RIVAL Digital Game Scouting Camera

USER'S MANUAL

Battery Installation

NOTE: This product requires 8 AA batteries, which are not included.

1. Open the door at the bottom of the camera by unlatching the locking tab.

2. Locate the battery compartment and press the "OPEN" tab to the left to open.

3. Insert the batteries in the appropriate location corresponding to the +/-shown inside the door and above each

battery slot.

4. Push the latch to the left and push the door closed to secure the batteries in the compartment.

Installing SD Card

NOTE: This product requires an SD card to store images. The SD card is not provided.

BEFORE INSTALLING: If you are using an SD card from another camera, you must format the SD card in your computer prior to installing it in this camera. If you are using a new card, it may go directly into this camera without any formatting.

1. With the camera powered off, load the SD card with the label facing up and the grooves inserted first.
Power

ON:
1. Press and release the power button on the main control panel.

2. A battery icon on the screen will display the charge level. If the batteries are properly charged, the camera is ready for use.
```
AM 12:00:30
01/01/2017 ▮100%
```

OFF:

1. Press and release the power button to wake up the screen.
2. Once the screen is awake, hold down the power button until the screen turns off.
Power Save/Ready Mode

1. If no buttons are pressed for 30 seconds after turning on the power, the screen will turn off and enter Power Save / Ready Mode.
2. **LED Status Light:** During the first 30 seconds of the Ready Mode, the red light will illuminate when a PIR event is triggered. After the LCD turns off, the red light will blink 2-3 seconds when photo is taken.
3. After two minutes, all indicator lights will turn off while the camera continues to operate. To wake up the LCD screen from Power Save Mode, briefly press the power button.

4. To awaken the screen from Power Save mode, briefly press the power button.

NOTE: The screen will not turn on when the camera is writing to memory, and the camera will not take a photo/video if the screen is turned on.
Date/Time

1. The date, time and battery charge level will display on the LCD screen by default when it is turned on. To change the date or time, press "ENTER" to scroll to the appropriate item you wish to change (hour, minute, second, day, month and year).
2. Use the +/- buttons to adjust to the appropriate value. Press "ENTER" to save and move on to the next category.
3. Repeat steps 1 and 2 until all fields have been updated.

Location

You this have fuethuectoieputiopnletoesseavperetcheeeldoctae the where this camera is installed. If you do not wish to use
1. To save the locati on where this camera is installed, use the +/- buttons to navigate to the "Location" screen.
2. Press "ENTER" to begin assigning the location a name. The name can consist of up to eight letters and/or numbers.
3. Assign the desired letter/number for each blank using the +/- buttons, then press "ENTER" to save and move to the next blank.
4. When you have finished naming, press "ENTER" until the full name locks in place. (If you are leaving any blanks, this may take a few clicks.)

PIR Mode

1. To select the type of media your camera captures, use the +/- buttons to navigate to the "PIR Mode" screen.

```
PIR Mode
[Still]  Video
```
2. Press "ENTER" then use the +/- buttons to move the cursor between "Still" and "Video."

```
PIR Mode
 Still   [Video]
```
3. Once you've made your selection, press "ENTER" to save.

```
PICTURES    00000
REMAINING   00000
```
PICTURES REMAINING

A   B   C D   E
A- Time
B- Date
C- Moon Phase
D- Location
E- Photo Count

Mounting

1. To mount the camera to an object in the field, locate the strap that came supplied with the camera.

2. Remove the clip from one end of the strap and slide that end through the two slats on the back of the camera.

3. Once the camera is attached, place the clip back on the strap.

4. Wrap the strap around the object at the appropriate height and connect both ends of the clip.

5. Pull any excess material on the strap so the camera attaches to the object tightly.
TIPS:

- Place the camera 25-30 feet from your target area for optimal image quality.
- Try to avoid mounting the camera directly facing the rising or setting sun so sunlight isn't directly hitting the lenses.
- If mounting to a dusty environment (such as a feeder), regularly clean the camera lens covers, incandescent flash cover and PIR sensor cover.
- Periodically check the camera mounting to en-sure it doesn't become loose.
- To keep any water from damaging the unit, the camera door must remain closed with the latch se-cured tightly while the camera is in use.
- Regularly remove the battery compartment cover to inspect the batteries for any corrosive build-up, as this may harm the camera.

Retrieving Images (SD Card Reader)

These instructions are written fora Microsoft operating system. There will be significant variations if using a Linux or Mac-based system, and likely still some variations even if you have a Microsoft system. The steps listed below are basic guidelines and may need to be modified to suit your system and preference.

1. Remove the SD card from your camera by lightly pressing on it until it pops out.
2. Insert the SD card directly into your computer via the SD card reader.
3. Your computer may automatically launch "AutoPlay." If so, you should have several options (including but not limited to the following):
a. Import pictures
b. View pictures
c. Copy disc
d. Transfer pictures
e. Open folder to view files
4. Select the method that best suits your requirements to view/edit your photos and videos.
5. If your computer does not automatically launch AutoPlay, click the "Start" menu and select "Computer" A window will open where "Devices with Removable Storage" will be listed.

6. Select "Secure Digital Storage Device" (what the computer has recognized your camera as) from the menu. 7. This will direct you into the SD card file folder where images will be displayed in the "MEDIA" folder.

8. Open this folder to view/edit photos and videos.

9. IMPORTANT: Only delete photos or videos if you are absolutely sure you want to get rid of them. Deleting anything while viewing and editing will permanently delete the file.

Format SD Card

SDXC CARDS ARE NOT SUPPORTED

Having trouble with your SD card? Try this.

1. Connect the SD card to your computer. If your computer has an SD card slot you can insert the SD card directly into the port.

NOTE: If you are using a MicroSD card, you will need an adapter to allow it to fit into standard SD card ports. If your computer does not have an SD card port built-in, you can use an external USB card reader that plugs into any USB port on your computer.

2. Click the Start or Windows menu and select Computer (Windows Vista/7) or My Computer (Windows XP). For Windows 8 users, type "computer" and click the Computer icon in the Apps search results.

3. Right-click the drive letter associated with your memory device, then select "Format"

4. Ensure FAT32 is selected under "File System"

5. Ensure "Quick Format" is checked

6. Click "Start"

Warranty

FCC STATEMENT

Product Name: Digital Game Scouting Camera

Trade Name: Wildga me Innovations

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two criteria: (1) This device may not cause harmful interference, and (2)This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications tothis unit not expressly approved bythe party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
