APP Use Tutorial

How to add the lock to where the app

- You can scan the qr code of the lock to bind the lock. the person who first binds the lock is the lock owner, and has all permissions.
  - (Note: the owner can manager members/guests, set passwords, and hand over the lock) (The owner/member who has the permission can add [Member] or [Guest]
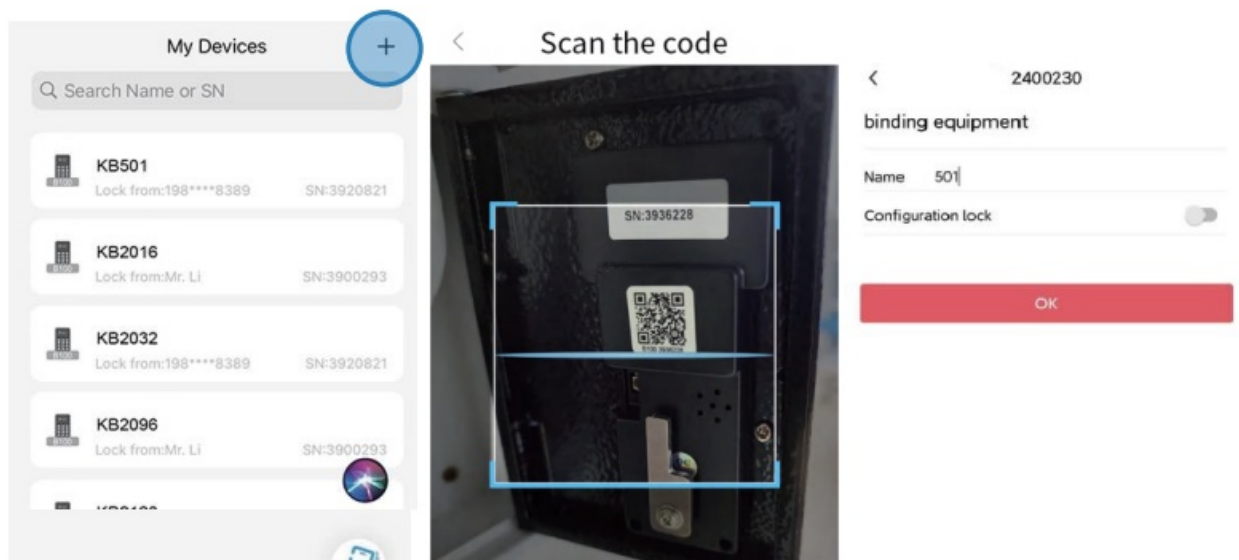

How to share access rights to others

- The owner /member who have permission can add [Member] or [Guest]
- (Note: when adding a member , can give the permissions , including member manager, guest manager, set password,check record .)
- Open [Member] and click on the "+" to add member.
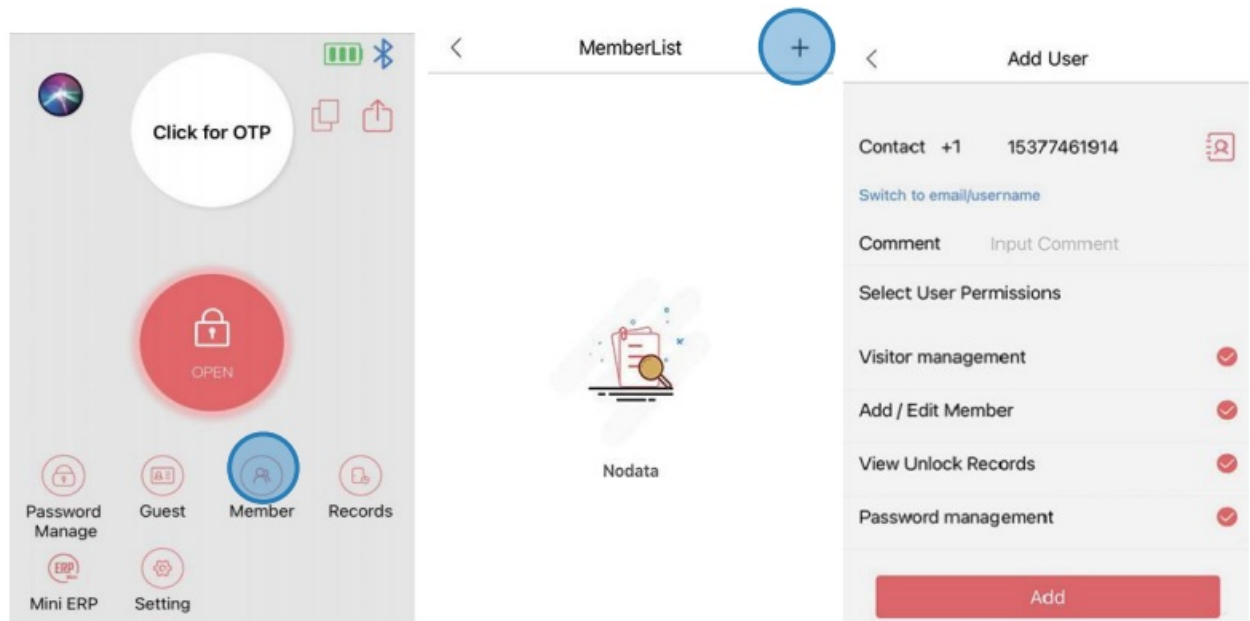

