2. Connect the wires according to the wiring diagram.
3. Fix into the rain shade and fasten the bottom with screws.

Wiring Diagram

How to attach wires to terminals

Press down on the button, and insert the wire in the corresponding hole. Release the button to clamp the wire in place.

- When connecting, terminals 1/2/3/4 on the outdoor unit to terminals 1/2/3/4 on the indoor unit;
- If the distance is <15m, use the RVV4x0.3 mm cable.
- If the distance is <50m, use the RVV4x0.5 mm cable.

- When connecting the gate lock, if the distance is <15m, use the RVV2x1 .0 mm 2 cable.

Note:

Before pressing the Gate Unlock button, terminals (5/6 on the indoor unit) are in the “Normally Open” state. When pressing down the button, terminals are “shorted and connected”. The terminals are used to connect the electric lock that works in <30V, <3A (AC or DC), and an additional power supply for the lock to work is required.
