INTERFACES

1. Display Port
 - Standard HDMI port
2. Touch Port
 - Micro USB port for touch or power
3. Backlight Switch
 - Switch for turn on/off the power of LCD backlight

DISPLAY SETTING

To use with the Raspberry Pi, you need to manually set the resolution by modifying the config.txt file, The file is located at the boot directory. Some of the OS doesn't have config.txt file by default, you can create an empty file and name it as config.txt.

1. Write Raspberry Pi OS image to the TF card by Raspberry Pi Imager which can be downloaded from Raspberry Pi official website.
2. Open the config.txt file and add the following lines to the end of the file.
 - hdmi_group=2
 - hdmi_mode=87
 - hdmi_cvt 800 480 60 6 0 0 0 hdmi_drive=1
3. Save the file and eject the TF card.
4. Insert the TF card into the Raspberry Pi board.

CONNECTION

Connect to Raspberry Pi 4

Connect to Raspberry Pi 3B+

CONNECTION

Connect to Raspberry Pi Zero W

Note: You need to config the Raspberry Pi according to Display Setting before powering the board.

1. Connect HDMI cable

1. **For Pi4:** Connect the micro HDMI adapter to Raspberry Pi 4, then connect the standard HDMI cable to Pi 4 and the display.
