Please, Note that Proposition 65 may be best defined as a "Right To Know" law in California and Prop 65 warning labels are not an indication that a product is violating safety standards or regulations. The Prop 65 warning label does not mean our products inevitably cause cancer or reproductive harm. We do not consider our products harmful when used as intended. However, it is a necessary precaution to provide the warning because of this California law.

FAQs

- **Do I need drivers to use this adapter?**
  - A: No, this adapter is plug 'n play and does not require any drivers.
- **What is the warranty for this product?**
  - A: The product comes with a 1-year limited warranty. You can register your product at

    www.visiontek.com/support/warranty-registration.
- **Can I connect multiple displays using this adapter?**
  - A: This adapter supports AMD Eyefinity Multi-Display, allowing
- **What are Active Adapters?**
  - These adapters have a chip that helps convert video for the GPU. Your GPU will be able to do this for two

monitors, but an active adapter is needed for more. Active adapters can only be adapter off of a DP or mDP on a graphics card or docking station. The reason for this is a feature that DP has that makes it natively active. Should you be connecting a DP monitor to a DP or mDP port on a card, active adapters are unnecessary.

- **What are Passive Adapters?**
  - Non-active adapters are called passive adapters. There is no easy way to tell the difference between an active and passive adapter. Most often, they look exactly alike. Most manufacturers put the word active somewhere on their active adapters, like VisionTek. Though this is not always the case. The rule of thumb is, if it does not say active on the adapter, assume it is passive. For California Residents Only:
    - **WARNING**: Cancer and Reproductive harm. For more information, go to **www.p65warnings.ca.gov**
