Introduction :

The WiFi Repeater is a combined wired/wireless network connection device designed specifically for small business, office, and home office networking requirements. It allows a wireless network to be expanded using multiple access points without the need for a wired backbone to link them. It also works well with other 11b/g and In protocol wireless products.

NOTE : If you need to 'the Wi-Fi Repeater, you need press and hold the reset button inside the tiny hole for' seconds.

Package Contents

Before you starting to use this router, please check if I there's anything missing in the package, and contact your dealer of purchasa to claim for missing items:

- 1 x Wireless-N Repeater
- 1 x RJ-45 Networking Cable
- 1 x Quick installation Guide

Getting Started

Setting up a Wireless Infrastructure Network

For a typical wireless setup at home (as shown below), please do the Mowing:

Wireless Repeater Mode

You will need WiFi AP/Router Internet access

Wireless AP Mode

You will need broadband Router Internet access

Connect the WiFi-Repeater to your Router/Switch with RJ-45 Cable

How to configure the WI-FI Repeater

You can configure the Wi-Fi Repeater by connecting it with your computer/aptop with enclosed RJ45 cable or wirelessly.

A. Configure the Wi-Fi Repeater wirelessly.

A1. Plug the Wi-Fi Repeater to a wall socket.

A2. Click on the network icon( or ) on the right bottom of your desktop. You will find the signal from the WI-FI Repeater. Click on 'Connect' and wait for a few seconds.

A3. Open web browser and type <https://192.168.10.1> in the browser's address box. This number is the default IP address for this device.

Note: Please check whether the WiFi-Repeater accord with factory default settings once you can't download <http://192.168.10.1>. If you are still not sure what reasons, you can reset the WiFi-Repeater, just need to press the reset button for 10 seconds, then try again.

A4. The login screen telow will appear. Enter the "User Name" and "Password" then click "or to lbgln. The default User name is "admin" and Password is sadmIn".

A5. After logging in, you will see the web page below: Click on 'Repeater' to continue.

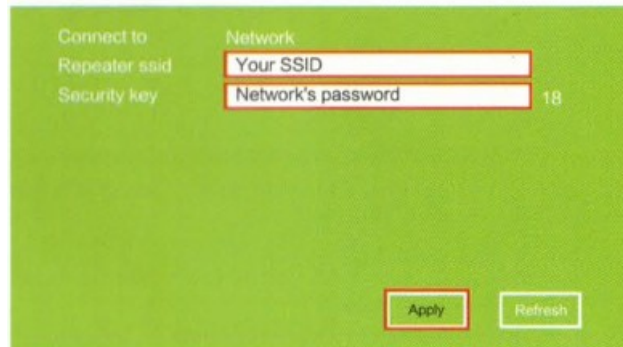

Wireless-N Wifi Repeater

A6. Select your Wireless SSID to continue.

A7. When you see below, please do not change any setting but only insert the key of your network.

Click on 'Apply' button, The Repeater will restart. Wait for a few seconds your Wi-Fi Repeater is ready for use.

- The default wireless SSID and Security key of Wi-Fi Repeater is same as your AP/router.

B. Configure the WI-Fi Repeater with RJ45 Cable.

1. Plug the Wi-Fi Repeater to a wall socket. Connect your computer 1 laptop with the Wi-Fi Repeater with enclosed RJ45 Cable.
2. Follow process A3 to A7 to configure your Wi-Fi Repeater.

Cancel

Click 'Browse...' or 'Choose File' button first; you'll be prompted to provide the filename of the firmware upgrade file. Please download the latest firmware file from our website, and use it to upgrade your router.

After a firmware upgrade file is selected, click 'Upload' button, and the router will start the firmware upgrade procedure automatically.

The procedure may take several minutes; please be patient.

NOTE: Never interrupt the upgrade procedure by closing the web browser or physically disconnect your computer from the router. If the firmware you uploaded is corrupt, the firmware upgrade will fail, and you may have to return this router to the dealer of purchase to ask for help. (Warranty voids if you interrupted the upgrade procedure).

Factory Default and Settings Backup, Restore

You can backup all settings of this router to a file, so you can make several copies of router configuration for security reasons.

To backup or restore router settings, please follow the following instructions:

Please click 'Save/Reload settings' located at the web management interface, then the following message will be displayed on your web browser.
