## **SAFETY INFORMATION**

<https://www.wildix.com/safety-information/>

## **PACKING LIST**

- 1 x WorkForce WiFi Dongle
- 1 x Type-C adapter

## **Notes**

- Min. required WorkForce firmware version for WiFi Dongle connection: 65.145.4.12
- Available only as a HWaaS item

## **WI-FI DONGLE CONNECTION**

1. Connect WorkForce WiFi Dongle to Type-C adapter
2. Plug the Dongle into WorkForce USB Type-C port.

### Notes

- Check that ACL rule “Can use” – “Advanced phone settings menu” is set in WMS -> Users -> Groups for users who need access to the feature.
- WorkForce with a connected dongle requires at least 5V 2A power source.
- Wi-Fi Bridge mode is not supported.

## NETWORK CONNECTION

To connect WorkForce to a Wi-Fi network:

1. Press **Menu** soft key on WorkForce.
2. Go to **Network** menu and select **WLAN** option.
3. Enable Wi-Fi connection: use **Navigation** keys or press **Switch** soft key to change Wi-Fi connection status from Disable to Enable; press **Save** soft key.
4. Searching for Wi-Fi Networks is in progress. After it is completed, there is a list of all available networks.
5. Select a Wi-Fi network from the list and press **Connect** soft key.
6. Enter password and press **Save** soft key.
7. WorkForce is now connected to the Wi-Fi network; the LED indicator blinks with fast short blue flashes during data transfer.
