## Notice

1. Make sure the pin in the port does not sag or curve, so as not to affect its pluggable function.
2. Keep liquids away from the product to prevent mechanics damage.
3. Please keep the product in a dry, clean environment.

## Tips

1. When the power supply of the host device cannot support all ports working, please charge the dock through USB-C/F to make it run smoothly.
2. HDMI and DP Ports: Only can be used when the USB-C port of your host device (laptop/smartphone/tablet) can output video.
3. USB-A port is not compatible with Apple SuperDrive/Nintendo and it is not recommended that you charge a tablet or iPad through it.
4. Some laptops may have a limitation on power output and it is recommended that you only connect an HDD/SSD external hard drive at a time.
5. For security, please use the adapter or cable that is original or owns a Third-party certification to charge your laptop.

## Q & A:

Q1. How to figure out the maximum resolution (DP1.2/DP1.4) my laptop supports?

A1.

1. Firstly check the Graphics card version of your laptop; \*Find “display adapter” in “Device Manager”.
2. Check the information of Intel processors for details

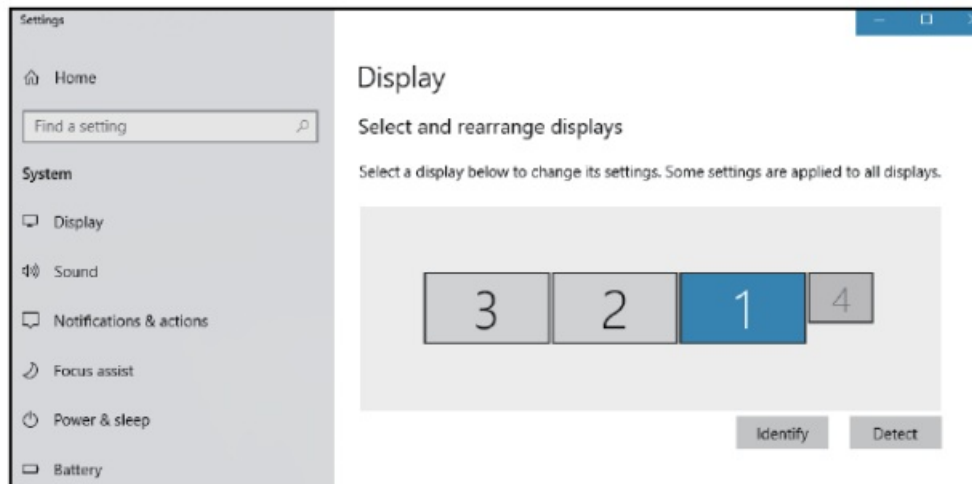

<https://www.intel.com/content/www/us/en/support/products/80939/graphics-drivers.html>

Q2. Why doesn't my third monitor display when I set the triple display mode>

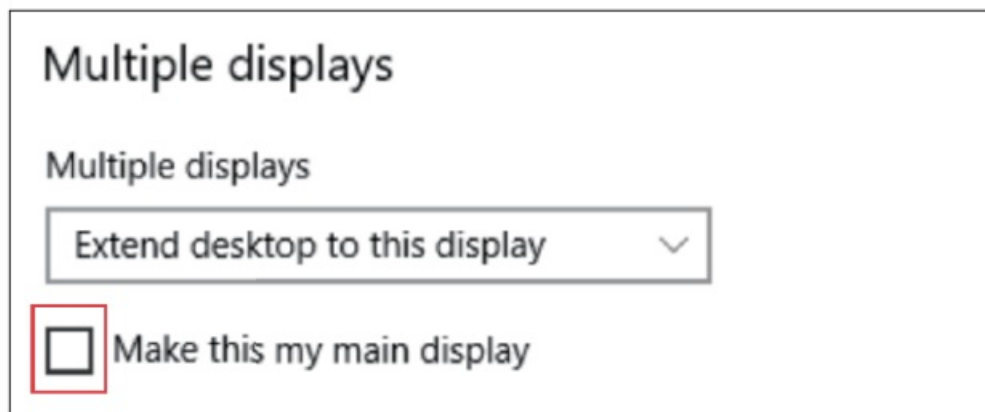

A2.