After the members added, they can login the account and see the lock on the [My Devices] page. if don't see, pull down to refresh.

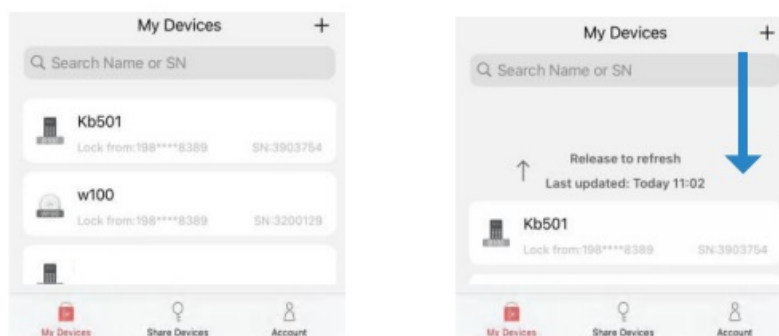

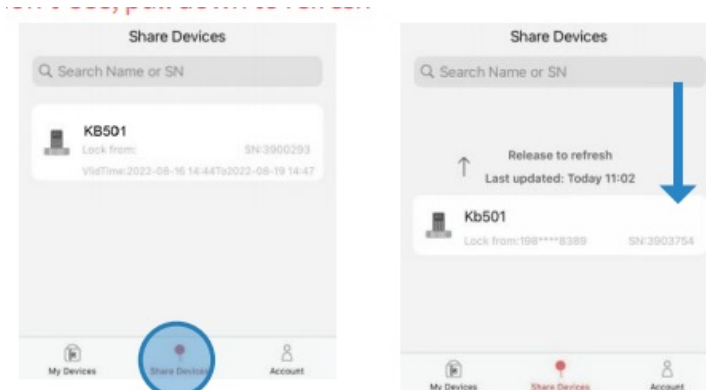

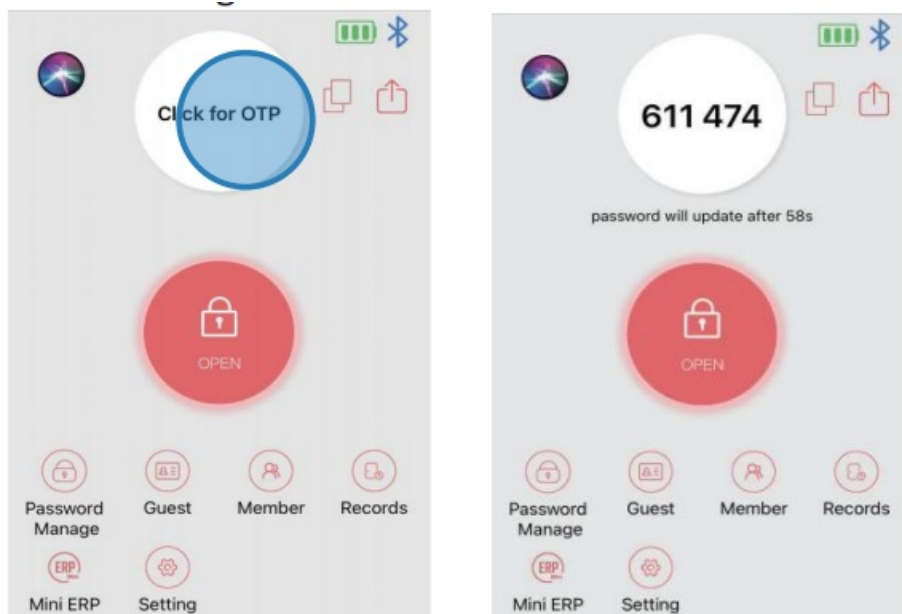

Open [Guest] and click on the "+" to add Guest.

