Barcode Maker

BarcodeFactory – Error: missing Wasp / Barcode Factory OCX file, when opening Access database after installing or uninstalling BarcodeFactory

Scott Barnett – 2017-04-10 – in BarcodeMaker

Open the Access database on your computer, then right-click on the toolbar area and select Customize.

On the Toolbar tab, select WaspBarcodeFactory and delete it.

Save the file and try it out on other computers.

After you open the database, press Alt-F11, then go to Tools / References, then uncheck the Missing reference.
