These features make great places to store tools, supplies, and other things you need for work. Your tools and supplies are neatly stored and easy to get to, and the room isn't cluttered.

9. **Pegboard for Tool Organization:** The pegboard that comes with the set is a useful organizational feature that lets you hang tools, equipment, or supplies so they are easy to get to. You can easily reach power outlets with the 6.7-foot power cord, which means that everything you need at your desk is charged.

11. **Inbuilt Overhead Fluorescent Light:** An overhead fluorescent light illuminates the whole work area, so you don't need an extra light source to see your job. This feature is great for working on detailed tasks or in dark places because it gives you direct lighting that doesn't take up any room on your desk.

12. **Large Tabletop Size:** The 47.25" x 23.5" tabletop can hold up to 220 pounds, which makes it great for working on big projects or heavy things. You can work with confidence knowing that the table can handle heavy jobs without sagging or losing its structural integrity because it can hold a lot of weight.
