PREPARE DOOR & INSTALL LATCHES

- Prepare door according to template
- Install deadbolt latch in top hole with cross slot for tailpiece toward bottom
- Install beveled latch on bottom with bevel toward door frame
- Secure with (4) combo screws

INSTALL LOCK ASSEMBLY

- Install lock chassis into bottom hole making sure to properly engage lock body into latch bolt
- Install inside mounting plate and secure with (2) screws

INSTALL CYLINDER ASSEMBLY

- Install cylinder assembly from outside of door
- If extended, retract deadbolt

Left Hand Door – Rotate tailpiece clockwise until it stops in the vertical orientation

Right Hand Door – Rotate tailpiece counterclockwise until it stops in the vertical orientation

CONFIGURE BOARD FOR DOOR HANDING

- For right hand doors, have the dip switch set to 8
- For left hand doors, have the dip switch set to 9

PREPARE INSIDE ESCUTCHEON

- Rotate lever driver tab to correct orientation as shown

OUTSIDE TRIM

INSTALL INSIDE ESCUTCHEON AND LEVER

- Rotate thumb turn away from leading edge of door
- Install inside escutcheon
- Secure escutcheon using two screws
- Install lever
- Install batteries and battery cover