(When adding guest, you can also set the access time. You don't need to delete the guest , the lock can not opend when time expired when time expired)
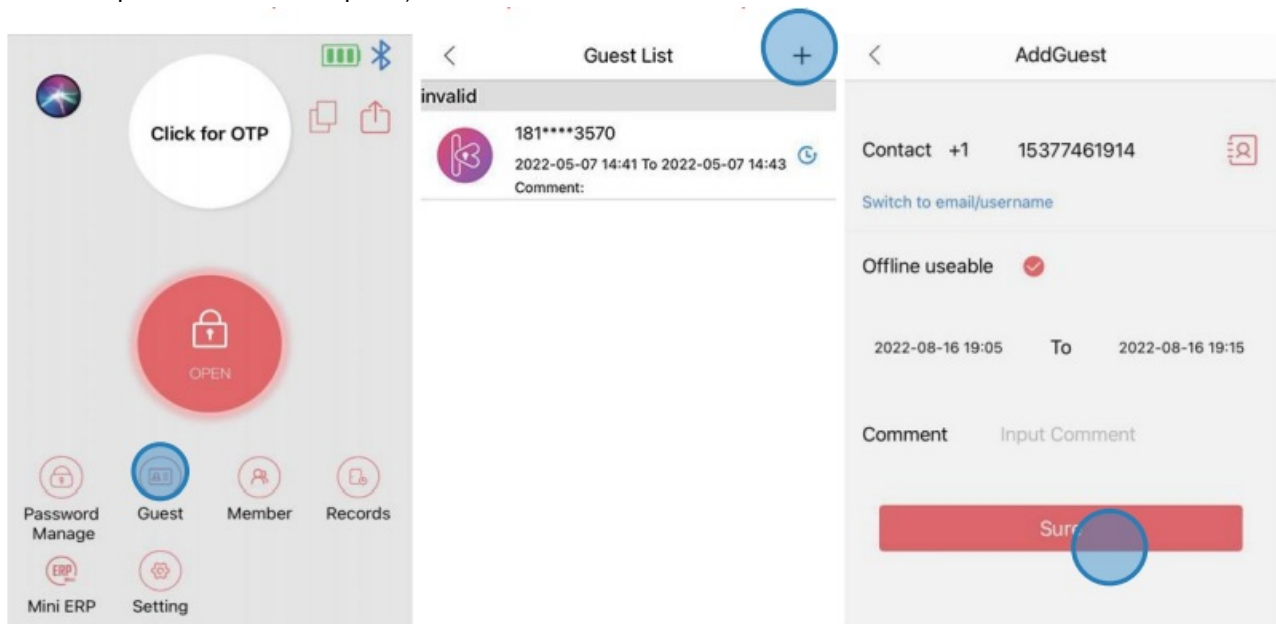

After the guests added , they can login the account and see the lock on the [share Devices] page. if don't see, pull down to refresh.

