## WG154 String Trimmer Cordless and Edger

#### **How heavy is the trimmer?**

The trimmer only weighs 4.2 lbs even with the battery installed. The ergonomic design ensures weight is evenly distributed between the main and auxiliary handle to make trimming a comfortable, easy-to-manage experience for anyone.

#### **Does it come pre-assembled?**

Each trimmer comes with some minor assembly required, which may take up to 5 minutes per tool. A step-by-step instruction manual is included along with easy assembly instructions. Please have a #2 Phillips head screwdriver on hand when assembling your String Trimmer / Edger.

#### **How do I convert the GT from Trimmer to Edger?**

Converting your trimmer from Trimmer to Edger is quick and easy.

To change the tool for edging mode, grasp the cutting head where it meets the shaft. Pull the handle away from each other and twist 180 degrees. Release, and you're ready to go!

#### **How long can you trim on each 20V MaxLithium battery charge?**

Each 20V MaxLithium Battery will provide enough working time per charge to trim around the average 1/4 acre yard. Actual results may vary depending on the density of the grass or weeds you're cutting or the age of the battery pack.

#### **What is the horsepower rating of WORX lithium tools?**

Battery powered DC motors are not rated for horsepower as output power is only measured with gas or induction AC (corded) motors. WORX lithium powered products were designed with sufficient power to get the job done quickly and easily.

#### **How long does it take to charge the 20V lithium battery?**

It takes 5 hours to fully charge the battery with the included charger.

#### **Are lithium batteries interchangeable with Ni-Cd batteries?**

Our lithium tools and Ni-Cd tools are separate platforms and are not interchangeable. Lithium batteries offer our customers maintenance-free technology without the hassle of managing the memory effect inherent in Ni-Cd batteries.

#### **Are the 20V lithium batteries interchangeable with the 32V lithium batteries?**

While PowerShare allows you to share batteries between tools within the same voltage family, batteries should only be used with tools of a corresponding voltage. Use your 20V lithium battery with any 20V WORX tool even the power tools but save your 32V battery for your 32V tools.

#### **What kind of spools or cutting line does this trimmer use? Can I get the Free Spools for Life offer?**

The 20V Cordless Worx String Trimmer / Edger uses the [Worx WA0004 spools](#) which is prewound with 10' ft of our patented DoubleHelix DNA Line2. This model trimmer is also eligible for the Free Spools for Life program.

#### **Can other cutting line be used with the Worx Electric String Trimmer / Edger?**

Our Double Helix line is specially designed to work with the Worx String Trimmers / Edgers and give you a quicker and more efficient cut to help maintain a healthy, professionally groomed lawn. DoubleHelix DNA Line 2 is a

patented copolymer nylon resin and synthetic material designed with an oval aerodynamic shape known as DoubleHelix DNALINE2 which increases edging life up to 25% compared to normal use conditions. Designed to be softer, stretch and cushion on impact with hard surfaces, the DNA2 trimmer line is durable and flexible for longer life.

If you decide to use the traditional line, the 20V Cordless String Trimmer / Edger can accept standard 0.065" cutting line found at any garden or home center and can be wound around our empty spool cartridges. Refer to your owner's manual for important details about how to wind the line on the spools.

[Can I use the tool without the safety guard? I have experience with other trimmers and will be the only one using it.](#)

The safety guard is an essential part of the tool. Not only does it keep you safe from any debris from the trimming/edging, but it also helps regulate the length of the cutting line. Without the safety guard, your Worx String Trimmer / Edger will not operate properly and you are at risk for injury.

[Are there any precautions I should follow when using the Worx 20V String Trimmer / Edger?](#)

Carefully review the owner's manual for all safety information and guidelines for using the Worx String Trimmer / Edger. Follow safety precautions while using any power tools including wearing safety eyewear, gloves, appropriate shoes & clothing, and keeping hair tied back. See the owner's manual for complete safety instructions and details.
