Introduction

Cynap Core PRO by WolfVision® delivers an all-in-one collaboration and presentation solution, featuring BYOD, streaming to vSolution Cynap systems, and a document and media player, with support for up to 4K UHD resolution.

Hardware Connection

Make all necessary connections according to the following illustrations. Plug in the power cord as the last step. Power on the equipment. Typical Setup

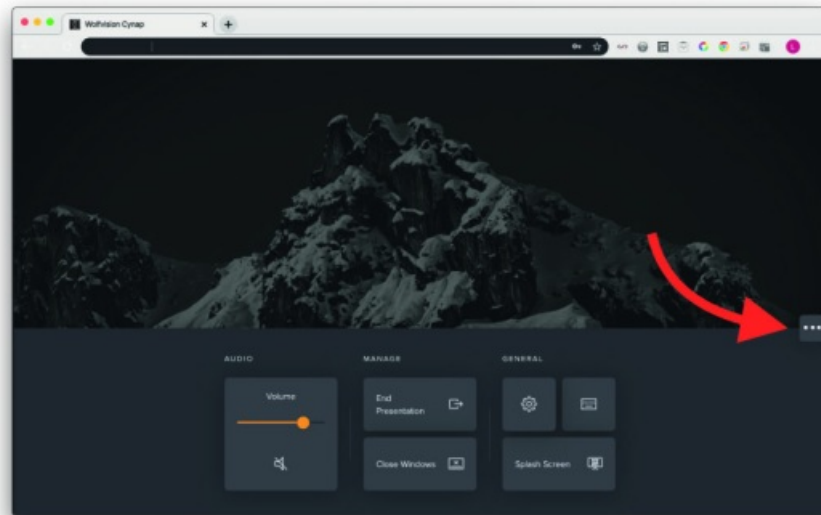

Connect and Control

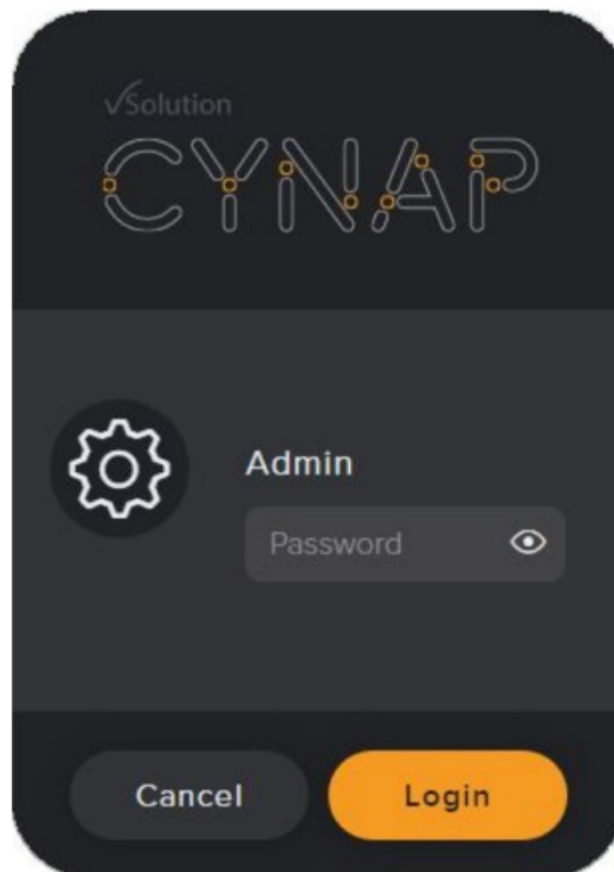

Operating for the first time

When Cynap is switched on, all settings can be set in the password-protected settings of the graphical user interface (GUI). Access the GUI by using a web browser on your connected PC or tablet (input the IP address), by

using the optional remote control, or by using a connected USB mouse and keyboard. Push the  button at the right edge to open the Control center and click on the cogwheel.

Cynap Core PRO Setup

Initial default admin password: Password Check the integrated help for further details.
