Filter Installation:

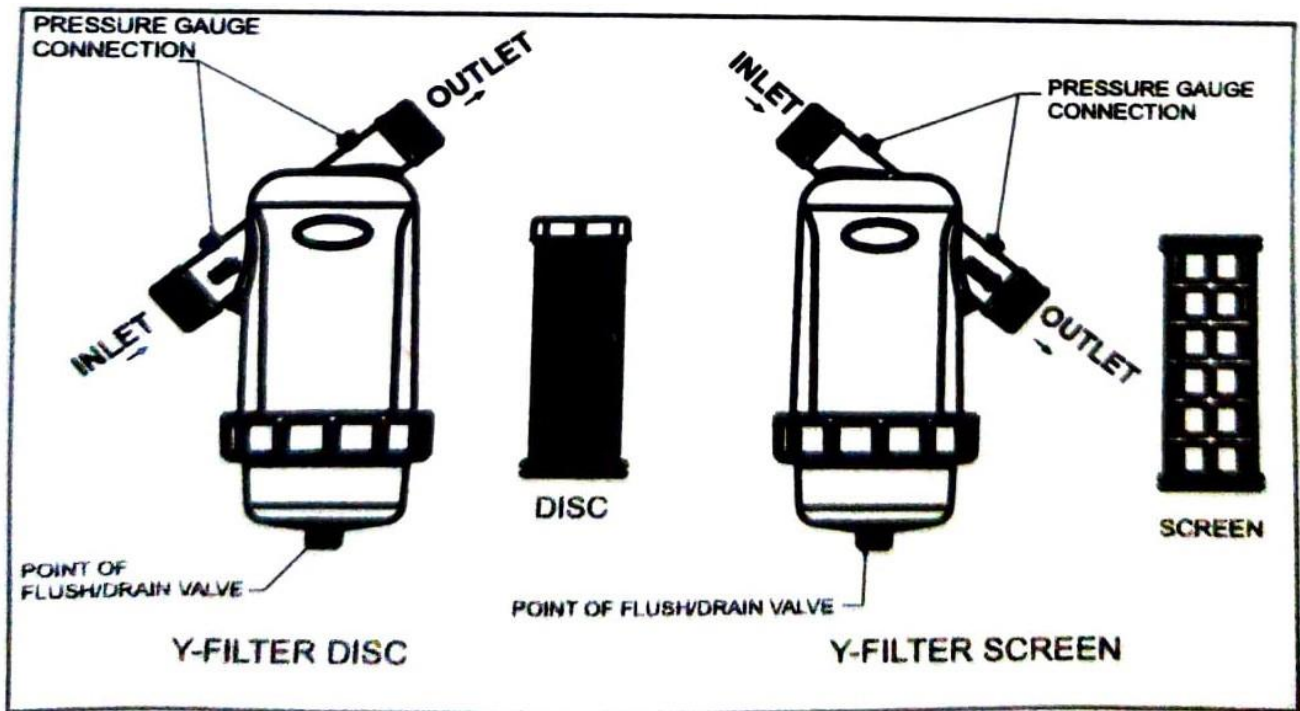

- Use standard fittings while installing the filter in piping network.
- Ensure correct inlet/outlet direction.
- The direction of water flow can also be seen from arrow on the filter's inlet/outlet arms where "screen" is mentioned above the arrow. That is the direction of flow of water. You can also understand the connections by looking at the picture below. · Never open the filter when it is under pressure.

Cleaning:

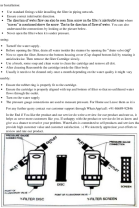

- Turn off the water supply.
- Before opening the filter, drain all water insider the strainer by opening the "drain valve cap"
- Now to open the filter, Remove the bottom housing cover (Cup-shaped bottom lid) by rotating it anticlockwise. Then remove the filter Cartridge slowly.
- Use a brush, some soap, and clean water to clean the cartridge and remove all dirt.
- After cleaning Reassemble the cartridge inside the filter body.
- Usually, it needs to be cleaned only once a month depending on the water quality it might vary

Assembly:

- Ensure the rubber ring is properly fit to the cartridge.
- Ensure the cartridge is properly aligned with top and bottom of filter so that no unfiltered water flows through the outlet.
- Turn on the water supply
- The pressure gauge connections are used to measure pressure. For Home use Leave them as it is For any further query contact our customer support through WhatsApp/call: +91-86689-92846 In the End if You like the product and our service do write a review for our product and rate us, it helps us serve more customers like you. If unhappy with the product or service do let us know and give us a chance to resolve your problem. WaterLabs is committed to sell products and services that provide high customer value and customer satisfaction. We sincerely appreciate your efforts to review and rate our product.
