Walmart SW001 Rechargeable Remote Wireless Switch Lite Controller Gamepad Joypad

Product Information

The Wireless Controller for N-SL, Model NO.SW001 is a versatile gaming controller designed for use with consoles and PCs. It features Bluetooth connectivity for wireless gameplay and also supports wired connections. The controller has a motor function that provides vibration feedback during gameplay. It also includes a TURBO function for rapid button inputs. The controller is equipped with LED indicators to display various status and connection information.

Product Usage Instructions

Bluetooth Pairing Mode

1. Step 1: Ensure the controller is turned off.
2. Step 2: Turn on the console or PC's Bluetooth function.
3. Step 3: Press and hold the HOME button on the controller for 3-5 seconds.
4. Step 4: The LED indicators (LED1-LED4) on the controller will flash quickly, indicating it is in Bluetooth pairing mode.
5. Step 5: Once the controller is successfully connected to the console or PC, it will vibrate, and the corresponding channel indicator will remain steady.

Console Mode Wired Connection

1. Step 1: Enable the wired connection option of the PRO controller on the console.
2. Step 2: Place the console into the console base.
3. Step 3: Connect the controller to the console using the data cable.
4. Step 4: The controller will automatically connect to the console.
5. Step 5: After disconnecting the data cable, the controller will automatically reconnect to the console via Bluetooth.

Wired Connection in N-SL Mode

1. Step 1: Enable the wired connection option of the PRO handle on the N-SL host.
2. Step 2: Place the console into the base.
3. Step 3: Connect the handle to the console using the data cable.
4. Step 4: Press any button (A/B/X/Y/ZL/ZR/R/L) on the handle to automatically connect it to the console.
5. Step 5: After disconnecting the data cable, the handle will automatically reconnect to the console via Bluetooth.

Windows (PC360) Mode

1. Step 1: Turn off the controller.
2. Step 2: Connect the controller to a PC using a USB cable.
3. Step 3: The PC will automatically install the driver.
4. Step 4: The LED2 on the controller will remain on, indicating a successful connection.
5. Step 5: The controller will be recognized as an "Xbox 360 controller for Windows" in the PC's settings.

TURBO Function Setting
The controller includes a TURBO function for rapid button inputs. To adjust the motor intensity:

- To increase intensity: Press the "turbo+" button and push the left joystick upwards. Each press increases intensity by one gear.
- To decrease intensity: Press the "turbo+" button and push the left joystick downwards. Each press reduces the intensity by one gear.
- The motor intensity has four levels: 100% strength, 70% strength, 30% strength, and 0% strength. The default setting is 100% strength.

Power Off/Charge/Reconnect/Reset/Low Battery Alarm

- To power off the controller: When the controller is turned on, Press and hold the HOME button for 5 seconds.
- The controller will automatically shut down when it fails to connect after 30 seconds in the back-connecting state.
- When the controller is connected to the machine, it will automatically shut down if there is no button operation within 5 minutes.
- When the controller is turned off and plugged into the adapter for charging, LED 1-4 will flash. After fully charged, LED 1-4 will turn off.
- When the controller is plugged into a USB port, the corresponding channel light will flash slowly and remain on when fully charged.
- To reconnect the controller to the console: After the controller is connected to the console and the console is in a sleep state, press the HOME button to wake up the console. The console wakes up in about 3-10 seconds.

Product Description

This product is a wireless Bluetooth gamepad, which belongs to the wireless blue control gamepad (using wireless Bluetooth technology). It can be remotely controlled and easy to operate. It can be used for the N-SL console. It also supports PC X-input PC games.
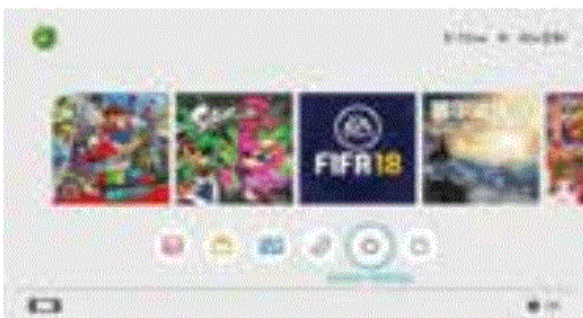

Product Parameter

- Voltage: DC 5 V

- Working Current: <20mA

- Sleep Current: 9uA

- Battery Capacity: 550mAh

- Use time: About 10 hours

- Charging time: About 3.5 hours

- Vibration Current: 70-120mA

- Charging Current: About 180mA

- USB length: 70 cm/2.30 ft

- Bluetooth Transmission Distance <10m

Pairing and Connecting

**Bluetooth connection in mode:**

- Step 1: Turn on the console, click the System settings menu button on the main page interface (Figure 1), enter the next menu option, click the Airplane Mode option (Figure 2), and then click the Controller Connection (Bluetooth) (Figure 3) option Turn on its Bluetooth function (Figure 4).

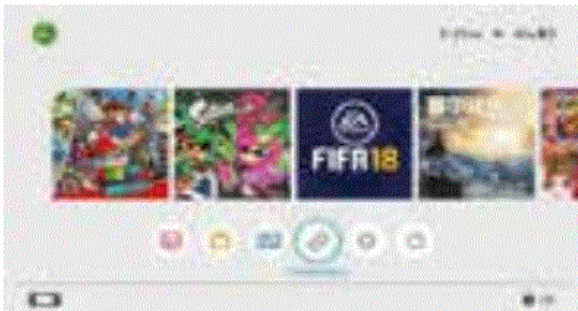

①

②

③

④
