## Install straps to the watch by following the steps.

Turn on Bluetooth on your smartphone and the watch. Scan the QR code to download the app, then set up the watch.

## Kind reminder:

The watch is charged with a magnetic suction cable. When charging, align the charging base with the charging area on the back of the device, connect the charger to the other end, and turn on the power until the charging level indicator appears on the device screen.

The battery of this product cannot be disassembled. Due to the product's own wear and tear, after being idle for more than a month, the product may not be able to start due to battery failure.

Users are advised to charge regularly every week, to ensure that the device can function properly. After a long period of storage, if the smart watch is charged using a computer USB, it will take more than ten minutes to display the charging icon. Please be patient and wait. It is recommended to use a 5V 1A charger for charging. Improper operation may cause the product to crash.

You can press and hold the power button for 10 seconds to forcibly restart the watch. When using high energy consuming programs such as WIFI, internet access, and video, the watch's power consumption will be relatively high, and there may be slight heating or scalding of the machine, which is a normal phenomenon. If the machine prompts a high temperature alarm, please reduce the use of such high power applications.

weaker over time. It supports washing hands and taking a shower. Short term immersion in rain and shallow water areas, but does not support scenarios such as hot showers, swimming, diving, surfing, etc.

Precautions: The following situations may affect the waterproof equipment: falling, bumping or being hit by other equipment, and the equipment may contact soap water, bath gel, detergent, perfume, oil, etc. High temperature and humidity scenarios such as hot water and sauna. Equipment damage caused by entering the liquid is not covered by the free replacement warranty;

## Major function

APP Store: Rich application market, supporting online installation and uninstallation, such as WeChat/QQ/NetEase Cloud Music/Gaode/Alipay/Himalaya/wearpro(TikTok/Meituan

Baidu Translator(Tencent News(TV/Radio/iQiyi(Taobao/ Wannian Calendar /12306/Xiaohongshu/Weibo/Cloud Flash Pay, etc. The specific application shall be subject to the actual situation.

Mode switching: Support for switching between Android and Bluetooth modes. Android mode includes full functions such as WIFI and application market. If you need to save more power, please switch to Bluetooth mode;

measure. To determine the accuracy of blood oxygen, please ensure that the watch fits snugly with your hand.

**Sleep:** The smartwatch will automatically detect personal sleep status, and by connecting to the mobile app, you can view sleep quality and details.

**Voice memo:** You can take meeting minutes anytime through a smartwatch.

**Video/Pictures/Music:** You can watch videos, browse pictures, listen to music, and support TWS capabilities through your smartwatch.

**File management:** You can view the built-in files of your smartwatch through file management, including voice, video, and pictures.

**Update Firmware:** Support FOTA upgrade under WIFI connection, with faster upgrade speed. When the watch detects a new version, it will prompt the user to upgrade. After the user clicks on the upgrade, there will be a progress bar in the system. Depending on the size of the upgrade package, the upgrade process takes 1-5 minutes. After the upgrade is completed, the watch will automatically turn on and reconnect the device. If the progress bar gets stuck during the process, please do not take any action and complete it slowly until the upgrade is completed.

## Warranty Instructions

1. If there are any product quality problems caused by manufacturing, and historical calls.

**Phonebook:** After connecting to the mobile app, you can manage contacts and applications.

**ChatGPT:** Support ChatGPT online Q&A and consultation. Materials, design, or other reasons during normal use of this product, the

motherboard is covered under warranty for one year from the date of synchronization of the contacts in your phone's contact book from the watch end.

**Physical training:** In the menu, enter physical training, select a mode, click to start, and right-click to enter the pause interface. Each exercise data includes exercise time, calorie consumption, heart rate, and more!

**Heart rate monitoring:** Click on the heart rate icon in the menu to measure the heart rate. To ensure the accuracy of the heart rate, please ensure that the watch fits the hand. The heart rate sensor of the watch will scan the changes in the hair and blood vessels on the surface of the skin with green light to obtain the heart rate measurement value!

**Blood oxygen monitoring:** Click on the blood oxygen icon to stop the stopwatch: Entering the stopwatch through the menu allows you to start and pause the stopwatch.

**Alarm Clock:** Set an alarm reminder through a smartwatch or mobile app.

**Connect a new phone:** After connecting to a new phone, the watch information will be initialized because the original user data is stored, so that the smartwatch can connect to the new phone.

**Other applications:** Built in WeChat, Alipay, stock market, maps, browser browsing pages, weather, etc!

**Tool applications:** including: timers, calendars, calculators, shake and take photos, search for mobile phones, wallets, and other tools.

**Update Firmware:** Support FOTA upgrade under WIFI connection, with faster upgrade speed. When the watch detects a new version, it will prompt the user to upgrade. After the user clicks on the upgrade, there will be a progress bar in the system. Depending on the size of the upgrade package, the upgrade process takes 1-5 minutes. After the upgrade is completed, the watch will automatically turn on and reconnect the device. If the progress bar gets stuck during the process, please do not take any action and complete it slowly until the upgrade is completed.
