2. Turn off all electronics in your vehicle (air conditioner, heat, radio, lights, chargers, etc) to prevent any damage to your Weego Memory Saver.
3. Make sure your vehicle has been off for at least 20 minutes before using your Memory Saver – this is how long it takes for your computer to fully shut down.

## Ready, Get Set, Weego!

1. Connect your Memory Saver cable to your vehicle's OBDII port

2. Connect the other end of the Memory Saver cable to the 12V/10A port on your Weego Jump Starter Battery+.

3. Power ON your Weego. You should see the Red LED Indicator Light on your Memory Saver illuminate, indicating a good connection.

4. You may now disconnect the vehicle's battery.
5. After the new battery is installed, disconnect the Memory Saver from your Weego, then disconnect the Memory Saver from your vehicle.

## Warnings

1. DO NOT start your vehicle while your Weego is connected to your vehicle through the Memory Saver.
2. Keep your Memory Saver clean and wipe with a dry cloth after each use.
3. When you disconnect your vehicle's battery, the battery connector cables are still live and will receive some power from your Weego. Please take caution and do not let them touch one another, or any conductive material, during that time.