Step 1: Choose the main display

1. Right-click to select “Display settings”.
2. Choose a monitor display and scroll down to “Multiple displays”

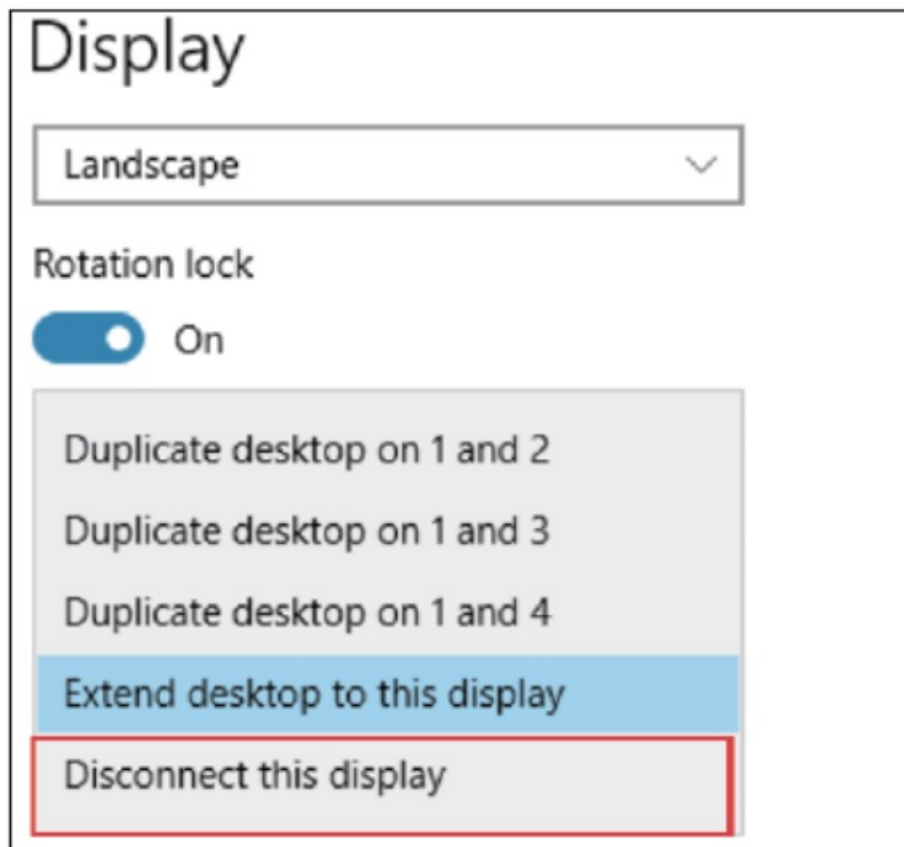

3. Mark “Make this my main display”.

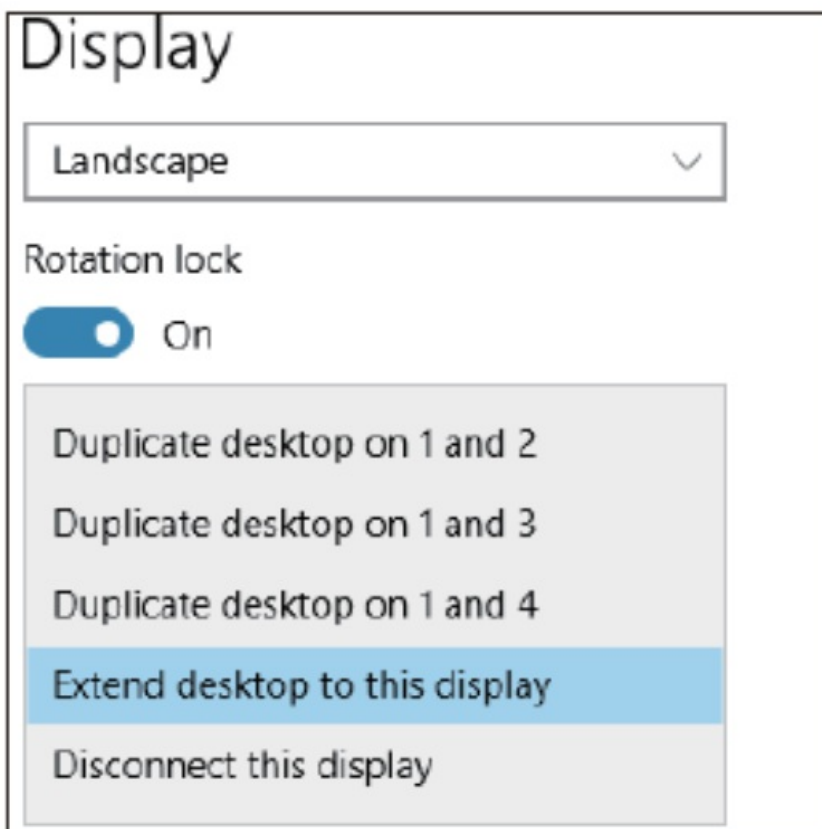

Step 2: Disconnect laptop display

1. Select the laptop display (“1” is the default display for laptop) and scroll down to “Multiple displays”.
2. Select “Disconnect this display”, then laptop display panel will become disconnected.

Step 3: Turn on the third monitor display

1. Choose the remaining monitor display then scroll down to "Multiple displays"