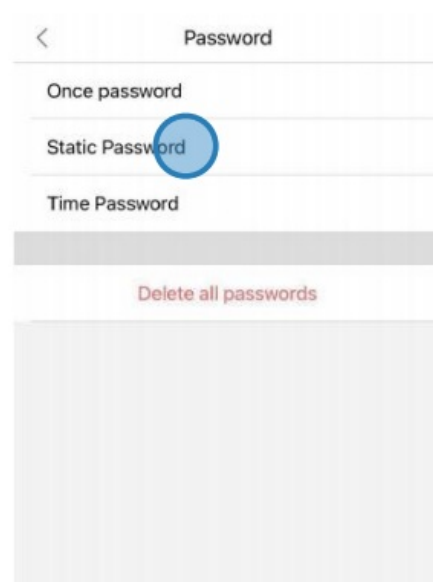

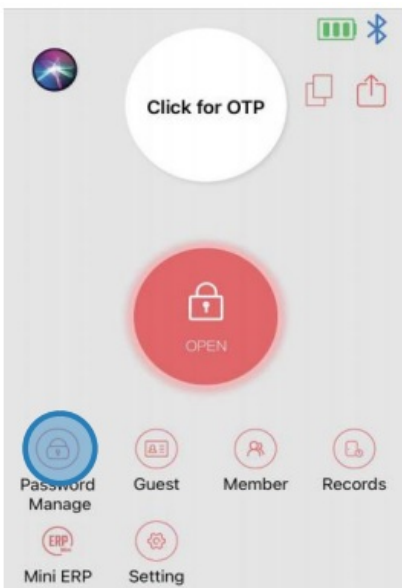

How to set password

- Dynamic password change each minute.

- Period password (you can set the password validity time)
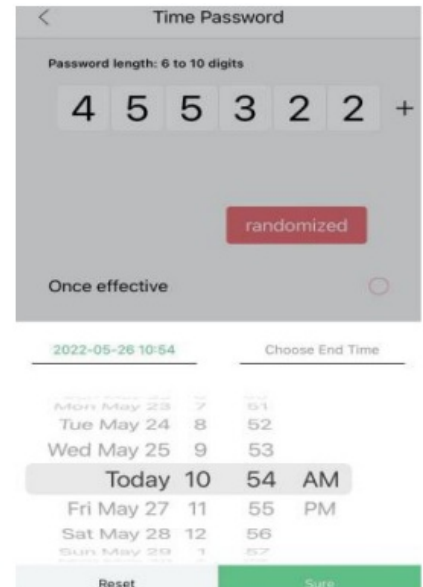

