INSTALL BIRD FEEDER

The first installation effect.

1. Use the provided drill sticker to mark the position of holes on your wall.
Use drill bit to drill 4 holes.

2. Install 4 Anchors.

3. Install the screws to fix the bracket.

4. As shown in the picture, put the Bracket connector into the bottom of the bracket, use 3 long screws to install it with the bird feeder, then the bird feeder is fixed.

5. After opening the lid and adding the bird food, as shown in the picture, fastening the 2 Short screws can prevent it from being opened by squirrels.

6. If you feel that the birdhouse suspension does not allow sufficient sunlight, you can connect a separate solar panel, as shown in the picture you just need to plug the solar panel into the DC port under the birdhouse.

7. As shown in the picture: you can adjust the solar panel up and down by 90°, and also rotate it by 360°.

INSTALL BIRD FEEDER

The second installation effect.

1.

Need to unscrew 4 sets of screws from the Bird feeder wall mount and put them aside.

2. Put plastic accessories on the back, Re-tighten the four sets of screws.

3. Use the provided drill sticker to mark the position of holes on your wall. Use drill bit to drill 4 holes.

4. Install 4 Anchors.

5. Install the screws to fix the bracket.

6. As shown in the picture, put the Bracket connector into the bottom of the bracket, use 3 long screws to install it with the bird feeder, then the bird feeder is fixed.

7. After opening the lid and adding the bird food, as shown in the picture, fastening the 2 container lid Short screws can prevent it from being opened by squirrels.

8. If you feel that the birdhouse suspension does not allow sufficient sunlight, you can connect a separate solar panel, as shown in the picture: you just need to plug the solar panel into the DC port under the birdhouse.

9. As shown in the picture: you can adjust the solar panel up and down by 90°, and also rotate it by 360°.
