WOODPECKER

Woodpeckers Bevel Block and Bevel Square

PRODUCT INFORMATION

BEVEL BLOCK & BEVEL SQUARES sedately

PRODUCT INSTRUCTIONS

BEVEL SQUARE

BLADE PRE-TENSION

The Blade of the Bevel Square can be pre-tensioned to make matching angles easier. Sometimes it's desirable to have a little resistance in the Blade's pivot motion to minimize unwanted movement while you're trying to match an angle. To change the pre-tension pressure on the Blade:

1. Make sure the Clamp Handle is loose.
2. Loosen the Set Screw.
3. Adjust the Pre-Tension Screw. Turning it clockwise will increase friction, counter clockwise decreases friction.
4. Once it is set where you like it, lock it in place by retightening the Set Screw.

BEVEL BLOCK

The Bevel Block features 8 different machined steps that make setting the angle on your Bevel Square fast, consistent, and easy. It can be used in 4 different positions.

- POSITION 1

- POSITION 2

Angle Options
45°, 54°,
60°, 67.5°, 75°

Dovetail Ratios
6:1, 7:1, 8:1

- POSITION 3

- POSITION 4

Angle Options
144°, 150°,
157.5°, 165°