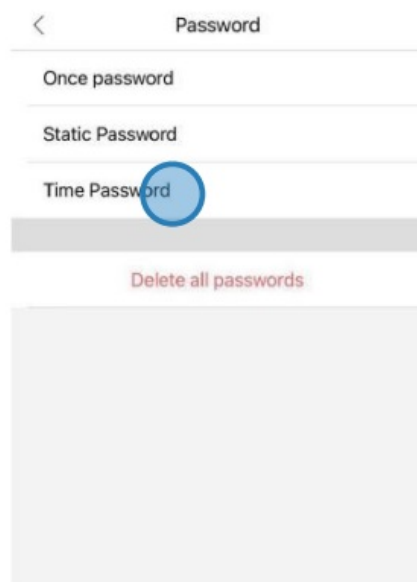

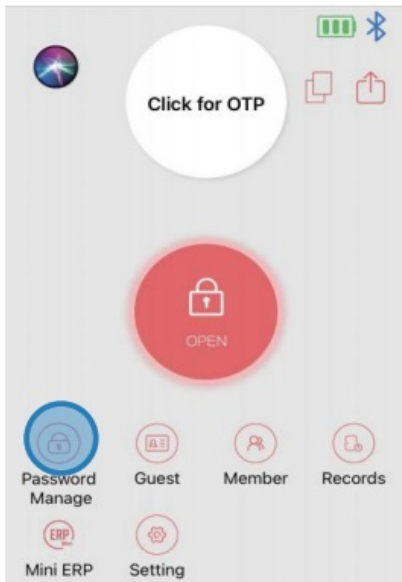

- Static password.
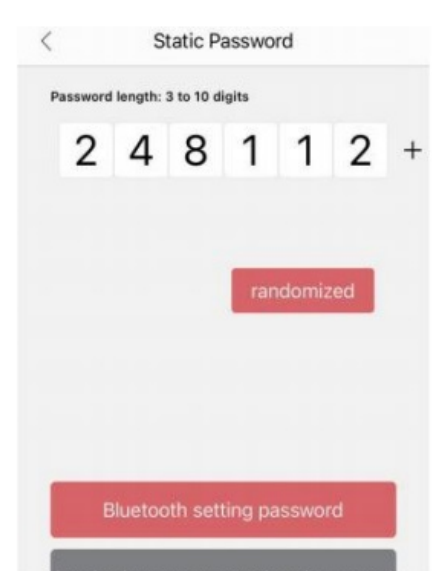

Two of Unlocking methods

1. **Bluetooth unlocking**

   (If your lock page is [click for OTP], click left lower corner icon [Bluetooth] to switch .)

2. **Password unlocking**

   (You can use static/period password unlocking that you set before .For dynamic password, click the center icon [click for OTP] to get)
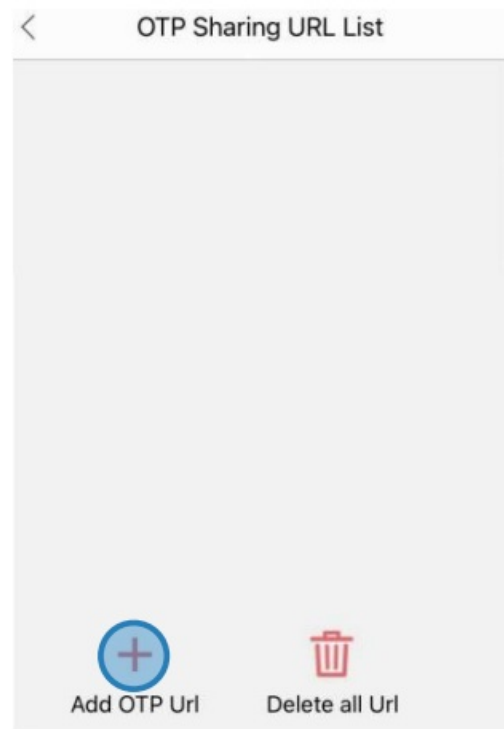

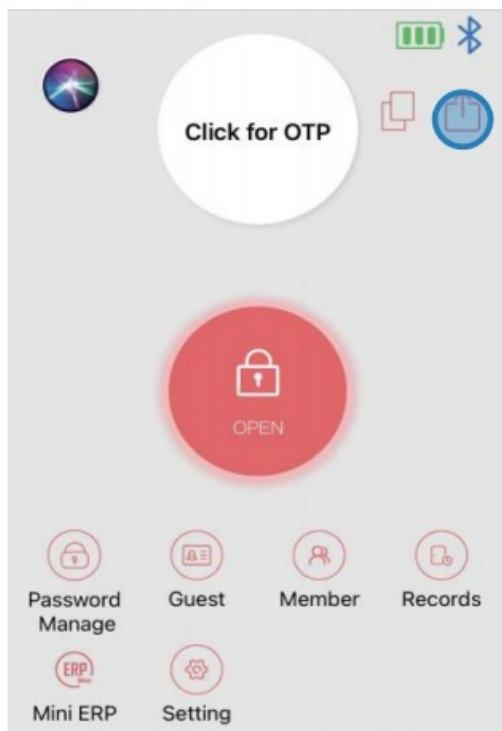

How to check record

The owner (member who have the permission) can check the records.

