

How To Use Keyboard Hot Keys:

Auto switching

Note: default auto switching time interval is 6 seconds, you are able to change this value by following hot key commands:

Increase or decrease auto switching time interval

Note: 1 second per step

Select port by port number

Enable or disable buzzer sound

Enable or disable fast switch mode.

If fast switch mode is enabled, then double hit left or right bound of the screen with mouse pointer in 1 second, KVM will switch to previous or next PC.

Known issue:

Apple keyboard is not in supported.

User's manual

2x1 HDMI KVM Switch

Introduction

This 2x1 KVM Switch provides you with great flexibility in integrating cross-platform computer equipment easily. It makes you available to switch easily and reliably between any HDMI computers using one HDMI compliant display.

The 2x1 KVM Switch supports USB 2.0 hub and USB 2.0 keyboard /mouse. By using USB 2.0 hub ports on the KVM, you even can attach USB drive, printer, barcode scanner or other USB devices to the KVM. Switching can be controlled through variable methods, such as the front panel source selector buttons, IR signals and hot keys on keyboard. With EDID emulators in every input ports, keep PCs always have correct display information, prevent display settings changed while switching input ports. Support analog L/R audio output.

Packing List

- 1 * HDMI KVM switch
- 1 * DC 5V power adapter
- 1 * IR control
- 1 * User Manual

How To Use

1. Setup the connection according to the connection diagram.
2. After all the PCs are started in step 1, then you can switch to any PC by keyboard hot keys, IR keys or the key pad on the KVM front panel. (For example, if you want to control the PC connected to HDMI IN 2 just press the "Select" button on front panel, or press digit button "2" on remote control, or the keyboard hotkey commands described following)

How To Use Keyboard Hot Keys:

1. Hit ScrollLock key twice within 2 seconds, the buzzer will beep twice.
2. After step 1 enter following hot key commands within 3 seconds, the KVM will execute the corresponding commands.

Connection Diagram

Features

- Using only 1 set of keyboard, mouse and monitor to control 2 computer devices.
- Support auto switching to monitor computers in a specified time interval.
- Support hot key commands and mouse gesture to switch inputs
- Available to use keyboard without any delay after switch input sources.
- Support resolution up to 3840*2160@60Hz 4:4:4.
- Compliant with HDCP 2.2.
- Support USB 2.0 for printers, USB drives etc.
- With EDID emulators in every input ports, keep PCs always have correct display information.
- Support front panel buttons, IR signals, keyboard hot keys to control KVM switch.
- Support Unix/Windows/Debian/Ubuntu/Fedora /Mac OS X/Raspbian/Ubuntu for Raspberry Pi and other Linux based system.
- Support hot plug, connect or disconnect devices to the KVM switch in any time and without turn off devices.
- Support analog L/R audio output.
- Support HDR 10 and Dolby Vision

Panel View

ID	Name	Description
1	Power switch	Turn on or turn off power supply
2	L/R audio	Analog L/R audio output, connect to analog speaker
3	USB connection status	LEDs will be lit if the USB Type B ports connect to computers, and computers are on
4	Input selection status	The LED will be lit if the corresponding input source is selected

Panel View

ID	Name	Description
5	Input selection button	Select input source
6	IR receiver	Receive IR remote signal
