Product Usage Instructions

Step 1: Align the Legs and Stretchers

As shown in Figure A, align the Legs (A) and Stretchers (B, C, D, E). The Legs will be on the outside of the assembly. The Short Stretchers overlap the Long Stretchers on both the top and bottom sets.

Step 2: Install Carriage Bolts

From the outside, insert the 5/16-18 x 3/4 Carriage Bolts through all holes. Place a 5/16 USS Washer and a 5/16-18 Hex Nut on each Carriage Bolt, but only finger-tighten them. Refer to Figure B for clarification.

Step 3: Attach Multi-Router to the Machine Stand

Place the Multi-Router on the Machine Stand and secure it using the 1/2-13 x 2-1/2 Hex Head Bolts and USS Washer 1/2 from the top. On the underside, use a USS Washer and a 1/2 Lock Washer, and secure it with a 1/2-13 Hex Nut. See Figure C for reference.

Step 4: Adjust Legs and Tighten Joints

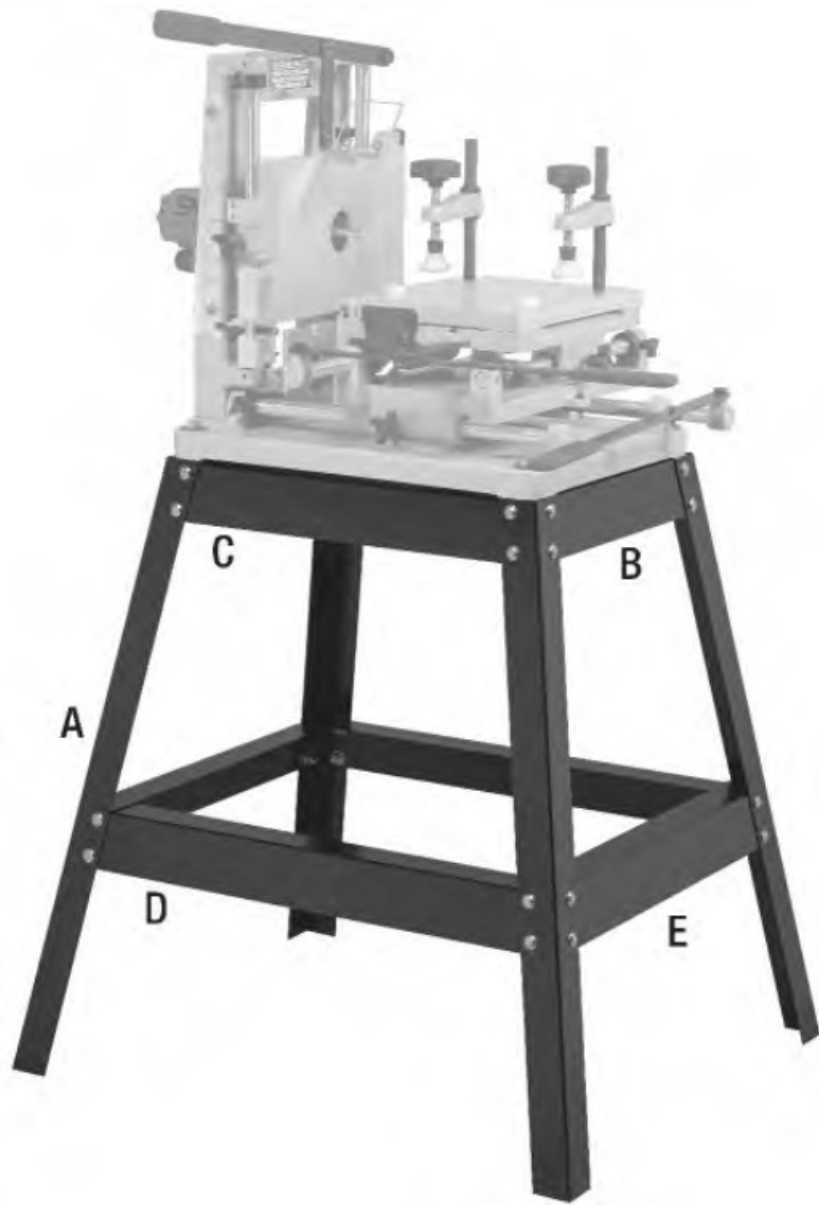

Adjust the Legs so that they are even and flat on the ground. Once aligned, tighten the Nuts on all Leg/Stretcher joints to secure the assembly.