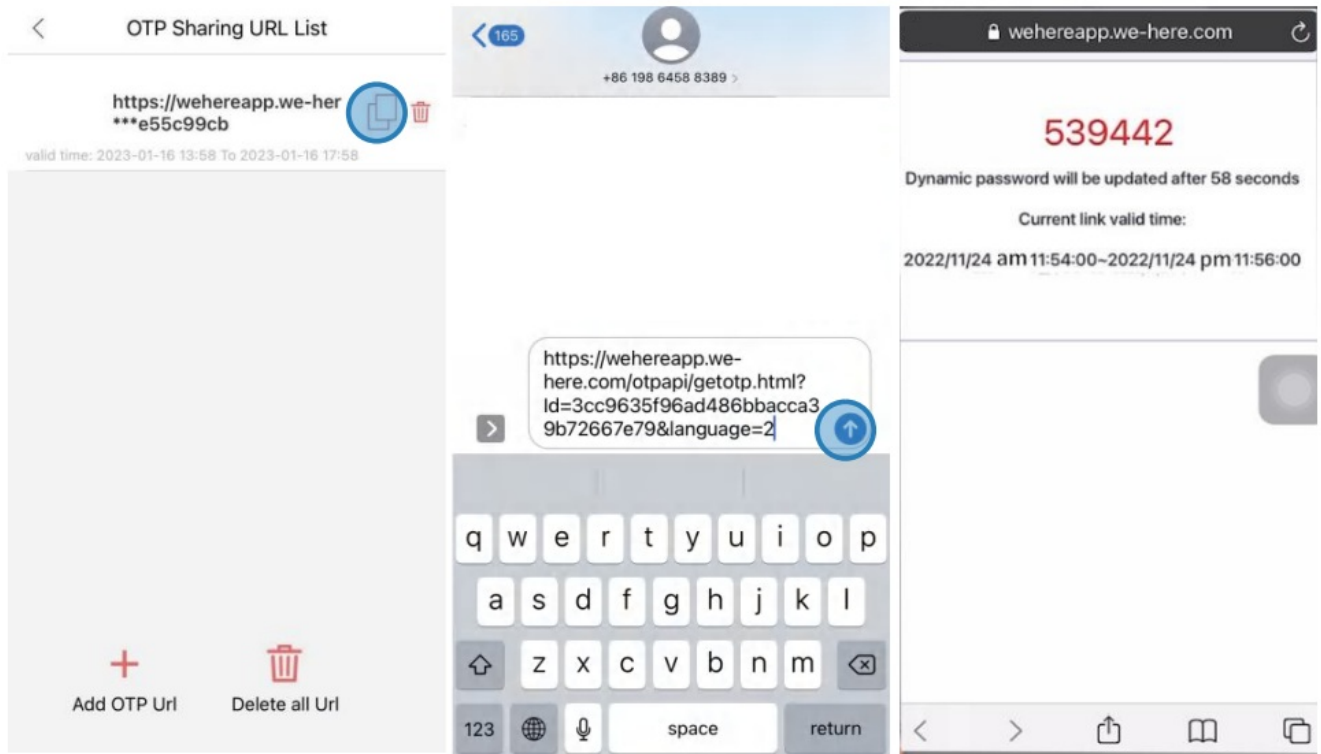

How to share Dynamic Password by URL

- Go to lock manage page, open [Share] icon,click on [Add OTP Url].

- You can set the Url access time by setting start time and send time. Click to save this url share.

- Click on [Copy] icon, then can copy the url message, and send this to your friend/guest by message.
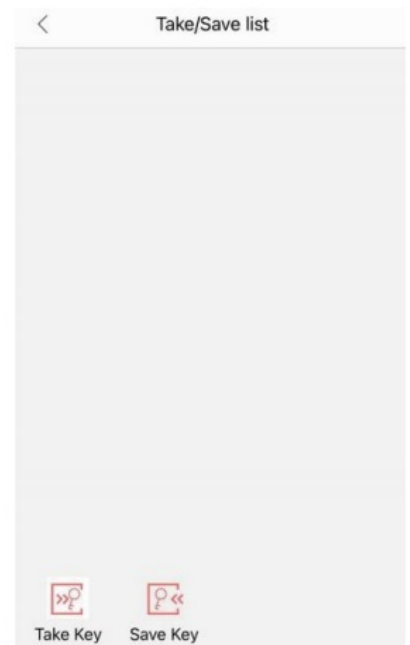

