Frequently Asked Questions

Q: How long does it take to activate the eSIM?

A: The eSIM activation process usually takes a few minutes to complete.

Q: Can I use the eSIM on devices other than an iPhone?

A: Yes, the eSIM can be used on other eSIM-enabled devices as well, not limited to iPhones.

Q: What if I encounter issues during the activation process?

A: If you face any difficulties during activation, please contact our customer support for assistance.

Introduction

- This guide outlines the eSIM Activation steps for a user who has purchased an eSIM on the mobile version of the Shop.
- They will be using the manual Activation Codes to install the eSIM.

Activation Codes As Displayed on the Online Shop

Once the eSIM has been purchased on the Shop and the "Download Manually" button has been clicked, the Activation Codes (SM-DP+ Address and Activation Code) displays.
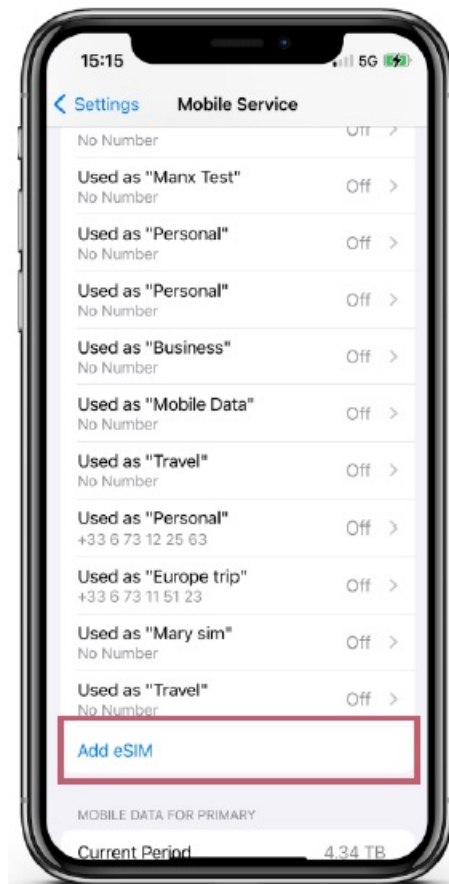

Settings
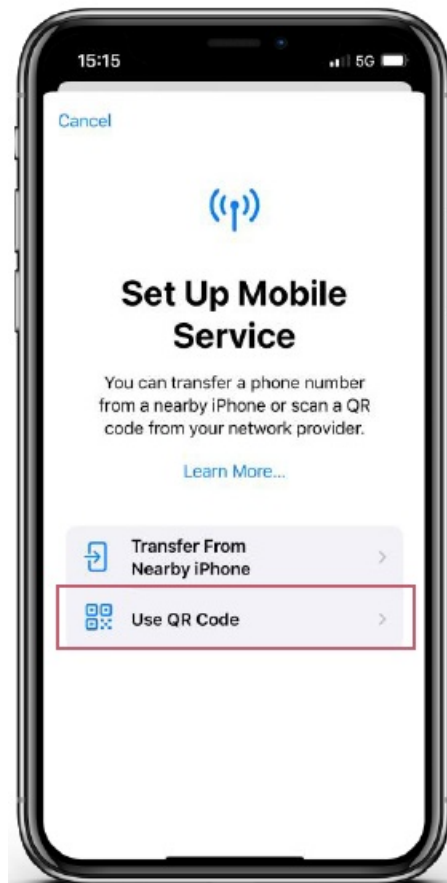

In the settings on your device, select "Mobile Service".

Mobile Service

Once you are in the "Mobile Service" screen, select "Add eSIM".

Add eSIM

From the "Set Up Mobile Service" screen, select "Use QR Code".

Scan QR Code

- The device camera will then open up on screen.
- You can select "Enter Activation Code" to input the Manual Activation Code.

Enter Activation Codes

- The Activation Codes (SM-DP+ Address and Activation Code) can be copied and pasted from the Order Confirmation screen on the Online Shop.
- The codes must be copied from the Shop into the phone settings one at a time.
- Once this is complete, click "Next" in the top-right corner of the phone screen.

