that the device is operated in a manner that does not cause harmful interference to other devices. Additionally, the device must accept any interference it receives, even if it leads to undesired operation.

Modifications

Any changes or modifications to the device that are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. It is crucial to adhere to this guideline to maintain the device's compliance and proper functioning.

FAQ

• **Q: What should I do if I encounter interference issues with the device?**

A: If you experience interference with the device, try adjusting its placement or orientation. Additionally, ensure that there are no other electronic devices nearby causing interference. If the issue persists, contact customer support for further assistance.

- **Q: Can I make modifications to the device on my own?**

A: No, any changes or modifications to the device should only be made if expressly approved by the party responsible for compliance. Unauthorized modifications may lead to voiding the user's authority to operate the equipment.

Product introduction

Thank you for choosing our products.

This product is a wireless lavalier microphone, which can provide professional-level recording output. Plug-and-play, no APP. Dual 48KH, sampling rate, support chatting together PK, reverb singing songs (stereo). Compatible with singing APP for recording songs; small but powerful.

Multiple uses: can be used for live streaming, video vlog shooting, program Interview, interview recording, video teaching and other occasions

Packing list

1. Transmitter
2. Receiver
3. Charging case (For charging case model)
4. Type-C charging cable
5. user manual
6. windproof wool
7. TR5 to TRR5 adapter cable (3.5mm only)

The wireless microphone consists of two parts, the microphone transmitter, and the receiver. (As shown in the picture below)

Product Structure Diagram

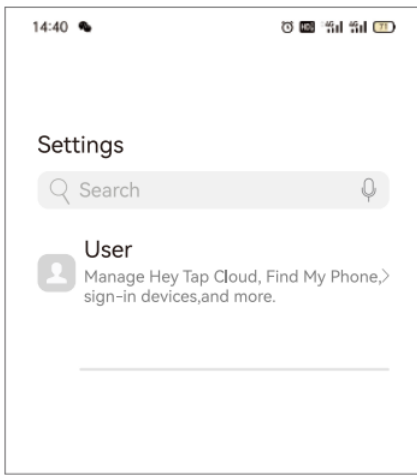

1. Charging case indicator
2. Type-C charging port on the case
3. Microphone Indicator
4. Microphone power button
5. Microphone dip
6. Microphone metal contact
7. Microphone Type-C charging/ headphone monitoring port

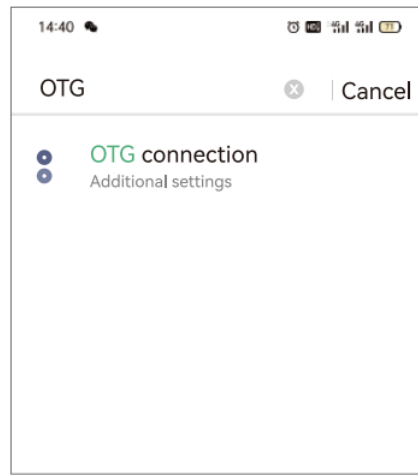

Note

1. Please pay attention to the indicator light facing outward when putting the microphone into the charging case, otherwise it will not charge properly.
2. When putting the receiver into the charging case, please note that the indicator faces outward, otherwise it cannot be magnetized (built-in magnet) and cause the box to shake.

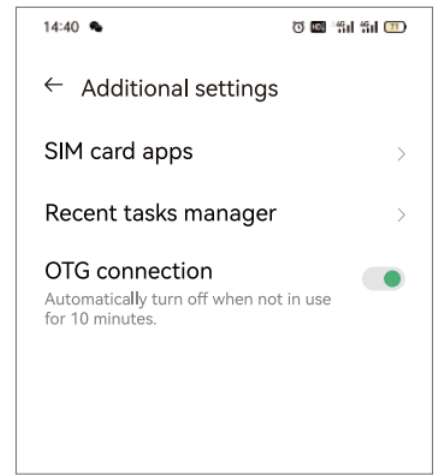

If the mobile phone has OTG function, please manually turn on OTG

Step 1: Open the phone "Settings"

Step 2: Enter "OTG" to search

Step 3: Open "OTG Connection"

Some models of OPPO may need to set up manually as below: Settings>Sound & vibration>Other settings>Default recorder>Add on

How to use the Android version

Step 1: First open the charging case, the microphone is powered on and green light flashing slowly, Type-C receiver no light effect

Step 2: Connect the Type-C receiver to the Type-C port of the phone, both the green light of the receiver and microphone are always on. Pairing is successful. Open the camera, live video and other APP on the phone, and use the microphone to pick up sound

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