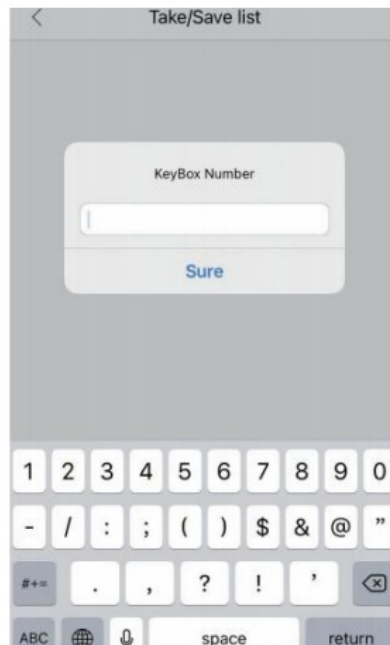

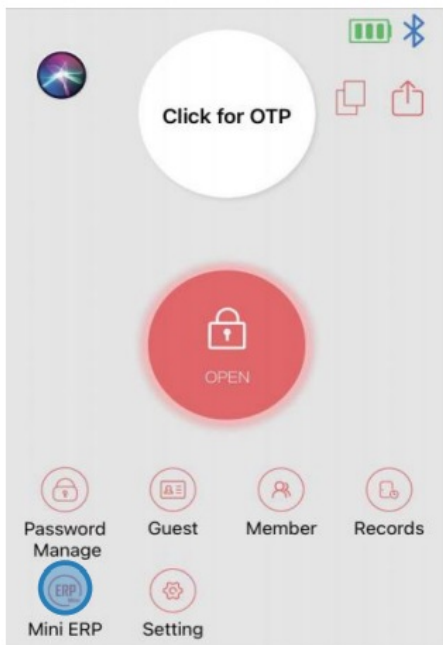

- You also can delete the Url shared, after you delete, the Url can not access anymore.

