WAVLINK CAH5 Active DP to HDMI Adapter User Guide

WAVLINK CAH5 Active DP to HDMI Adapter
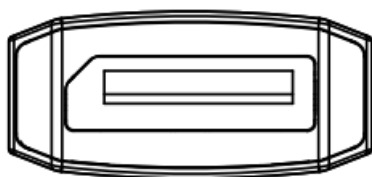

Contents

In the Box

- 1 x DisplayPort to HDMI 4K@60Hz Active Adapter
- 1 x QuickSlartGuide

Features

- Being great for PC-to-TV streaming, it's good at taking DP signal out to a HDMI Projector or monitor, and the resolution is up to 4K@60Hz.
- Being extremely compact, it's convenient to tuck it into your bag or pocket.
- Being made of premium material, it's of great signal quality and durability.
- Audio output formats: 8-ch LPCM, compressed audio and HBR.
- Plug and play, no driver is needed.
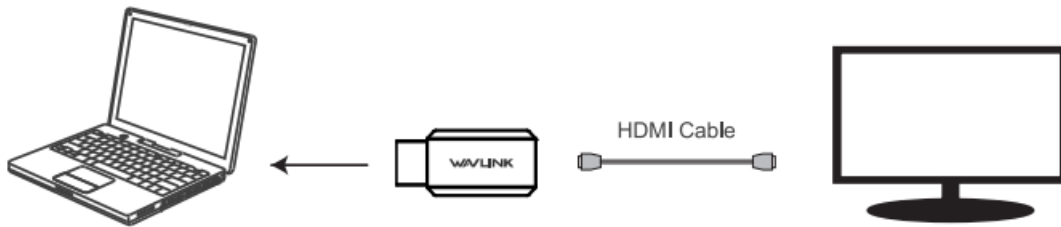

Overview

- Display Port

- HDMI

Connect to the Host

- **Step 1**: Plug the DisplayPort into the DisplayPort on the Laptop/Desktop.

- **Step 2**: Plug the HDMI cable into the HDMI port of the Adapter.
- **Step 3**: Plug the other end of the HDMI cable into the HDMI port on the Monitor/Projector/HD TV.

Note:

The converter does not support bi-directional transfer, it converts DisplayPort signal to HDMI monitors, and can not converts HDMI signal to DisplayPort devices.

Q & A

Q1: What are Active DisplayPort Adapter and Passive DisplayPort Adapter?

A1 : An Active Adapter performs the conversion from DisplayPort lo VGA, DVI or HDMI instead of the source device. The Adapter converts both single-mode and dual-mode output, so the video source don't have to support DP++. The Active Adapters are ideal for use with graphic cards that do not output dual-mode signals.
In contrast, an Passive Adapter is ideal for use with the video source that supports dual-mode DipslayPort(DP++), the DP++ video source performs the conversion from DisplayPort lo VGA, DVI or HDMI instead of the Adapter.
