- Compatibility: Android and iOS devices
- App: Walabot DIY App
- Updates: Regular updates with new features and improved user experience
- Radio Frequency (RF) Technology: FCC and CE approved, no health threats

Product Usage Instructions

Step 1: Connect Walabot DIY 2 to your Phone

1. Ensure your phone's Wi-Fi is turned on.
2. Power on Walabot DIY 2.
3. Go to your phone's Wi-Fi settings and connect to the Wi-Fi network named "Walabot DIY".

Step 2: Download and Install the App

1. Open the Google Play Store or the Apple App Store on your phone.
2. Search for "Walabot DIY App".
3. Download and install the app on your phone.

Step 3: Update the App (if applicable)

1. Open the Walabot DIY app on your phone.
2. If an update is available, you will be prompted to download and install it.
3. Follow the on-screen instructions to complete the update.

Step 4: Use Walabot DIY 2

1. Hold Walabot DIY 2 against the wall you want to scan.
2. Open the Walabot DIY app on your phone.
3. Follow the on-screen instructions in the app to start scanning.
4. The app will provide visual representations of objects detected inside the wall.

Frequently Asked Questions (FAQ)

- Q: How deep can Walabot DIY 2 detect objects?
A: Walabot DIY 2 can detect objects up to a depth of 4 inches / 10 centimeters in drywall.
- Q: What types of objects can Walabot DIY 2 detect?
A: Walabot DIY 2 can detect wood and metal studs, stud centers, metal pipes, PVC/plastic pipes, wires, conduits, and movement (e.g. rodents, termite nests, beehives).
- Q: Can Walabot DIY 2 be used on walls with insulation?
A: Yes, Walabot DIY 2 can be used on walls containing insulation as long as the insulation does not contain metal and is not metal-backed.
- Q: Is the radio frequency emitted by Walabot DIY 2 safe?
A: Yes, Walabot DIY 2 uses radio frequency (RF) technology that is approved by the FCC and CE. The radio waves emitted by the device do not pose any health threat.

- Q: Where can I get support for Walabot DIY 2?
A: If you have any issues or questions, you can contact Walabot support by emailing support@walabot.com.

INSTRUCTION

- Please remember that if you have any issues or questions at any time, you can contact Walabot support:
support@walabot.com
 - Walabot DIY 2 connects to your phone via its own Wi-Fi network and interfaces with your phone via a free app. Walabot sends and receives radio frequency signals to detect objects inside walls. The app and phone process the data to create visual representations of the objects.
 - The app is available from the Google Play Store and the Apple App Store.
Please search for “Walabot DIY App”.
 - We regularly update the Walabot DIY app with new features, advanced capabilities, and improved user experience. These updates can be downloaded from our app page (Walabot DIY) on the Google Play Store or the App Store by selecting “Upgrade”.
 - Walabot DIY 2 detects objects up to a depth of 4 inches /10 centimeters in drywall. It detects wood and metal studs, stud centers, metal pipes, PVC/plastic pipes, wires and conduits.
 - It can also detect movements, such as rodents running through the wall, termite nests, and beehives.
 - Walabot DIY 2 can be used on walls containing insulation as long as the insulation does not contain metal and is not metal-backed.
 - Walabot DIY 2 uses radio frequency (RF) technology that is approved by the FCC and CE and can be used without limitation. The radio waves emitted by the device do not pose any health threat.