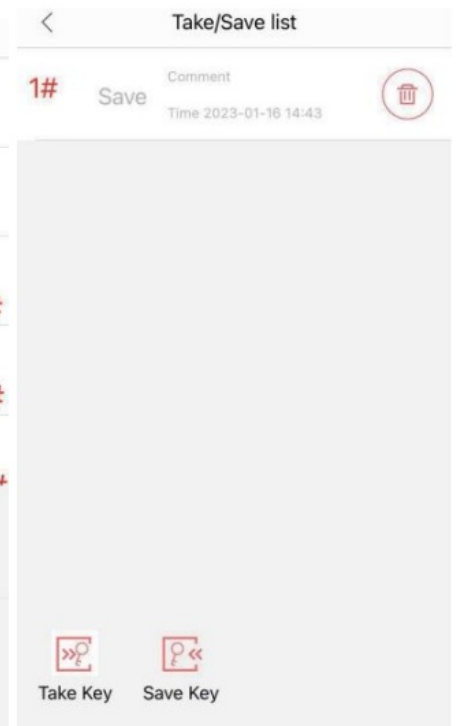

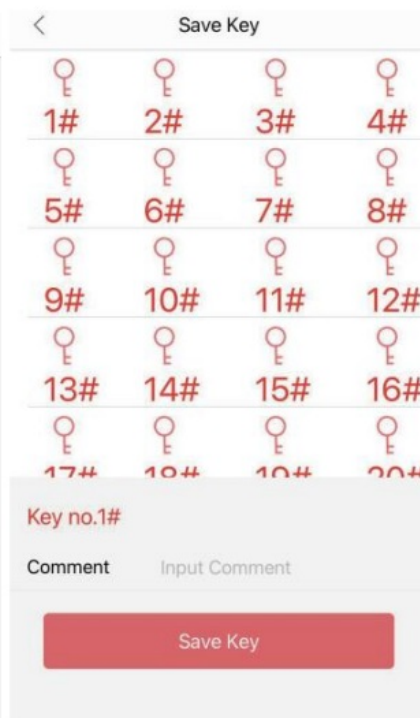

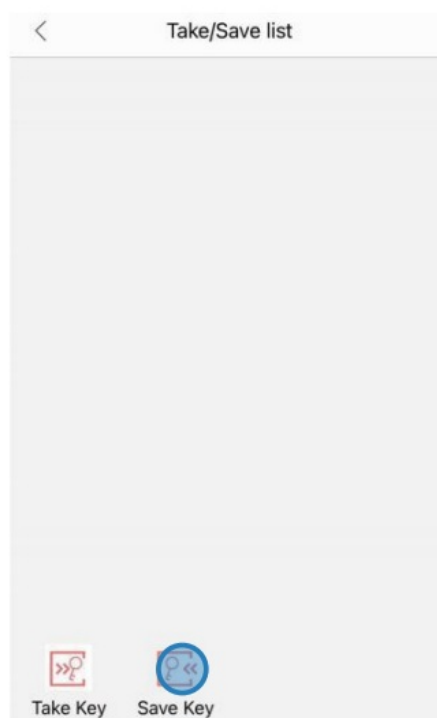

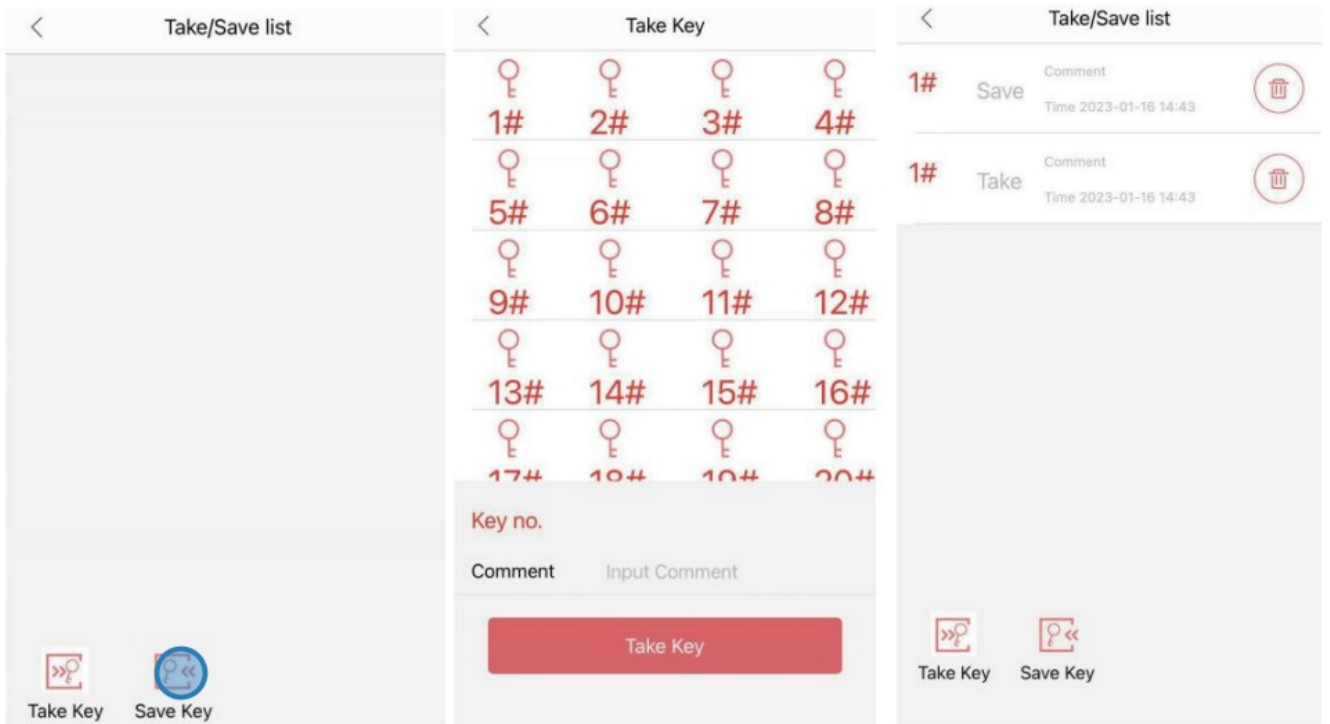

Mini ERP

- Go to lock manager page, open [MiniERP] ,enter your keybox position number

- Click [Save key] icon, choose key postion ,and input comment.

- Click [Take key] icon, choose key postion, and input comment