Activate eSIM

Click "Continue" to activate and install the eSIM to the device.
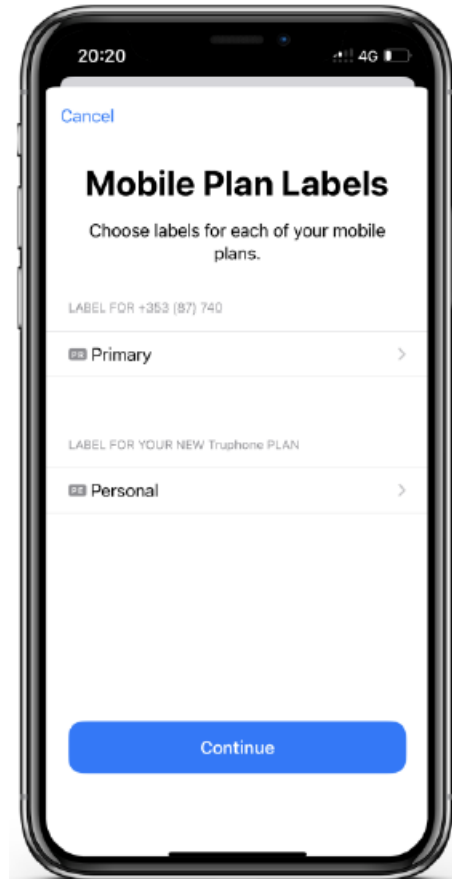

eSIM Activating

The eSIM will then begin to activate and install. This can take a few minutes.

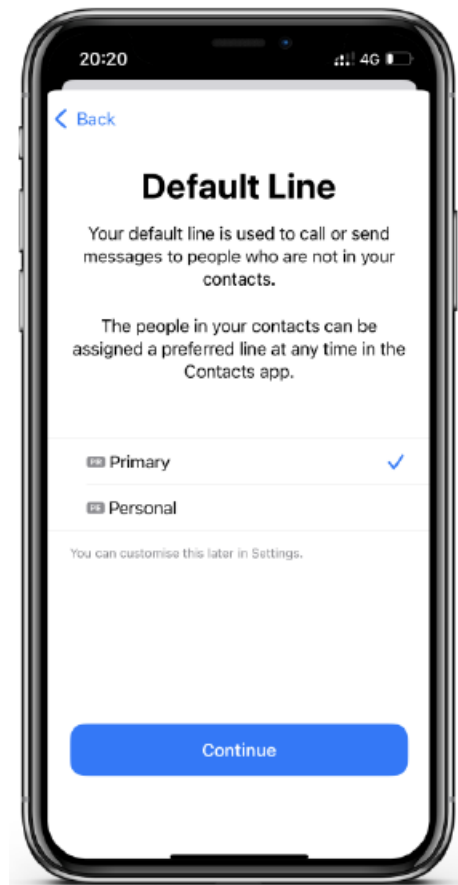

Mobile Plan Labels

- Once the activation is complete, you can choose what you want to use your new eSIM for.
- Mobile Plan Labels allow you to choose a name or label for your new eSIM so it is easily identifiable.
- Once you have done this, click "Continue".

Default Line

- You will be asked to choose which SIM you wish to use for your Default Line, which is used for sending SMS messages and making calls.
- You can choose between your new eSIM and any other SIMs that are currently active in your device.
- Once you have done this, click "Continue".

iMessage & FaceTime

- You will be asked to choose which SIM you wish to use for your iMessage and FaceTime.
- You can choose between your new eSIM and any other SIMs that are currently active on your device.
- Once you have done this, click "Continue".

Mobile Data

- You will be asked to choose which SIM you wish to use for your Mobile Data.
- You can choose between your new eSIM and any other SIMs that are currently active on your device.
- Once you have done this, click "Continue".

eSIM Activated and Switched On

- Once set-up is complete, you can return to the "Mobile Service" screen to see which of your SIMs are active and inactive.
- From here you can click on your active eSIM to see more details about it.

eSIM Details – Data Roaming

To turn on Mobile Data for your new eSIM, you must click on the eSIM and switch Data Roaming to on.