2. Select "Extend desktop to this display" to enable this display.

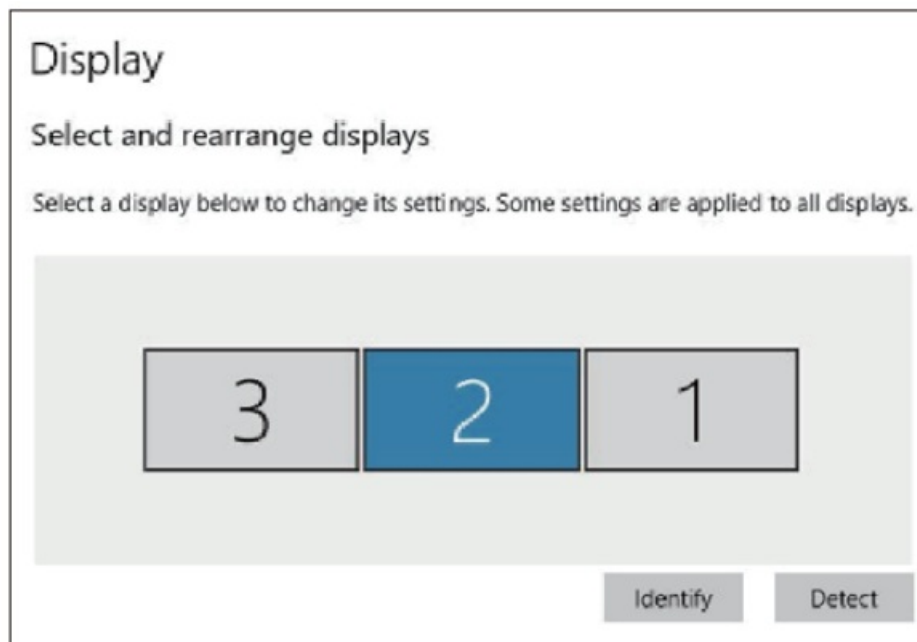

Q3. Why are my 2K and 4K monitor display abnormal when I set dual or triple display mode?

A3. The resolution of some branded monitors cannot be adjusted automatically, the “Active signal resolution” of which is different from Windows setting “Desktop resolution”, hence you better set the resolution at the same value.

1. Right-click and select “Display settings”
2. Select your monitor display and click on it, then scroll down to select “advanced settings”.
