### SD Card Reader

## Questions and Answers

Q: Why Mac asks to allow an accessory to connect?

A: When a new USB or Thunderbolt accessory connects to your Mac laptop with Apple silicon and macOS Ventura or later at the first time, you will get an alert that asks you to allow the accessory to connect. This is the security policy of Mac system. You need to choose ALLOW before you can use them. If you choose DON'T ALLOW, your Mac won't recognize the accessory or give it access to the data on your Mac, and you'll be asked again to allow it to connect on the next time you use the accessory.

Q: What is QTG?

A: OTG is On-The-Go. OTG is mainly used for connecting different devices or mobile devices for data changes. A OTG compatible device is competent to act as a controller or a host of the other USB devices.

Q: When using, can't get transfer rate 5 Gbps?

A: Our SD card reader indeed can support 5 Gbps Speedy access at USB-A or USB-C upstream port. The practical transfer rate depends on data interface, storage card format and operating system, and in most cases is the TF/ SD card itself that can't reach ideal speed.

Q: What about UHS- II cards? Any issues with those?

A: UHS- II cards can also read in WALNEW SD card adapter, but please kindly note that UHS-II cards will also read at speed of UHS-I.

Q: Maximum reading capacity of the storage card?

A: Up to 2TB.

Q: How to remove the Micro SD card once inserted?

A: Push Push function means you just need to slightly press the inserted card, and the internal structure of the adapter will automatically eject it out to make you easily remove.

Q: Why can't save files to SD or Micro SD card?

	Compatibility
ended	only support on Mac (ca Windows/Android/Linu:
32	support on Mac/Window single file size limit is 4k
	support on Mac/Window no single file size limit
	support on Windows, re save files to it) on Mac//

A: The compatibility of different formats of the SD or Micro SD card used on different systems is as follow table, please check and choose the appropriate format you need to use.

Q: What's the warranty of this Card Reader?

A: We offer 18-month warranty for this Card Reader.

If there is any question, please feel free to contact us any time. We will reply you within 24 hours.
